

# Welcome to Hazardous Materials Incident Response Training

The Department of Transportation's Pipeline and Hazardous Materials Safety Administration (PHMSA) mission is to protect people and the environment from the risks of hazardous materials transportation. To do this, we establish national policy, set and enforce standards, educate, and conduct research to prevent incidents. PHMSA has partnered with the Department of Homeland Security's National Fire Academy to provide these Hazardous Materials Incident Response Training modules for first responders and non-responders. These training modules outline the competencies defined in Chapters 4 and 5 of the National Fire Protection Association (NFPA) 472 guidance "Competency of Responders to Haz Mat/WMD Incidents".
