

Appointee Bios

Captain Bob Brown, Coalition of Airline Pilots Associations

Captain Brown currently serves as the Vice President of the Coalition of Airline Pilots Associations. He is also a Boeing 757/767 Captain at UPS Airlines and a member of the Independent Pilots Association (IPA). Captain Brown most recently served as Chair of the IPA Safety Task Force, which led to the development a third-party validation process for transporting batteries on aircraft. These efforts have led to speaking opportunities in the United States, Canada, Europe, China, and Japan. He has also conducted briefings for House and Senate staff and members of Congress on this safety initiative. Other government roles include participation on the Aviation Safety Information Analysis and Sharing FAA ARC, the High Energy Fire Training Enhancements working group, and the Commercial Aviation Safety Team. He has also served as IPA Communication Chairman, Safety Chairman, Director of Airline Safety & Training, and IPA Executive Board Vice President. He serves on the Advisory Board for Opals Dream Foundation, a charity he helped form in 2011. Captain Brown holds a BA degree in Communication from the University of Wisconsin, Milwaukee.

Douglas Carr, National Business Aviation Association (NBAA)

Mr. Carr is NBAA's senior vice president of safety, security, sustainability and international operations. He is responsible for leading the association's broad regulatory and policy agenda affecting business aviation safety, security, sustainability and aircraft operations in the United States and around the globe. Mr. Carr has led or participated aviation rulemaking and policy efforts, including the FAA's Fractional Ownership Aviation Rulemaking Committee (FOARC).

James Davis, AccuFleet Testing

Mr. Davis is the President of AccuFleet Testing and CEO of AccuFleet International. Mr. Davis has been involved in aviation and aviation safety testing since 1986. He is a Federal Aviation Administration (FAA) Designated Engineering Representative, and is an Engineering Unit Member for several aircraft manufacturers and modifiers which hold FAA Organizational Designation Authority. Mr. Davis has one of the few facilities actively testing lithium battery packaging for shipping by both air and ground. He has executive level leadership and technical expertise in the areas of lithium battery testing, packaging testing, air cargo safety, and development of aviation safety standards. Mr. Davis also oversees an active ground handling operation, which includes the loading of cargo into international passenger and cargo aircraft. In this role, he has responsibility for Dangerous Goods compliance. He received his Bachelor of Science degree in Electrical Engineering from Rice University, and a Master of Science degree in Operations Research and MBA from the Southern Methodist University.

Raju Desai, Apple

Mr. Desai serves as Senior Product Safety Engineer for Apple Inc. He is involved with the development of numerous product safety standards and global regulations where he focuses on safety issues regarding lithium batteries and cells including requirements for global certification, hazards of thermal runaway, field failures, and safe battery/cell transportation.

Mr. Desai has developed new requirements for the standard for secondary lithium batteries and cells, standardizing a test method to induce thermal runaways and also a packaging standard for the safe air transportation of lithium batteries and cells. Previously, he worked for Cisco Systems in hardware and software safety and product reliability development. His work resulted in an innovative design to protect telecommunication devices from lightning strikes and electrical surges to developing a green protocol for routing information to control lighting and power consumption. Mr. Desai received his Bachelor of Science degree in Electrical Engineering and a minor in Mathematics from San José State University

Doug Ferguson, Boeing

Mr. Ferguson serves as an Associate Technical Fellow for Boeing. He is a member of the Boeing Working Group addressing issues related to the carriage of lithium batteries as cargo, and co- chair of the Society of Automotive Engineers (SAE) G-27 committee. Mr. Ferguson has supported International Civil Aviation Organization (ICAO) Panels, and co-authored and presented the International Coordinating Council of Aerospace Industries Associations (ICCAIA) Working Paper to the ICAO Dangerous Goods Panel (DGP). He is currently ICCAIA's panel member to the ICAO DGP, and is also supporting the Airworthiness Panel to provide recommendations for proposed wording changes to the aircraft cargo fire suppression requirements. Prior to this, Mr. Ferguson was a member of the Commercial Aviation Safety Team SE-126 Working Group tasked with identifying strategies to mitigate the hazards of carrying dangerous goods, particularly lithium batteries. He actively supported the National Transportation Safety Board investigations of the 747-400F UPS and Asiana accidents resulting from in-flight cargo fires involving lithium batteries. Since 1998, Mr. Ferguson has been an active participant in the International Aircraft Systems Fire Protection Working Group and is part of the ICCAIA Cargo Compartment Halon Replacement Working Group. Mr. Ferguson holds a Bachelor of Science degree in Physics from the University of Puget Sound and Bachelor of Science degree in Electrical Engineering from Columbia University.

