2020 Hazardous Liquid State Program Evaluation -- CY 2020 Hazardous Liquid

State Agency: Virginia Agency Status:		Rating: 60105(a): Yes	60106(a) . No	Interstate Agent: Yes
Date of Visit: 09/13/2021	- 09/16/2021	00103(<i>a</i>): 103	00100(<i>a</i>): 110	Interstate Agent. 105
Agency Representative:	Scott Marshall, Program Manage	er		
PHMSA Representative:	Agustin Lopez, State Evaluator			
Commission Chairman t	o whom follow up letter is to be	sent:		
Name/Title:	Judith Williams Jagdmann, Chai	r		
Agency:	Virginia State Corporation Com	nission		
Address:	1300 E. Main St.			
City/State/Zip:	Richmond, VA 23219			

INSTRUCTIONS:

Complete this evaluation in accordance with the Evaluator Guidance for conducting state pipeline safety program evaluations. The evaluation should generally reflect state program performance during CY 2020 (not the status of performance at the time of the evaluation). A deficiency in any one part of a multiple-part question should be scored as "Needs Improvement." Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the appropriate notes/comments section. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and they OBJECTIVELY reflect the state's program performance for the question being evaluated. Increasing emphasis is being placed on how the state pipeline safety programs conduct and execute their pipeline safety responsibilities (their performance). This evaluation, together with selected factors reported in the state's annual progress report attachments, provide the basis for determining the state's pipeline safety grant allocation.

Scoring Summary

PARTS	5	Possible Points	Points Scored
А	Progress Report and Program Documentation Review	0	0
В	Program Inspection Procedures	15	14
С	State Qualifications	10	10
D	Program Performance	50	50
Е	Field Inspections	15	15
F	Damage prevention and Annual report analysis	6	6
G	Interstate Agent/Agreement States	0	0
TOTA	LS	96	95
State Rating			99.0

1 Were the following Progress Report Items accurate? (*items not scored on progress Info Only Info Only report)

Info Only = No Points

- a. Stats On Operators Data Progress Report Attachment 1
- b. State Inspection Activity Data Progress Report Attachment 2
- c. List of Operators Data Progress Report Attachment 3*
- d. Incidents/Accidents Data Progress Report Attachment 4*
- e. Stats of Compliance Actions Data Progress Report Attachment 5*
- f. List of Records Kept Data Progress Report Attachment 6 *
- g. Staff and TQ Training Data Progress Report Attachment 7
- h. Compliance with Federal Regulations Data Progress Report Attachment 8
- i. Performance and Damage Prevention Question Data Progress Report
- Attachment 10*

Evaluator Notes:

- a. Reviewed VSCC data and compared with PDM operators. Inspection and operator data are accurate.
- b. Reviewed VSCC data (SQL) to verify inspection days on Attachment 2. Time was also verified thru Time Sheet binder.
- c.Verified operators on Attachment 3 with annual reports in PDM.
- d. There were no reportable incidents in PDM which the VSCC investigated.
- e. Reviewed compliance actions to verify numbers submitted in progress report.
- f. Records kept by the VSCC are listed in Attachment 6.
- g. Verified qualifications with T&Q Blackboard.
- h. The VSCC has automatic adoption of the federal regulations.
- i. The VSCC has documented planned performance and accomplishments.

Total points scored for this section: 0 Total possible points for this section: 0

- Do written procedures address pre-inspection, inspection and post inspection activities 1 5 for each of the following inspection types: Chapter 5.1 Yes = 5 No = 0 Needs Improvement = 1-4
 - Standard Inspections, which include Drug/Alcohol, CRM and Public a.
 - Awareness Effectiveness Inspections
 - **IMP** Inspections b.
 - **OO** Inspections c.
 - Damage Prevention Inspections d.
 - **On-Site Operator Training** e.
 - f. Construction Inspections (annual efforts)

Evaluator Notes:

Section 5, of the State Program Procedures, page 18, describes all Pre-inspection, inspection and post inspection guidelines.

