EXEMPTION HOLDER

U.S. Department of Defense  
Falls Church, VA

APPLICATION DATE  
March 3, 1997
1. Walter Kidde and Company, Incorporated, Belleville, New Jersey, is hereby granted an exemption from those provisions of this Department's Hazardous Materials Regulations specified in paragraph 5 below to offer packages prescribed herein of a Class C explosive and a liquefied non-flammable gas for transportation in commerce subject to the limitations and special requirements specified herein. This exemption authorizes the use of non-DOT specification cylinder, and provides no relief from any regulation other than as specifically stated. Each of the following is hereby granted the status of a party to this exemption:

   Department of Defense, Washington, D.C. - PTE-1

2. BASIS. This exemption is based on Walter Kidde and Company, Incorporated's application dated April 28, 1978, submitted in accordance with 49 CFR 107.105 and the public proceeding thereon. The granting of party status is based on the following application submitted in accordance with 49 CFR 107.111 and the public proceeding thereon:

3. HAZARDOUS MATERIALS (Descriptor and class). Cool gas generator containing an explosive power device, Class C and a compressed gas containing 7.39 pounds of carbon dioxide, and .641 pounds of alcohol in one assembly.

5. REGULATION AFFECTED. 49 CFR 173.304, 175.3.

6. MODES OF TRANSPORTATION AUTHORIZED. Motor vehicle, rail freight, cargo vessel, and cargo-only aircraft.

7. SAFETY CONTROL MEASURES. Packaging prescribed consists of a welded cylinder measuring 5.5 inches outside diameter by 18.5 inches long, filled with 7.39 pounds of carbon dioxide and .641 pounds of alcohol and into one end of which is welded a cylindrical chamber, housing a propellant charge designated AK14 Model 1, and a Class C electric squib. The cylinder must be designed for a service pressure of 1,800 pounds per square inch and may be charged to a pressure not exceeding 850 pounds per square inch at 70°F. Each cylinder must be tested to a pressure of 6,000 pounds per square inch and have a permanent expansion not exceeding 10-percent of the total expansion. Further, the cylinder must have a burst pressure of not less than 8,000 pounds per square inch. Cylinders must be hydrostatically tested every 3 years at a pressure of 6,000 pounds per square inch and be removed from service if the permanent expansion exceeds 10-percent of the total expansion and after the cylinder has been discharged 15 times. One charged and filled completed assembly
in addition to one extra propellant charge must be packaged in
an outside DOT Specification 12H65 corrugated fiberboard box.
Completed unit must otherwise be fabricated and tested in
accordance with details included in Walter Kidde and Company,
Incorporated's drawings numbered 891936, 891937, and 891942
on file with the Office of Hazardous Materials Regulation
(OHMR).

8. SPECIAL PROVISIONS.

a. Persons who receive packages covered by this exemption may
reship them pursuant to the provisions of 49 CFR 173.22a.

b. A copy of this exemption must be carried aboard each vessel,
aircraft used to transport packages covered by this exemption.

9. REPORTING REQUIREMENTS. Any incident involving loss of contents of
the package must be reported to the OHMR as soon as practicable.
