2. **PURPOSE AND LIMITATION:**
   
   a. This emergency exemption authorizes the one-time transportation in commerce of packages of flammable liquid which exceed the maximum weight requirement for a limited quantity. The containers are neutron detectors and the flammable liquid is part of the detector. Six to seven detectors are suspended within each shipping crate, bolted in place in a custom framework within each crate.

b. Each detector and its contents weighs approximately 6 to 7 lbs. each, and packing 6 or 7 in a crate results in a total gross weight that exceeds the maximum weight limitation for a limited quantity of flammable liquid.

c. The 5 crates are authorized for the one-time transportation by highway from Washington University, St. Louis, MO to Lawrence Berkeley National Laboratory, Berkeley, CA.

d. The crates will be transported by North American Transportation, which is a contract carrier.

e. Marking the exemption number on each crate in accordance with § 172.203(c) is waived.