Maximum intervals for standard inspections pg. 20

Section 5.B details procedures for conducting an inspection

Pre-inspection Inspection Post-inspection

Do written procedures address inspection priorities of each operator, and if necessary 2 each unit, based on the following elements and time frames established in its procedures? Chapter 5.1

4

4

- Yes = 4 No = 0 Needs Improvement = 1-3
 - Length of time since last inspection a.
 - Operating history of operator/unit and/or location (includes leakage, incident b.
 - and compliance activities)
 - Type of activity being undertaken by operators (i.e. construction) c
 - Locations of operator's inspection units being inspected (HCA's, Geographic d.
 - area, Population Centers, etc.)
 - Process to identify high-risk inspection units that includes all threats e.
 - (Excavation Damage, Corrosion, Natural Forces, Outside Forces, Material and Welds,
 - Equipment, Operators and any Other Factors)
 - f. Are inspection units broken down appropriately?

Evaluator Notes:

The VA SCC utilizes a risk model which contemplates numerous operator data points, including but not limited to miles of pipe by facility type, material, numbers of services, performance factors including leak rates, outside force, earth movement, etc. For a full list the risk model and its logic are described in detail Section 5.A "Annual Risk-Based Inspection Schedule" on Page 22 of the State's program procedures.

Section 5.B of the URS Procedures, page 27, describes all Pre-inspection, inspection and post inspection guidelines, which are utilized for inspection prioritization scheduling.

-Appendix No. 4 10-Year Inspection Plan pages 81

-Section E, Design Testing and Construction Pg. 35

- LCP lists available for review in PIPES and SP
- Daily Location Sheets- available in Microsoft Outlook Pipeline Safety Folder and Operator SharePoint sites
- Inspection Units are managed in PIPES and can be queried by PowerBi
- Division Inspection Risk Model
- PHMSA Interstate Inspection Agreements? Inspection Units are reviewed annually
- 2 3 (Compliance Procedures) Does the state have written procedures to identify steps to be 3 taken from the discovery to resolution of a probable violation? Chapter 5.1 Yes = 3 No = 0 Needs Improvement = 1-2

a.

Procedures to notify an operator (company officer) when a noncompliance is identified

b. Procedures to routinely review progress of compliance actions to prevent delays or breakdowns

c. Procedures regarding closing outstanding probable violations

Evaluator Notes:

State Program Procedures, Section 5.B.5 "Post-Inspection Actives" Pgs. 31, the Division has weekly and month SQL Db canned reports showing open inspections, open investigations, etc. to assist in the management team tracking the progress of inspection/investigation work production. Appendix No. 5 of the State Program Procedures. Additionally, Enforcement utilizes SharePoint to track when Investigations and finalized and approved by the PM to OGC to process for enforcement.

Additionally, the canned reports show if a Notice of Investigation has been generated within the timeframe for compliance with the 2016 PIPES Act. Additionally, the state program enforcement procedures are listed in the Program Procedures Appendix No. 6. See Open Investigation Canned Report in Microsoft Outlook

The VA SCC Pipeline Safety Enforcement Procedures do not include a brief description of enforcement proceedings and when each type will be recommended as required per State Guidelines section 5.1(5). The VA SCC must amend their procedures to include description of each type of enforcement proceedings, such as Notice of Probable Violation, Warning Letter, Letter of Concern, and Notice of Amendment and a recommendation of when each type should be issued.

The VA SCC State Program Procedures do not include time limits for processing probable compliance/enforcement actions as required per State Guidelines section 5.1(3)(c). The VA SCC needs to amend their procedures to include time limits for processing compliance cases.

There was a one point deduction for compliance procedures issues.

