

**Pipeline and Hazardous
Materials Safety Administration**

Roger Little
Manager, Information Technology and Analysis
PHMSA Pipeline Safety Program

Pipeline and Hazardous
Materials Safety Administration

Summary of Changes

- We will cover points of interest on the form, not going over every detail
- Recall- a main goal is to reduce “Other” cause

Pipeline and Hazardous Materials Safety Administration

Types of Changes Incorporated (cont)

- Expand and improve cause reporting paths
- Expand choices for some questions to better cover the complete spectrum of possibilities
- Reorganize and adjust the questions so that the 3 forms are more similar and more compatible
 - To facilitate cross-modal analysis
 - To simplify communications with stakeholders and the public

Pipeline and Hazardous
Materials Safety Administration

New Hazardous Liquid Accident Form- Summary

PHMSA strives to be a more risk-based and
data-driven agency

Better data leads to...

...better analyses, which lead to...

...better decisions, which lead to...

...better *safety* for all.