Linda Gabor, Call2Recycle

Ms. Gabor is Executive Vice President of External Relations for Call2Recycle, the country's premier battery stewardship, logistics, and recycling program. She provides strategic marketing and communications direction to help advance the organization's commitment to environmental excellence and safe battery handling and management.

George Kerchner, The Rechargeable Battery Association

Mr. Kerchner serves as the Executive Director of The Rechargeable Battery Association (PRBA). He represents PRBA and its members on issues associated with the safe manufacturing, handling, transport, storage, recycling, and disposal of lithium batteries. He also represents PRBA at international transportation forums such as the United Nations Subcommittee of Experts on the Transport of Dangerous Goods, I2CAO DGP, and the International Maritime Organization. Mr. Kerchner also works as a Senior Regulatory Analyst with the law firm of Wiley Rein LLP. He also provides dangerous goods consulting services and regularly conducts training programs and audits for shippers of lithium batteries and other dangerous goods. Mr. Kerchner has a Master's degree in Environmental Science and Policy from John Hopkins University and a Bachelor of Arts degree from the University of Maryland.

Jennifer Littenberg, Hawaiian Airlines

Ms. Littenberg currently serves as Manager, Environmental and Dangerous Goods Compliance, for Hawaiian Airlines, Inc. She has more than 19 years of planning, engineering, project management, quality control, and leadership experience dealing with a variety of environmental, transportation, facility, health, and safety related matters. Before joining Hawaiian Airlines, she worked with the Naval Facilities Command Hawaii as an Environmental Engineer. She holds a Bachelor's of Science in Chemical Engineering from Colorado State University.

Todd Mackintosh, General Motors

Mr. Mackintosh is a Technical Specialist for Electrification Standards & Regulations at General Motors. He has held various engineering positions covering manufacturing, product development, standards, and regulations. Mr. Mackintosh currently chairs the SAE Battery Transportation Committee and SAE Hybrid and Electric Vehicle Recommendations for First and Second Responders Task Force. He is also a member of the SAE G-27 Committee, and an expert for International Organization for Standardization TC22/SC36/WG7 developing standards for emergency response guides and propulsion identification. Mr. Mackintosh actively participates at the United Nations (UN) Informal Working Group on Lithium Batteries, and served as Director for PRBA since 2011. Mr. Mackintosh has been granted six patents and has been awarded General Motors' highest award for technical achievement, the Boss Kettering Award. SAE has recognized Mr. Mackintosh with the James M. Crawford Technical Standards Board Outstanding Achievement. Mr. Mackintosh received a Bachelor of Science degree in Manufacturing Engineering from Miami University and holds a Master of Energy Systems Engineering degree from University of Michigan.

Brandon Martin, Outdoor Power Equipment Institute

Mr. Martin serves as Director of Battery and Electronic Products for the Outdoor Power Equipment Institute. He is responsible for standard and regulatory initiatives that affect the industry, focusing on battery and electric product fields. Mr. Martin has lead committee activities around battery transportation and safety and is primarily responsible for any extended producer responsibilities around battery recycling throughout the United States and Canada. He has over 12 years of experience with product development and management of gas/battery/electric consumer and commercial, as well as robotic products, and utility task vehicle in the outdoor power equipment industry. Mr. Martin holds a Bachelor of Science degree in Business Administration from the University of North Carolina.

Robert McClelland, UPS Airlines

Mr. McClelland is the Managing Director of Airline Safety, Compliance and Dangerous Goods for UPS Airlines. Prior to that, he had served as Acting Director of Airline Safety and led the Air Region Compliance group. Mr. McClelland is responsible for the FAA-approved program to include oversight of dangerous goods training and the Airline's compliance with both U.S. and international regulations. He has participated as a speaker in International Air Transport Association (IATA) Lithium Battery Workshops and World Cargo Symposiums. Mr. McClelland has attended and presented at several ICAO DGP meetings, focusing on lithium battery risk mitigation strategies. Additionally, Mr. McClelland presented on behalf of UPS Airlines safety initiatives in multiple forums, including the Chinese Ministry of Transport in Beijing and the Underwriters Laboratory Safety Symposium in Tokyo. He serves

as a member for Underwriter Laboratory's newly founded Board of Aviation Advisors. Mr. McClelland holds a Bachelor of Business Administration degree from the University of Houston.

