Special Programs
Administration**

400 Seventh St., S.W.
Washington, D.C. 20590

SEP 15 2003

DOT-E 12882
(THIRD REVISION)

EXPIRATION DATE: April 30, 2005

1. GRANTEE: Eagle-Picher Technologies, LLC
Joplin, MO
2. PURPOSE AND LIMITATION:
 - a. This exemption authorizes the one-time transportation in commerce of a non-DOT specification pressure vessel containing compressed hydrogen, which is a component part of a nickel-hydrogen battery. This exemption provides no relief from any Hazardous Materials Regulation (HMR) other than as specifically stated herein.
 - b. The safety analyses performed in development of this exemption only considered the hazards and risks associated with transportation in commerce.
3. REGULATORY SYSTEM AFFECTED: 49 CFR Parts 106, 107 and 171-180.
4. REGULATIONS FROM WHICH EXEMPTED: 49 CFR §§ 173.301(f), 173.302a(a), and 175.3 in that a non-DOT specification cylinder is not authorized, except as specified herein.
5. BASIS: This exemption is based on the application of Eagle-Picher Technologies, LLC dated May 5, 2003, submitted in accordance with § 107.109 and additional information dated September 11, 2003.
6. HAZARDOUS MATERIALS (49 CFR § 172.101):

| Hazardous Materials Description | | | |
|---------------------------------|---------------------------|-------------------------------|------------------|
| Proper Shipping Name | Hazard Class/ Division | Identi- fication Number | Packing Group |
| Hydrogen, compressed | 2.1 | UN1049 | N/A |

SEP 15 2003

7. SAFETY CONTROL MEASURES:

a. PACKAGING - Packagings prescribed are non-DOT specification pressure vessels constructed of Inconel 718 alloy per AMS 5596 with a minimum thickness of 0.039 inch. The pressure vessel is fabricated from fusion welded tubing and hemispherical domed end caps, designed and constructed in accordance with MIL-STD-1522A, that have a maximum service pressure of 1200 psig. The pressure vessel is a component of a nickel-hydrogen battery as described in the application on file with the Office of Hazardous Materials Exemptions and Approvals (OHMEA).

b. TESTING -

(1) 100% non-destructive examination of the welds is required. Any cylinder with a flaw greater than 0.050 inches must be rejected.

(2) The pressure vessel must have a burst pressure to service pressure ratio of 2.0 or greater.

(3) The nickel-hydrogen battery must meet the requirements of § 173.159(d) for a nonspillable, wet, electric storage battery. There may not be a release of gas during the vibration or pressure differential tests.

(4) The nickel-hydrogen battery must meet the test requirements of the documentation "Qualification Test Procedure-697" on file with OHMEA.

c. OPERATING CONDITIONS -

(1) This exemption only authorizes the transportation of six (6) batteries.

(2) Pressure relief devices are not required.

(3) Each battery must be protected and transported in a strong outside shipping container as detailed in the application or file with OHMEA.

(4) The temperature of the batteries may not exceed 85°F during transport. The batteries may be co-packaged with frozen gel-packs to control temperature during transport, if needed.

8. SPECIAL PROVISIONS:

a. A person who is not a holder of this exemption who receives a package covered by this exemption may reoffer it for transportation provided no modification or change is made to the package or its contents and it is reoffered for transportation in conformance with this exemption and the HMR.

b. A current copy of this exemption must be maintained at each facility where the package is offered or reoffered for transportation.

c. The outside of each shipping container must be marked "Inside package conforms to DOT-E 12882".

d. Emergency response information provided with the shipment and available via an emergency response telephone number must indicate that the receptacles are not fitted with pressure relief devices and provide appropriate guidance for exposure to fire.

e. Transportation of Division 2.1 (flammable Gases) are not authorized aboard aircraft unless specifically authorized in the Hazardous Materials Table (§ 172.101).

9. MODES OF TRANSPORTATION AUTHORIZED: Motor vehicle and cargo-only aircraft.

10. MODAL REQUIREMENTS: A current copy of this exemption must be carried aboard each aircraft and motor vehicle used to transport packages covered by this exemption. The shipper must furnish a current copy of this exemption to the air carrier before or at the time the shipment is tendered.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this exemption and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

o All terms and conditions prescribed in this exemption and the Hazardous Materials Regulations, 49 CFR Parts 171-180.

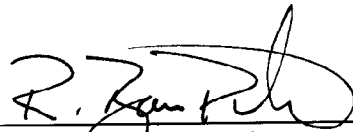

o Registration required by § 107.601 et seq., when applicable.

Each "Hazmat employee", as defined in § 171.8, who performs a function subject to this exemption must receive training on the requirements and conditions of this exemption in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this exemption, including display of its number, when this exemption has expired or is otherwise no longer in effect.

12. REPORTING REQUIREMENTS: The carrier is required to report any incident involving fire, explosion or loss of packaging contents or packaging failure to the Associate Administrator for Hazardous Materials Safety (AAHMS) as soon as practicable. (Sections 171.15 and 171.16 apply to any activity undertaken under the authority of this exemption.) In addition, the holder(s) of this exemption must inform the AAHMS, in writing, of any incident involving the package and shipments made under the terms of this exemption.

Issued in Washington, D.C.:

for Robert A. McGuire
Associate Administrator
for Hazardous Materials Safety
