EXEMPTION HOLDER

Baker Performance Chemicals, Inc.
Houston, TX

APPLICATION DATE

August 5, 1996
1. B.S.L. Transport, Quievraichain, France (U.S. Agent: BSL Transportation Equipment, Roselle Park, New Jersey), is hereby granted an exemption from certain provisions of this Department's Hazardous Materials Regulations to offer packages of a flammable liquid for transportation in commerce subject to the limitations and special requirements specified herein. This exemption authorizes the shipment of ethylene oxide in 4,760 gallon DOT Specification 51 steel portable tanks with safety relief valves set at 145 psig and a vacuum/perlite insulation system, and provides no relief from any regulation other than as specifically stated.

3. HAZARDOUS MATERIAL (Descriptor and Class). Ethylene oxide classed as a flammable liquid.

4. PROPER SHIPPING NAME (49 CFR 172.101). Ethylene oxide

5. REGULATION AFFECTED. 49 CFR 173.124(a)(6)(i), (iii) and (vii)

6. MODES OF TRANSPORTATION AUTHORIZED. Motor vehicle, rail freight and cargo vessel.

7. SAFETY CONTROL MEASURES. Packaging prescribed is a DOT Specification 51 steel portable tank constructed in accordance with BSL Transport drawings ENS 734010 Mod. A dated November 16, 1987, TH 734010 Mod. B dated December 8, 1987 and calculations on file with the Office of Hazardous Materials Transportation (OHMT) and in compliance with the following:

   (1) Tanks must comply with DOT Specification 51 in all respects.

   (2) Materials: SA240 Gr 304

   (3) Water Capacity (US Gallons) 4,760

   (4) Insulation - 0.23 inch (6 mm) carbon steel jacketed vacuum/perlite system.

   (5) Tank Size (inches) - Outside Dia. Length Thickness
        83.34 x 220.23 x 0.378

        Head Thickness - 0.417 (min.)

        Weld Joint Efficiency - 1

        Corrosion Allowance - 0

   (6) Design pressure - 145 psig
Continuation of DOT-E 9916

(8) Openings - One (1) 19.68 inch diameter opening on the top supporting One (1) 6.30 inch diameter opening for the pressure relief device, one (1) 3.15 inch opening for the vapor phase line and one (1) 3.15 inch opening for the liquid phase line.

(9) Tank surface area (square feet) - 428

(10) Pressure relief devices - one (1) 3.15 inch diameter spring loaded safety relief valve set at 145 psig in series with and outboard of one (1) 3.15 inch rupture disc set at 145 psig.

(11) Total emergency venting capacity - 461,476 SCFR

(13) Maximum gross weight (pounds) - 52,910

(14) Maximum commodity weight (pounds) - 34,210

(15) Tare weight (pounds) - 18,700

(16) Design temperature - 50°F

(17) Nitrogen blanket required during transportation.

(18) Maximum loading temperature - 32°F (0°C)

(19) Maximum transport temperature - 50°F (10°C)

8. SPECIAL PROVISIONS.

a. A copy of this exemption must be carried aboard each motor vehicle used to transport packages covered by this exemption.

b. A person who receives packages covered by this exemption may reship them pursuant to the provisions of 49 CFR 173.22a

c. Each tank must (i) be visually inspected prior to shipment to insure that it has not been damaged during loading; and (ii) reinspected and retested once every five years in accordance with 49 CFR 173.32(e) as prescribed for DOT specification 51 portable tanks.

d. Rear end protection for the motor vehicle must be provided which meets the requirements of 49 CFR 178.340~8(b) and 393.86.
e. Each portable tank must be secured to the motor vehicle in conformance with the requirements of 49 CFR 393.100 through 393.106.

f. Each portable tank must be plainly marked on both sides near the middle, in letters at least two inches high on a contrasting background, "DOT-E 9916".

g. A test report documenting a satisfactory prototype test for this tank design must be on file with the OHMT prior to the first shipment.

h. Hydrostatic test certificates for each tank must be maintained by the manufacturer or owner and made available upon request to any representative of the Department of Transportation.

i. Each motor carrier used to transport the packaging covered by this exemption must have a "Satisfactory" safety rating issued by the Office of Motor Carrier Safety Field Operations, Federal Highway Administration.

j. Transportation by rail freight is subject to the provisions of 49 CFR 174.63(b).

9. REPORTING REQUIREMENTS.

a. Shippers who ship under the terms of this exemption shall report any incident involving loss of contents or damage to the tanks described herein to the OHMT as soon as practicable.
