PHMSA-2008-0067

Re: Modification--Request to Withdraw Special Permit Segments

Dear Mr. Goodwin:

The Pipeline and Hazardous Materials Safety Administration (PHMSA) has reviewed your revised letter of October 19, 2012, in which Texas Gas Transmission, LLC, (TXGT), requested that the following three segments, be removed from the special permit:

1	The Greenville Lateral	a 96.4 miles 36" lateral	Beginning in Greenville, MS and ending near Kosciusko, MS
2	The Kosciusko Pipeline	a 0.8 mile 36" lateral	Located in Attala County, MS, and
3	The Kosciusko/Southern Natural Pipeline	a 0.4 mile 20" lateral	Located in Attala County, MS

PHMSA has no objections to the removal of these segments from PHMSA-2008-0067. Therefore, TXGT must comply with the requirements of Part 192 when operating these segments.

The requirements and conditions of the special permit continue to apply to the Fayette Lateral pipeline segment (a 166.2-mile, 36-inch natural gas transmission pipeline that runs from Conway County, Arkansas, easterly to Coahoma County, Mississippi) listed in the special permit.

My staff would be pleased to discuss this special permit or any other regulatory matter with you. Wayne Lemoi, Director, PHMSA Southern Region, may be contacted at 404-832-1147, for oversight of the implementation and on-going evaluation of this special permit.

Sincerely,

Jeffrey D. Wiese
Associate Administrator for Pipeline Safety