4 (Incident/Accident Investigations) Does the state have written procedures to address state 3 3 actions in the event of an incident/accident? Yes = 3 No = 0 Needs Improvement = 1-2

a. Mechanism to receive, record, and respond to operator reports of incidents, including after-hours reports

b. If onsite investigation was not made, do procedures require on-call staff to

obtain sufficient information to determine the facts to support the decision not to go on-site.

Evaluator Notes:

Section Q- Discusses State Program On-Call Process, Pg. 57

Appendix No. 7, Section VI (E). "DOT-NTSB Memorandum of Understanding ("MOU")", Pg. 103

Appendix No 7, Section VI (A) to (D) details the cooperative investigating efforts, pg. 101

Section 7, VII, SCC Response to Incidents and Accidents, details follow up actions necessary to obtain additional information if a response is not necessary or unable (manpower) to occur. Pg. 107

5 General Comments: Info Only = No Points Info Only Info Only

Evaluator Notes:

Issues identified:

B.3-The VA SCC State Program Procedures do not include time limits for processing probable compliance/enforcement actions as required per State Guidelines section 5.1(3)(c). The VA SCC needs to amend their procedures to include time limits for processing compliance cases.

The VA SCC Pipeline Safety Enforcement Procedures do not include a brief description of enforcement proceedings and when each type will be recommended as required per State Guidelines section 5.1(5). The VA SCC must amend their procedures to include description of each type of enforcement proceedings, such as Notice of Probable Violation, Warning Letter, Letter of Concern, and Notice of Amendment and a recommendation of when each type should be issued.

There was a one point deduction for compliance procedures issues.

Did state inspect all types of operators and inspection units in accordance with time

The VA SCC performed GT and HL IM program inspections in accordance with Section I of the program's procedures.

this repa be in	Intionally, the Program Manager requests annually information from each transmission operator request is for all planned IMP activities, ILI launches, integrity digs, direct examinations, plar irs. Projected work is tracked by the Program Manager in the shared TIMP@scc.virginia.gov nspected by qualified Staff. staff becomes aware of IM activities, conditions, or examinations these are added on an adhoc	nned repla calendar a	cements, and/or
5	Did the state review the following (these items are NTSB recommendations to PHMSA that have been deemed acceptable response based on PHMSA reviewing these items during the evaluation process): Chapter 5.1 Yes = 2 No = 0 Needs Improvement = 1 a. Operator records of previous accidents and failures including reported third-party damage and leak response to ensure appropriate operator response as required by 195.402; and b. Directional drilling/boring procedures of each pipeline operator or its contractor to determine if they include actions to protect their facilities from the dangers posed by drilling and other trench less technologies;	2	2
	VA SCC performs NTSB Supplemental Question Sets annually of each operator per Section sedures.	5 of the p	rograms
6	Did the State verify Operators took appropriate action regarding advisory bulletins issued since the last evaluation? (Advisory Bulletins Current Year) Yes = $1 \text{ No} = 0 \text{ Needs Improvement} = .5$	1	1
	or Notes: VA SCC asks applicable ADBs to each operator during standard inspections per Section 5 of n new ADBs are issued they are shared through URS Safety Alert Emails.	the proce	dures, in addition,
T	 (Compliance Activities) Did the state follow compliance procedures (from discovery to resolution) and adequately document all probable violations, including what resolution or further course of action is needed to gain compliance? Chapter 5.1 Yes = 10 No = 0 Needs Improvement = 1-9 a. Were compliance actions sent to company officer or manager/board member if municipal/government system? b. Were probable violations documented properly? c. Resolve probable violations d. Routinely review progress of probable violations e. Did state issue compliance actions for all probable violations discovered? f. Can state demonstrate fining authority for pipeline safety violations? g. Does Program Manager review, approve and monitor all compliance actions? (note: Program Manager or Senior Official should sign any NOPV or related enforcement action) h. Did state compliance actions give reasonable due process to all parties? Including "show cause" hearing, if necessary. i. Within 30 days, conduct a post-inspection briefing with the owner or operator outlining any concerns j. Within 90 days, to the extent practicable, provide the owner or operator with written preliminary findings of the inspection. (Incident investigations do not need to meet 30/90-day requirement) 	10	10
State	or Notes: e Program Procedures, Section 5.B.5 "Post-Inspection Actives" Pgs. 31 defines the appropriate owing the inspection phase and into the investigation phase.	e follow u	p actions
The	state program has weekly, monthly, and on demand SQL Db canned reports from its PIPES re	eporting s	oftware. These

reports amongst other things, show open inspections, open investigations, etc. to assist in the management team tracking the progress of inspection/investigation work production.