Dinkar Mokadam, Association of Flight Attendants-CWA

Mr. Mokadam is a safety, health and security researcher for the Association of Flight Attendants-CWA, AFL-CIO (AFA), which represents nearly 50,000 Flight Attendants at 17 airlines and partners with the 700,000-member strong Communications Workers of America (CWA), AFL-CIO. As a member of the FAA Air Carrier Training Aviation Rulemaking Committee, Mr. Mokadam has contributed to the development of numerous safety and training recommendations, including several published by the High Energy Fire Training Enhancement working group. Mr. Mokadam has also been a member of two other committees that have addressed Lithium battery safety, the FAA Portable Electronic Devices ARC and RTCA Special Committee 202 Portable Electronic Devices. Mr. Mokadam received a Bachelor of Science degree in Aeronautical and Astronautical Engineering from the University of Illinois and holds Master of Science degrees in Aeronautics and Astronautics from MIT and Public Health from Tulane University.

Kathleen O'Shei, Integer

Ms. O'Shei serves as the Director of Environmental, Health, Safety, and Security for Integer Holdings. Integer comprises Greatbatch Medical, Electrochem Solutions, and Lake Region Medical. For over 16 years, Ms. O'Shei has overseen Integer's environmental, health, safety, security, and dangerous goods compliance manufacturing facilities world-wide with nearly 9,000 associates. She is currently Integer's subject matter expert on lithium battery transportation compliance. She is on the Board of Directors of the Medical Device Battery Transport Council (MDBTC), a member of the PRBA Transportation Committee, and a member of the SAE G-27 Committee. Ms. O'Shei has also participated in ICAO DGP meetings as a member of PRBA and/or MDBTC. Ms. O'Shei holds a Bachelor of Science degree in Chemical Engineering from the State University of New York.

Marianna Patterson, Amazon

Mrs. Patterson joined Amazon's Public Policy Team in October 2017 and is currently a Senior Manager leading the postal and Dangerous Goods (DG) government affairs team. She is intimately involved in Amazon's DG operations and has worked on various lithium battery regulatory issues. Marianna has also worked on several initiatives to proactively promote DG industry safety and compliance, including collaborating with FAA to promote its Safe Cargo campaign and with PHSMA to highlight its Check the Box initiative to Amazon's sellers and shippers. Mrs. Patterson leads Amazon's engagement with DOT and various DG trade associations. Prior to joining Amazon, Mrs. Patterson served as a senior staffer on Capitol Hill handling various postal and transportation issues. Mrs. Patterson holds a Juris Doctorate from American University Washington College of Law, a Master of Science in Public Policy from DePaul University, and a Bachelor of the Arts in Political Science from Saint Xavier University.

William Reese, Commercial Vehicle Safety Alliance

Mr. Reese serves as Director of Hazardous Materials Programs for the Commercial Vehicle Safety Alliance (CVSA). He is a former Level I and Level VI inspector and was a Major and Operations Commander for the Idaho State Police, before joining CVSA. From 2014–2015 he served as CVSA President and has also held other CVSA leadership positions. He served as an associate staff member at the Federal Motor Carrier Safety Administration, National Training Center, from 1995 through 2003. He served on the Hazardous Materials Cooperative Research Program oversight panel, and is an adjunct instructor for the Idaho State University Institute of Emergency Management, College of Western Idaho Law Enforcement Program, Texas A&M University Texas Engineering Extension Service, and the Idaho Office of Emergency Management. Mr. Reese is a graduate of the College of Southern Idaho Law Enforcement Program, Northwestern University School of Police Staff and Command, and the FBI National Academy.

Stephane Rossetti, Medtronic

Mr. Rossetti is the Senior Program Manager of International Trade & Dangerous Goods Compliance for Medtronic. In this role, Mr. Rossetti leads Medtronic’s lithium battery activities at the manufacturing facility. He has over twenty years of experience in supply chain and logistics with focus on dangerous goods and trade compliance. Mr. Rossetti is the Chairman of the Technical Sub-Committee at the Medical Device Battery Transport Council, a coalition of medical device manufacturers dedicated to enhancing transportation safety. He is a participating and voting member of the SAE G-27 Group currently working on the development of new performance-based packaging standards for transporting lithium batteries by air. He is also involved at the UN Working Group for the Lithium Battery Classification.

