Docket No. PHMSA-2009-0390

Dear Mr. Blount:

On November 17, 2009, Colonial Pipeline Company (Colonial) applied to the Pipeline and Hazardous Materials Safety Administration (PHMSA) for a special permit PHMSA-2009-0390, for relief of pressure testing record keeping requirements. The special permit waives compliance with 49 Code of Federal Regulations 195.310, for the two (2) pipeline special permit segments totaling 74.684 miles of the 40-inch diameter Line 01 Pipeline.

The special permit segments are defined as 64.450 miles of the Line 01 Pipeline located in Acadia, St. Landry, Point Coupee, and West Feliciana Parishes, Louisiana (special permit segment 1) and 10.234 miles of the Line 01 Pipeline located in Fulton, DeKalb, and Gwinnett Counties, Georgia (special permit segment 2).

PHMSA grants this special permit (enclosed) based on a review of Colonial's application letter, supporting attachments, and the required integrity inspections and documentation required by the special permit conditions. The special permit allows Colonial to continue to operate the Line 01 Pipeline at a maximum operating pressure of 574 pounds per square inch gauge (psig) in special permit segment 1 and 743 psig in special permit segment 2. The special permit requires Colonial to comply with certain conditions designed to maintain pipeline safety.

My staff would be pleased to discuss this special permit or any other regulatory matter with Colonial. Ms. Senth White, Director of Engineering and Research Division, may be contacted at 202-366-2415, on matters specific to this special permit.

Sincerely,

Alan K. Mayberry
Associate Administrator for Pipeline Safety

Enclosure: Special Permit – PHMSA-2009-0390