Additionally, canned reports show if a Notice of Investigation has been generated within the timeframe for compliance with the 2016 PIPES Act. See Open Investigation Canned Report

State Program Procedures Appendix No. 6. Specifies the state program enforcement procedures

Progress of probable violations are routinely reviewed through canned reported distributed to Staff and management. Further, the Division's SharePoint Site tracks the compliance/enforcement actions for the enforcement team. Updates on enforcement are provided to the Program Manager from OGC and the enforcement analyst. Updates are also provided to the pipeline safety team during the regular staff meetings.

(Accident Investigations) Were all federally reportable incidents investigated, thoroughly 8 10 10 documented, with conclusions and recommendations? Yes = 10 No = 0 Needs Improvement = 1-9 Does state have adequate mechanism to receive and respond to operator reports a. of incidents, including after-hours reports? b. Did state keep adequate records of Incident/Accident notifications received? c. If onsite investigation was not made, did the state obtain sufficient information from the operator and/or by means to determine the facts to support the decision not to go on site? Were onsite observations documented? d. Were contributing factors documented? e. f. Were recommendations to prevent recurrences, where appropriate, documented? Did state initiate compliance action for any violations found during any g. incident/accident investigation? Did state assist Region Office or Accident Investigation Division (AID) by h. taking appropriate follow-up actions related to the operator incident reports to ensure accuracy and final report has been received by PHMSA? Does state share any lessons learned from incidents/accidents? i. Evaluator Notes: There were no HL Reportable Incidents in 2020 but the State Program has procedures for investigating accidents and incidents as applicable to GT/HL and significant events that do not meet federal reporting criteria: Section Q- Discusses State Program On-Call Process, Pg. 57 Appendix No. 7, Section VI (E). "DOT-NTSB Memorandum of Understanding ("MOU")", Pg. 103 Appendix No 7, Section VI (A) to (D) details the cooperative investigating efforts, pg. 101 Section 7, VII, SCC Response to Incidents and Accidents, details follow up actions necessary to obtain additional information if a response is not necessary or unable (manpower) to occur. Pg. 107. 9 Did state respond to Chairman's letter on previous evaluation within 60 days and correct 1 1 or address any noted deficiencies? (If necessary) Chapter 8.1 Yes = 1 No = 0 Needs Improvement = .5 Evaluator Notes: No response was necessary 10 Did State conduct or participate in pipeline safety training session or seminar in Past 3 Info Only Info Only Years? Chapter 8.5 Info Only = No Points

Evaluator Notes:

Staff conducted a virtual pipeline safety training session on October 21, 2021 due to the COVID-19 pandemic. It was attended by 160 operator representatives, PHMSA, and other stakeholders. Topics included the NTSB report on the Silver Spring, Maryland explosion, PHMSA and State responses, a presentation from the Virginia State Police Fusion center on eco-terrorism targeting pipelines, cyber security, and the anti-pipeline movement, the new Gas Implementation Rule, and other topics.

 11
 Has state confirmed transmission operators have submitted information into NPMS
 Info Only Info Only Info Only

 database along with changes made after original submission?
 Info Only = No Points
 Info Only

Evaluator Notes:

Staff reviews NPMS Data of all operators during standard inspections and review of annual reports for mileage changes. In addition, Staff utilizes NPMS data during accident and incident response in coordination with PHMSA AID. During this year Staff has not noted any inconsistences or major changes to NPMS since the addition of the VNG Southside Connector Project in June 6, 2019. Staff did discover a segment of non-reported interstate pipeline operated by TransCanada providing service to the intrastate power generation facility which operates a short segment of intrastate metering and regulation. This was reported to PHMSA ER who worked with TransCanada to correct.

