DEPARTMENT OF TRANSPORTATION**Research and Special Programs Administration****49 CFR Part 172**

[Docket No. HM-171; Amdt. No. 68]

Use of United Nations Shipping Descriptions**AGENCY:** Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.**ACTION:** Final rule.

SUMMARY: This document publishes a revised version of the Optional Hazardous Materials Table which appears in 49 CFR 172.102. The revision has been necessitated by a number of changes to the Inter-Governmental Maritime Consultative Organization (IMCO) International Maritime Dangerous Goods Code (IMCO Code), upon which the optional table is based. These amendments have been published by IMCO as Amendments 17-79 and 18-79 to the IMCO Code. The purpose of the revision of the Optional Hazardous Materials Table is to maintain alignment between that table and the corresponding provisions of the IMCO Code, in order to insure that the import and export of hazardous materials will not be adversely affected by potentially conflicting and duplicative requirements for the description, classification, labeling and marking of hazardous materials. Since the use of the Optional Hazardous Materials Table is, as the name implies, an option, this rule will

not impose an undue burden on persons affected by the regulations.

EFFECTIVE DATE: June 1, 1981.**FOR FURTHER INFORMATION CONTACT:**

Edward A. Altemos (202-426-0656), Office of Hazardous Materials Regulation, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590. Office hours are from 8:00 a.m. to 4:30 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the Optional Hazardous Materials Table is to facilitate the international transportation of hazardous materials and to minimize a duplicity of package marking and labeling requirements, and shipping paper descriptions, that would be required to comply with both domestic and international standards. In order to satisfy this intent, it is essential that the Optional Hazardous Materials Table be maintained in alignment with the provisions of the applicable international standards.

The Optional Hazardous Materials Table, in its present form, is reflective of the provisions of the IMCO Code including all amendments through Amendment 18-78. Recently, IMCO published Amendments 17-79 and 18-79 to the IMCO Code, and established June 1, 1981, as the world-wide implementation date for these amendments. Consequently, the MTB is revising the Optional Hazardous Materials Table to maintain the necessary alignment with the IMCO Code and is establishing June 1, 1981, as the effective date for revision of the table.

Amendments 17-79 and 18-79 to the IMCO Code include changes to or deletion of approximately 360 existing hazardous materials entries and the addition of approximately 260 new entries. Because of the optional nature § 172.102, as well as the large number of changes necessitated by the recent IMCO amendments (many of which are minor in nature), the MTB does not consider it necessary to itemize each change being made to the Optional Hazardous Materials Table. However, to facilitate identification of new or modified entries, such entries have been identified by the inclusion of an asterisk (*) in Column (1) of the table. A copy of the amended optional table has been provided to the Association of American Railroads for use in their efforts to develop a hazardous materials table which consolidates the tables currently appearing in §§ 172.101 and 172.102.

Since this rule does not impose mandatory additional requirements, notice and procedure thereon are considered unnecessary.

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

In consideration of the foregoing, the Optional Hazardous Materials Table in § 172.102 of Title 49, Code of Federal Regulations, is revised to read as follows:

§ 172.102 Purpose and use of optional hazardous materials table for international shipments.

Note.—The Materials Transportation Bureau has determined that, since this rule does not impose additional requirements and should have the net result of reducing costs and duplicative regulatory burdens, this document will not result in a "major rule" under the terms of Executive Order 12291, nor is it a "significant regulation" under DOT's regulatory policy and procedures (44 FR 11034). Furthermore, this rule does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321 et seq.). A regulatory evaluation and an environmental assessment are available for review in the docket.

Issued in Washington, D.C., on May 20, 1981.
