Packaging prescribed is a non-DOT specification steel drum having a capacity of five gallons, complying with specification DOT-51, except for 49 CFR 178.89-3(a) and 178.89-7(c) and, instead, it is required that: the material of construction is terne plate (lead-coated cold-rolled steel); the closure, instead of a screw thread type, is a spring-loaded valve held in the normally closed position by the spring force.