Does the state have a mechanism for communicating with stakeholders - other than state 1
 pipeline safety seminar? (This should include making enforcement cases available to public).
 Yes = 1 No = 0 Needs Improvement = .5

Evaluator Notes:

The State has the following mechanisms for communicating with stakeholders, other than state pipeline safety seminar-Division Pipeline Safety Newsletter, e-mail alerts, state website, executive meetings, operator trainings upon request, SCC/ LDC meeting, etc

 13
 Did state execute appropriate follow-up actions to Safety Related Condition (SRC)

18 Discussion on State Program Performance Metrics found on Stakeholder Communication Info Only Info Only site.\ http://primis.phmsa.dot.gov/comm/states.htm?nocache=4805 Info Only = No Points

Evaluator Notes:

The State Program Performance Metrics are reviewed regularly by the Program Manager and Program Personnel. Additionally, the program metrics are also reproduced and published on the Program's website and updated late in the year following completed and supplemental annual reports are received by PHMSA and additional information from intrastate operators.

19 Did the state encourage and promote operator implementation of Pipeline Safety Info Only Info Only Management Systems (PSMS), or API RP 1173? This holistic approach to improving pipeline safety includes the identification, prevention and remediation of safety hazards. Info Only = No Points

- a. https://pipelinesms.org/
- b. Reference AGA recommendation to members May 20, 2019

Evaluator Notes:

The State Program was the first state to place Operators under Order to require PSMS in 2016, including the assessment of PSMS Gap Analysis.

VA SCC staff performed inspections of these PSMS programs in 2017 and 2019. A next round of reviews are tentatively planned in 2022.

VA SCC staff track the PSMS implications of non-compliances during investigations, including toleration of System resources, compliancy, normalization of deviance, and other SMS factors.

20 General Comments: Info Only = No Points Info Only Info Only

Evaluator Notes:

The VA SCC is mainly complying with Part D of the Evaluation.

 - a. No unsafe acts should be performed during inspection by the state inspector
 - b. What did the inspector observe in the field? (Narrative description of field observations and how inspector performed)

c. Best Practices to Share with Other States - (Field - could be from operator visited or state inspector practices)

d. Other

Evaluator Notes:

The inspection was performed in a safe, positive, and constructive manner. The inspector observed contractor measure metal loss of pipe wall, cathodic reading, PH soil resistivity test, and horizontal weld of split sleeve.

7 General Comments:

Info Only = No Points

Evaluator Notes:

There were no issues identified in Part E of the evaluation.

Info Only Info Only

Total points scored for this section: 15 Total possible points for this section: 15 Has the state reviewed Operator Annual reports, along with Incident/Accident reports, for 2 accuracy and analyzed data for trends and operator issues.
 Yes = 2 No = 0 Needs Improvement = 1

Evaluator Notes:

The State program reviews the annual DOT reports of operators during the annual information request approximately March of each year. This is reviewed for trends and comparisons to other operators and the State Program's damage data trends. When conducting applicable inspections such as F1, F2, IM program inspections, etc. Division damage data and both internal and operator annual reports are reviewed Via PDM or via local copies submitted to the State Program. Annual report data is also supplied as a weighted variable in the Division's risk model.

2 Has the state verified that the operators analyze excavation damages for the purpose of determining root causes and minimizing the possibility of a recurrence? (192.617) Has the state verified that the operators have appropriately identified excavators who have repeatedly violated one-call laws and damaged their facilities. Have the operators taken steps to mitigate that risks? (192.1007) Yes = 2 No = 0 Needs Improvement = 1

Evaluator Notes:

Each and every pipeline operator is under Commission Order to report all pipeline damages and Disturbances to the State Program under URS-2020-00439.

