1. **GRANTEE:** Formulated Solutions  
   Clearwater, FL

2. **PURPOSE AND LIMITATION:**

   a. This special permit authorizes the transportation in commerce of an aerosol in certain non-refillable containers which have been tested by an alternative method in lieu of the hot water bath test. In lieu of the hot water bath, each container will be subject to an automated in-line pressure test. This special permit provides no relief from the Hazardous Materials Regulations (HMR) other than as specifically stated herein. The most recent revision supersedes all previous revisions.

   b. The safety analyses performed in the development of this special permit only considered the hazards and risks associated with the transportation in commerce.

   c. No party status will be granted to this special permit.

3. **REGULATORY SYSTEM AFFECTED:** 49 CFR Parts 106, 107 and 171-180.

4. **REGULATIONS FROM WHICH EXEMPTED:** 49 CFR § 173.306(a)(3)(v) in that the use of a leakage test other than the hot water bath is not authorized, except as specified herein.

5. **BASIS:** This special permit is based on the application of Formulated Solutions dated June 5, 2014 submitted in accordance with § 107.109.
6. **HAZARDOUS MATERIALS (49 CFR § 172.101):**

7. **SAFETY CONTROL MEASURES:**

a. **PACKAGING** - Prescribed packaging is a DOT Specification 2P or 2Q aluminum non-refillable inside container with an inner bag containing a limited quantity of a flammable material. The fill/discharge valve is attached to a laminated bag (PET). The bag-on-valve inner package is inserted into the aluminum inside container and affixed by a crimping process. The intermediate space between the two packaging systems is filled with non-flammable compressed air (or other non-flammable gas, such as nitrogen) to no more than 135 psig at ambient temperature. The can and bag conform to drawings on file with the Office of Hazardous Materials Approvals and Permits (OHMAP). The packaging meets all requirements of § 173.306(a)(3) except for the hot water bath test of § 173.306(a)(3)(v).

b. **OPERATIONAL CONTROLS** -

   (1) Prescribed containers may be transported under the provisions of § 173.306(a).

   (2) The compressed air other non-flammable gas must remain around the bag and must not come in contact with the contents of the bag.

c. **TESTING** - As an alternative to the hot water bath test the following testing procedures must be followed:

   (1) The PET pouch must be tested at 130°F for 60 days for any leakage or distortion with the product.
(2) The automated in-line pressure check using the system described in the specifications on file with OHMAP must be conducted on 100% of all non-refillable aluminum 2P or 2Q containers produced under this special permit.

(3) If the pressure measured on any container during the in-line pressure check greater than 135 psig, the container must be rejected, either by an automated system, or by manually shutting down the line and removing the container.

(4) One sample container every 30 minutes must be randomly selected from the line and be inspected for proper closures and verification of filling and vapor pressure.

(5) If the container shows any evidence of improper closure or if filling or vapor pressure is out of specifications, then the Quality Assurance Inspector shall immediately select five more samples and repeat the testing. The necessary corrective actions must be implemented to ensure proper closure and vapor pressure is maintained.

8. SPECIAL PROVISIONS:

a. A person who is not a holder of this special permit who receives a package covered by this special permit may reoffer it for transportation provided no modification or change is made to the package and it is reoffered for transportation in conformance with this special permit and the HMR.

b. A current copy of this special permit must be maintained at each facility where the package is offered or reoffered for transportation.

c. MARKING –

(1) Each container must be plainly and durably marked “DOT-SP 14724” as specified in § 172.301(c) and be shipped in strong outer packagings.

(2) Each outside packaging must be marked “INSIDE CONTAINERS COMPLY WITH DOT-SP 14724”.
d. Containers filled with a material meeting the definition of a “Consumer commodity” in § 171.8 may be reclassed as ORM-D and shipped as “Consumer commodity” in accordance with § 173.306(i).

9. MODES OF TRANSPORTATION AUTHORIZED: Motor vehicle, rail freight, cargo vessel, cargo aircraft only, and passenger-carrying aircraft.

10. MODAL REQUIREMENTS: A current copy of this special permit must be carried aboard each cargo vessel, aircraft, or motor vehicle used to transport packages covered by this special permit. The shipper must furnish a copy of this special permit to the air carrier before or at the time the shipment is tendered.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this special permit and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

   a. All terms and conditions prescribed in this special permit and the Hazardous Materials Regulations, 49 CFR Parts 171-180.

   b. Persons operating under the terms of this special permit must comply with the security plan requirement in Subpart I of Part 172 of the HMR, when applicable.

   c. Registration required by § 107.601 et seq., when applicable.

Each "Hazmat employee", as defined in § 171.8, who performs a function subject to this special permit must receive training on the requirements and conditions of this special permit in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this special permit, including display of its number, when this special permit has expired or is otherwise no longer in effect.
Under Title VII of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU)—“The Hazardous Materials Safety and Security Reauthorization Act of 2005” (Pub. L. 109-59), 119 Stat. 1144 (August 10, 2005), amended the Federal hazardous materials transportation law by changing the term “exemption” to “special permit” and authorizes a special permit to be granted up to two years for new special permits and up to four years for renewals.

12. REPORTING REQUIREMENTS: Shipments or operations conducted under this special permit are subject to the Hazardous Materials Incident Reporting requirements specified in 49 CFR §§ 171.15 Immediate notice of certain hazardous materials incidents, and 171.16 Detailed hazardous materials incident reports. In addition, the grantee(s) of this special permit must notify the Associate Administrator for Hazardous Materials Safety, in writing, of any incident involving a package, shipment or operation conducted under terms of this special permit.

Issued in Washington, D.C.:
