DOT-SP 12531
(EIGHTH REVISION)

EXPIRATION DATE: 2025-12-31

(FOR RENEWAL, SEE 49 CFR 107.109)

1. **GRANTEE:** Worthington Cylinder Corporation
   Columbus, OH

2. **PURPOSE AND LIMITATIONS:**
   a. This special permit authorizes the manufacture, marking, sale and use of a non-DOT specification cylinder conforming with all regulations applicable to a DOT specification 4BW cylinder, except as specified herein, for the transportation in commerce of the materials authorized by this special permit. This special permit provides no relief from the Hazardous Materials Regulations (HMR) other than as specifically stated herein. The most recent revision supersedes all previous revisions.
   b. The safety analyses performed in development of this special permit only considered the hazards and risks associated with transportation in commerce.
   c. In accordance with 49 CFR 107.107(a) party status may not be granted to a manufacturing permit. These packagings may be used in accordance with 49 CFR 173.22a.

3. **REGULATORY SYSTEM AFFECTED:** 49 CFR Parts 106, 107 and 171-180.

4. **REGULATIONS FROM WHICH EXEMPTED:** 49 CFR §§ 173.201, 173.202, 173.203, 173.302a(a)(1), 173.304a(a)(1) and 173.304a(a)(4)(ii) in that a non-DOT specification cylinder is not authorized except as specified herein.

5. **BASIS:** This special permit is based on the application of Worthington Cylinder Corporation dated November 18, 2021, submitted in accordance with § 107.109.

Tracking Number: 2021114986
6. **HAZARDOUS MATERIALS (49 CFR 172.101):**

7. SAFETY CONTROL MEASURES:

a. PACKAGING: Packaging prescribed is a non-DOT specification cylinder designed and fabricated in accordance with DOT 4BW specification (§§ 178.35 and 178.61) except as follows:

§ 178.35(f) Markings.

Applies except the cylinder must be marked with “DOT-SP 12531" in lieu of ADOT 4BW@ followed by the service pressure.

§ 178.61(b) Authorized steel.

The steel used must be ASTM A 240 Type 304L or 316L stainless steel in the fully annealed condition. Chemical compositions are as follows:

§ 178.61(f) Wall Thickness.

* * * *

(f)(3) 40,000 psi.

§ 178.61(g) Heat treatment.

Heat treatment is not permitted.

§ 178.61(i) Hydrostatic test.

(1) Each cylinder must be hydrostatically or pneumatically pressurized to a minimum of 2 times the cylinder service pressure and held at the test pressure for at least 10 seconds. The cylinder must show no defects.

(2) One finished cylinder selected at random out of each lot of 200 or less successively produced must be hydrostatically pressurized to 4 times the marked service pressure and held at that pressure for at least 60 seconds. The cylinder must not leak or burst.

§ 178.61(k) Elongation. Elongation must be at least 10% for specimens with a gauge length of 24t with a width not over 6t or a gauge length of 8 inches with a width not over 1 2 inches.

b. TESTING: Each cylinder must be retested by the cylinder manufacturer or a person holding a current retester identification number issued by the Pipeline and Hazardous Materials Safety Administration. Each cylinder must be periodically retested every five years in accordance with the requirements specified in § 180.209 except as follows:

(1) Each cylinder used for a hazardous material non-corrosive to the cylinder must be externally visually inspected in accordance with CGA Pamphlet C-6. Following the visual inspection, each cylinder must be subjected to an internal hydrostatic pressure of at least 2 times the marked service pressure without determination of expansion. The cylinder must be carefully examined under test pressure and removed from service if a leak or other harmful defect exists.

(2) Each cylinder used for a hazardous material that is corrosive to the cylinder must be visually inspected internally and externally in accordance with CGA Pamphlet C-6. Following the visual inspection, each cylinder must be subjected to an internal hydrostatic pressure of at least 2 times the marked service pressure with determination of expansion. The cylinder must be carefully
examined under test pressure and removed from service if a leak or other harmful defect exists. The cylinder must be condemned if the permanent expansion exceeds 10% of the total expansion.

c. OPERATIONAL CONTROLS:

(1) The quantity limitations in § 172.101, Column (9B) apply to shipments made under this special permit.