"In order to further implement the Commission's enforcement authority under the Act, the Commission hereby orders that, effective January 1, 2021, Virginia jurisdictional gas and hazardous liquid operators shall report to the Commission all probable violations of the Act, 2 and any incident involving damage, dislocation, or disturbance of any gas or hazardous liquid pipeline on the Commission's DPA-1 Incident Report Form Revised December 2020 ("DPA-1")."

Each submitted DPA requires supporting evidence including picture, photographs, sketches, and the operator's failure investigation. Should there be issues with the failure investigation or supporting documentation, pipeline safety inspectors are forwarded the issue for inspection/investigation. If probable violations are discovered action is taken under the applicable damage prevention, failure investigations, or procedural citations under the pipeline safety code sections.

- 3 Has the state reviewed the operator's annual report pertaining to Part D - Excavation Info Only Info Only Damage? Info Only = No Points Is the information complete and accurate with root cause numbers? a. Has the state evaluated the causes for the damages listed under "One-Call b. Notification Practices Not Sufficient" (Part D.1.a.)? Has the state evaluated the causes for the damages listed under "Locating c. Practices Not Sufficient" (Part D.1.b)? For each operator, does the state review the following? Is the operator or its locating contractor(s) qualified and following written d. procedures for locating and marking facilities? Is the operator appropriately requalifying locators to address performance e. deficiencies? f. What is the number of damages resulting from mismarks? What is the number of damages resulting from not locating within time g. requirements (no-shows)? Is the operator appropriately addressing discovered mapping errors resulting in h. excavation damages? Are mapping corrections timely and according to written procedures? i. Has the state evaluated the causes for the damages listed under "Excavation j. Practices Not Sufficient" (Part D.1.c.)? Evaluator Notes: The State program reviews the annual DOT reports of operators during the annual information request approximately March of each year. This is reviewed for trends and comparisons to other operators and the State Program's damage data trends.
 - When conducting applicable inspections such as F1, F2, IM program inspections, etc. Division damage data and both internal and operator annual reports are reviewed Via PDM or via local copies submitted to the State Program.

2

Annual report data is also supplied as a weighted variable in the Division's risk model.

The state program reviews annual report data long with more detailed and aggregate state data on damages for trends. Power BI queries on damage cause, damage root cause, work done for, locating, geographical area, etc.

Based on a review of annual reports and state program data, two operators, Columbia Gas of Virginia and Washington Gas Light Co. have an upward trend in "operator failures" per the State Programs damage data. A meeting has occurred in 2021 based on their upward trend. This includes locate failures and mapping. During a further review staff identified locate failures of their shared contract locator. An action plan by the operators and a follow up review is ongoing at the time of this audit.

4	Has the agency or another organization within the state collected data and evaluated	2	2
	trends on the number of pipeline damages per 1,000 locate requests?		
	Yes = 2 No = 0 Needs Improvement = 1		
	a. What stakeholder group is causing the highest number of damages to the		
	pipelines? Operator, contractor, locating company or public.b. Has the state verified the operator is appropriately focusing damage prevention		
	education and training to stakeholders causing the most damages?c. Has the state evaluated which of the following best describes the reason for the		
	excavation damages; i.e., operator or contractor not following written procedures,		
	failure to maintain marks, failure to support exposed facilities, failure to use hand		
	tools were required, failure to test-hole (pot hole), improper backfilling practices,		
	failure to maintain clearance or insufficient excavation practices.d. Has the state verified the operator is appropriately focusing damage prevention		
	education and training to address the causes of excavation damages?		
Evaluator	Notes:		
The s	tate program reviews annual report data long with more detailed and aggregate state data on	damages f	for trends. See

Power BI queries on damage cause, damage root cause, work done for, locating, geographical area, etc.
