Houston, TX 77046

Docket No. PHMSA-2008-0158

Dear Mr. Rizk:

On May 14, 2019, Texas Gas Transmission LLC (TXGT) requested the Pipeline and Hazardous Materials Safety Administration (PHMSA) to extend the segments in special permit PHMSA-2008-0158 by 1,123 feet, and 1,145 feet respectively for the TXGT's 20-inch diameter pipeline EUT Line 20-1 and the 26-inch diameter pipeline EUT 26-1. This existing special permit waives compliance from the 49 Code of Federal Regulations (CFR) 192.611(a) for two (2) natural gas transmission pipelines located in Iberia Parish, Louisiana. 49 CFR 192.611(a) requires natural gas pipeline operators to confirm or revise the maximum allowable operating pressure of a pipeline segment after a change in class location.

After reviewing your application materials, the technical and safety issues involved, and the performance of TXGT under the special permit, PHMSA is granting your request for an extension of the special permit segments, provided the special permit conditions are met.

My staff would be pleased to discuss this matter or any other regulatory matter with you. Senth White, Director of PHMSA Engineering and Research Division, may be contacted at 202-366-2415, on technical matters specific to this special permit segment extension. James Urisko, Director of PHMSA Southern Region, may be contacted at 404-832-1150, on operational matters specific to this special permit segment extension.

Sincerely,

Alan K. Mayberry
Associate Administrator for Pipeline Safety

Enclosure: Special Permit – PHMSA-2008-0158