(2) The following additional requirements apply to the transportation of dichlorosilane, boron trichloride and chlorine trifluoride:

(i) Dichlorosilane, boron trichloride, and chlorine trifluoride are limited to transportation by motor vehicle and cargo vessel.

(ii) For water transportation, the packagings must be stowed "on deck" only, as far away from the crew's quarters, other normally manned spaces and air intakes as reasonably practical.

(iii) When shipping packagings described in this special permit without a secondary overpack, the shipper must load the material, block and brace the material for transportation in accordance with a prepared plan which precludes stacking (double decking) and the freight container, or van type motor vehicle must be sealed. Shipments in freight containers and motor vehicles must be from one origin to one destination only. No intermediate pick-up or delivery is authorized.

(iv) Shipments by "stake body" motor vehicles must be properly blocked and braced in exclusive use vehicles carrying no other cargo.

(v) When shipping overpacked packagings described in this special permit, the overpack must be as specified in § 173.25. The inside packaging must be isolated from the overpack by a shock-mitigating, non-reactive cushioning material. There must be a minimum of two inches of cushioning material around the body of the inner packaging, and at least three inches on the top and bottom, between the inner packaging and the overpack.

8. SPECIAL PROVISIONS:

a. In accordance with the provisions of Paragraph (b) of § 173.22a, persons may use the packaging authorized by this special permit for the transportation of the hazardous materials specified in paragraph 6, only in conformance with the terms of this special permit.
b. A person who is not a holder of this special permit, but receives a package covered by this special permit, may reoffer it for transportation provided no modifications or changes are made to the package and it is offered for transportation in conformance with this special permit and the HMR.

c. A current copy of this special permit must be maintained at each facility where the package is offered or reoffered for transportation.

d. Each packaging manufactured under the authority of this special permit must be marked with a registration symbol designated by the Office of Hazardous Materials Safety for a specific manufacturing facility.

e. A current copy of this special permit must be maintained at each facility where the package is manufactured under this special permit. It must be made available to a DOT representative upon request.

9. **MODES OF TRANSPORTATION AUTHORIZED**: Motor vehicle, rail freight, cargo vessel, and cargo aircraft only. See paragraph 7.c.

10. **MODAL REQUIREMENTS**: A current copy of this special permit must be carried aboard each cargo vessel, aircraft or motor vehicle used to transport packages covered by this special permit. The shipper must furnish a copy of this special permit to the air carrier before or at the time the shipment is tendered.

11. **COMPLIANCE**: Failure by a person to comply with any of the following may result in suspension or revocation of this special permit and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

   o All terms and conditions prescribed in this special permit and the Hazardous Materials Regulations, Parts 171-180.

   o Persons operating under the terms of this special permit must comply with the security plan requirement in Subpart I of Part 172 of the HMR, when applicable.

   o Registration required by § 107.601 et seq., when applicable.

Each “Hazmat employee”, as defined in § 171.8, who performs a function subject to this special permit must receive training on the requirements and conditions of this special permit in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this special permit, including display of its number, when this special permit has expired or is otherwise no longer in effect.
Under Title VII of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU)- “The Hazardous Materials Safety and Security Reauthorization Act of 2005” (Pub. L. 109-59), 119 Stat. 1144 (August 10, 2005), amended the Federal hazardous materials transportation law by changing the term “exemption” to “special permit” and authorizes a special permit to be granted up to two years for new special permits and up to four years for renewals.

12. REPORTING REQUIREMENTS: Shipments or operations conducted under this special permit are subject to the Hazardous Materials Incident Reporting requirements specified in 49 CFR §§ 171.15 - Immediate notice of certain hazardous materials incidents, and 171.16 - Detailed hazardous materials incident reports. In addition, the grantee(s) of this special permit must notify the Associate Administrator for Hazardous Materials Safety, in writing, of any incident involving a package, shipment or operation conducted under terms of this special permit.

Issued in Washington, D.C.:

for William Schoonover
Associate Administrator for Hazardous Materials Safety

Copies of this special permit may be obtained by accessing the Hazardous Materials Safety Homepage at https://www.phmsa.dot.gov/approvals-and-permits/hazmat/special-permits-search. Photo reproductions and legible reductions of this special permit are permitted. Any alteration of this special permit is prohibited.