Scott Schwartz, Air Line Pilots Association

Captain Scott Schwartz serves as Director of the Dangerous Goods Program at the Air Line Pilots Association (ALPA), and is a full-time MD-11 captain and line check airman flying and instructing worldwide with FedEx Express. Captain Schwartz serves as chairman of the International Federation of Air Line Pilots’ Associations Dangerous Goods Committee, and as a member of the ICAO DGP. He is responsible for representing both the North American and worldwide pilot communities at various regulatory and industrial venues. Captain Schwartz has provided insight to working groups of the ICAO Flight Operations and Airworthiness Panels, and multidisciplinary ICAO working groups. Captain Schwartz has also participated in aircraft accident and incident investigations as a trained aircraft accident investigator. Captain Schwartz holds a Bachelor of Science degree in Chemical Engineering from the Massachusetts Institute of Technology and PhD in Chemical Engineering from the University of Minnesota.

Tim Sheppard, Samsung Electronics America

Mr. Sheppard is the Vice President of Supply Chain and Logistics for Samsung Electronics America. In this capacity, he oversees the mobile supply chain for Samsung Electronics in the United States. He is responsible for the importation, warehousing, and distribution of all mobile products in the United States. Mr. Sheppard led Samsung’s U.S. Note 7 recall, achieving a recovery rate of 97%. Prior to his role at Samsung, he was controller of Best

Merchant Partners, a venture capital company specializing in education in the U.S. and Latin America. Mr. Sheppard holds a Bachelor of Engineering degree from Imperial College and a Master's degree in Business Administration from the Edinburgh Business School.

Philip Squair, National Electrical Manufacturers Association

Mr. Squair serves as Vice President of Government Relations for the National Electrical Manufacturers Association. Mr. Squair leads the Association's team of advocacy professionals dedicated to achieving the industry's policy objectives at all levels of government. Formerly with the National Propane Gas Association (NPGA), Mr. Squair's efforts resulted in the enactment of several federal laws. Prior to joining the NPGA, Mr. Squair directed governmental affairs activities for the Air-Conditioning, Heating, and Refrigeration Institute, and served on the legislative and campaign staffs of U.S. Representatives Bill McCollum (R-FL) and Don Ritter (R-PA). Mr. Squair holds a Bachelor of Arts degree in Political Economics and History from Hillsdale College.

Michael Tobin, Alaska Airlines

Mr. Tobin serves as Dangerous Goods Manager of Alaska Airlines. He has the responsibility for all aspects of the regulations and safety risks pertaining to hazardous materials, including lithium batteries in air transportation. Further, Mr. Tobin is a voting member of the SAE G-27, and UL Standards Technical Panel. Mr. Tobin served on the PHMSA-FAA hazmat Aviation Rulemaking Committee for Passenger Notification of Hazardous Materials Regulations. He holds a Bachelor of Business Administration degree from the University of Portland.

Veronica Wilson, Walmart

Ms. Wilson is currently Director of Hazardous Materials Transportation for Walmart, Inc. During her 15-year tenure, her responsibilities have expanded to include forward and reverse logistics transportation for Walmart Inc., Sam's Club, and eCommerce. Ms. Wilson is also responsible for designing and delivering course content for multi-modal hazardous material transportation. In 2005, Ms. Wilson was integral in on-boarding a third-party chemical assessment review process. This process extracts critical transportation and disposal information to ensure compliant transportation and disposal. Ms. Wilson is on the Board of Directors for the Council on Safe Transportation of Hazardous Articles (COSTHA) and is Lead Chair of the COSTHA eCommerce Working Group. She is certified in the Department of Transportation (DOT), IATA, International Maritime Dangerous Goods Code (IMDG), and Resource Conservation and Recovery Act regulatory compliance and is a licensed pyrotechnician.

David Wroth, Underwriters Laboratories

Mr. David Wroth is the Director of Data Science for UL Standards and Engagement, leading initiatives to provide high quality data, analyses, and applications to improve safety around the world. He leads a team of data scientists who compile global safety data and support the research, standards and engagement activities of Underwriters Laboratories. To support aviation safety, Mr. Wroth led the team that created a lithium battery incident surveillance system (TRIP), gathering real-world data from airlines regarding thermal runaway incidents.
