SUPPLEMENTARY INFORMATION: PHMSA received a special permit request on June 22, 2022, from TCO, a subsidiary of TC Energy, Inc., seeking a waiver for two (2) pipeline segments from the requirements of 49 CFR 192.611(a) and (d): Change in class location: Confirmation or revision of maximum allowable operating pressure, and 49 CFR 192.619(a): Maximum allowable operating pressure: Steel or plastic

pipelines. The requested pipeline segments are proposed to be added to special permit Docket Number PHMSA–2019–0202, due to the pipeline segments being located within the inspection area of this existing special permit.

This special permit is being requested in lieu of pipe replacement, pressure reduction, or new pressure tests for a Class 1 to 3 location change on two (2) gas transmission pipeline segments totaling 1,651.00 feet (approximately 0.313 miles). These pipeline segments, which have changed from a Class 1 to a Class 3 location, are as follows:

New special permit segment	County, state	Outside diameter (inches)	Line name	Length (feet)	Year installed	Maximum allowable operating pressure (pounds per square inch gauge)
1	Loudoun, VA	30	VC	481.00	1962	898
2	Montgomery, MD	30	MC	1,170.00	1962	898

The special permit request, proposed special permit with conditions, and draft environmental assessment (DEA) for the above listed TCO pipeline segments are available for review and public comments in Docket No. PHMSA–2019–0202. PHMSA invites interested persons to review and submit comments on the special permit request and DEA in the docket. Please include any comments on potential safety and environmental impacts that may result if the special permit is granted. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comments closing date. Comments received after the closing date will be evaluated, if it is possible to do so without incurring additional expense or delay.
