

RESEARCH FUNDING

Faculty, Graduate and PhD Students in STEM: \$500K in Federal Research Funding Available

The US Department of Transportation will provide 5 universities up to \$100,000 each for innovative solutions to pipeline corrosion and other pipeline safety challenges. Pipelines are essential to domestic energy supplies and national transportation safety, transporting natural gas and oil throughout country.

Who: Graduate Students, PhD Candidates, and Faculty Engineering or Technical disciplines

Title: Pipeline Safety Research
Competitive Academic Agreement Program (CAAP)

Deadline: 12:00 pm ET - Thursday, June 13, 2013

Research Topic(s): May range from Preventing and Mitigating Pipeline Corrosion to Innovative Application for Laws of Physics to Detect and or Shape Material Loss Defects in Pipelines. Read full announcement for more topics.

How to Apply:

1. Register or Log-on to Grants.gov. Please note that new user registration approval may take up to two weeks.
2. Search by CFDA number, 20.724, OR by Funding Opportunity number DTPH56-13-SN-000002.
3. Read full announcement, then download and complete application.
