Overview:

The purpose of this Tier 2 Site Specific Environmental Assessment (Tier 2) is to (1) document the proposed action (the Project) and the need for the action (2) identify existing conditions; (3) assess the social, economic, and environmental effects using appropriate tools and agency coordination to comply with local, state, and federal environmental laws, regulations, and ordinances; to (4) document applicable mitigation commitments that would avoid, minimize, or mitigate potential effects; and (5) seek comments from the public. This Tier 2 analysis informs PHMSA's assessment as to whether the Project is consistent with the impacts described in the Tier 1 Nationwide Environmental Assessment for the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program.¹

As part of this Tier 2, PHMSA is soliciting public comments through a public comment period. This Tier 2 is available on PHMSA's website where comments can be submitted to the contact noted below. PHMSA will accept public comments for 30 days on this Tier 2. PHMSA will consider comments received and incorporate them in the decision-making process. Consultation with appropriate agencies on related processes, regulations, and permits is ongoing. Please submit all comments to:

PHMSABILGrantNEPAComments@dot.gov and reference NGDISM-FY22-EA-2023-15 in your response.

At the conclusion of the EA process, PHMSA will either issue a "Finding of No Significant Impact," further supplement this EA with additional analysis, mitigation measures or prepare an Environmental Impact Statement.

I. **Project Description/Proposed Action**

Project Title	Borough of Chambersburg
Project Location	Chambersburg, Franklin County, Pennsylvania

Project Description/Proposed Action:

The Borough of Chambersburg (Borough) is proposing to replace 18,469 feet (ft.) or approximately 3.5 miles of cast iron mains with polyethylene (PE) pipe, which will enhance safety, improve operations, and reduce methane emissions of natural gas. Additionally, the Borough will replace every steel service line along the streets with the PE service lines. The existing infrastructure is entirely within public right-of-way (ROW). See Appendix A, Project Maps.

The proposed work would take place at various locations within the Borough of Chambersburg. The construction methods used to replace the pipeline would include cut and cover (trenching) and insertion. The Tier 1 EA described that the majority of site-specific projects would utilize the insertion method of pipe replacement. As described in this document, the Borough will also utilize open trench methods, which generally involves greater soil disturbance and the use of heavy equipment, when compared to just using the insertion method. Ground disturbance would occur entirely within existing paved road ROW, beneath the paved road. There would be no modifications to buildings or structures, or construction or installation of any aboveground components. The total depth of excavation is 48 inches (in.) below grade by 24 in. wide. The Borough will abandon the existing pipe in place after utility services have been moved to the

¹ <https://www.federalregister.gov/documents/2022/11/09/2022-24378/pipeline-safety-notice-of-availability-of-the-tier-1-nationwide-environmental-assessment-for-the>

new pipeline. Abandonment of the existing pipeline (versus excavation and removal) would minimize ground disturbance and facilitate the replacement process in a more efficient manner. PHMSA has specific requirements for gas and hazardous liquid pipeline abandonment, found in 49 CFR 192.727 and 195.402(c)(10). These requirements include disconnecting pipelines from all sources and supplies of gas, purging all combustibles and sealing the facilities left in place. By complying with PHMSA requirements for purging and sealing abandoned pipelines, the Borough would ensure that the abandoned pipelines pose no risk to safety in their abandoned state.

The staging and material storage areas for the project would be located at the Customer Service Center (80 S. Franklin Street) and the Wayne Avenue Reg Station (across from 307 Wayne Avenue). Both areas are currently utilized for staging and material storage.

No Action:

The No Action alternative, as required under NEPA, serves as a baseline, and is used to compare impacts resulting from the Proposed Action. Under the No Action alternative, PHMSA would not fund this pipeline replacement project. Additionally, PHMSA would not be able to reduce the inventory of methane leaks and reduce safety risks by replacing pipe prone to leakage. Under this alternative, the Borough would continue to use cast iron and other leak prone pipeline material and conduct repairs or replacements in the future using non-federal sources of funding, and potentially on an emergency basis, when a pipeline fails. Impacts and benefits associated with replacing the leak prone pipeline within the Borough of Chambersburg with updated material would not be seen in the near term. The safety risks and methane leaks would persist. The replacement pipeline activities would either not be taken or they would be undertaken at a later, uncertain date. Even if pipe replacement were to happen at some point in the future, environmental mitigation measures during such a replacement would be unknown. Furthermore, existing economic losses, and increased risk associated with prolonged gas leaks would continue.

Need for the Project:

The existing pipelines are over a hundred years old, and the cast iron is brittle and susceptible to cracking. For this reason, the replacement of these cast iron pipelines has been noted as a top safety concern in the Borough's Distribution Integrity Management Plan (DIMP). The project is needed to ensure the safe, reliable operation and delivery of energy to the community, and will reduce the likelihood of future leaks. The overall needs addressed by this project would include (1) improving upon the safe delivery of energy by reducing the likelihood of incidents, as well as methane leaks; (2) avoiding economic losses caused by pipeline failures; and (3) protecting the environment and reducing climate impacts by remediating aged and failing pipelines and pipes prone to leakage.

Description of the Environmental Setting of the Project Area:

The Project Area is situated within a fully developed/urban environment throughout the Borough of Chambersburg. The existing pipelines run beneath various state and Borough roadways with various residential, commercial, and institutional facilities immediately surrounding the roadways. There are no natural habitat areas within the Project Area.

II. Multiple Segments within a Single Project

Segment Location Description
1) Philadelphia Ave. (S.R. 0011) - from N. Second St. northward to College Ave. – 2,500 feet 2) Vine St. - from Philadelphia Ave. to Duke Alley – 700 feet 3) College Ave. (S.R. 0011) - from Philadelphia Ave. eastward to Edgar Ave. – 475 feet 4) N. Second St. (S.R. 0011) - from Broad St. northward to Philadelphia Ave. – 285 feet 5) Rife St. - from N. Franklin St. eastward to Center St. – 475 feet 6) Martin Ave. - eastward from Federal St. – 500 feet 7) S. Second St. (S.R. 0011) - from Garfield St. northward to Lincoln Way East – 3,700 feet 8) E. Queen St. (S.R. 0030) - from S. Main St. eastward to Harrison Ave. – 900 feet 9) S. Coldbrook Ave. - from Lincoln Way East southward to almost E. McKinley St. – 2,200 10) S. 4th St. - from E. McKinley St. southward to Wayne Ave. – 2,400 feet 11) E. Garfield St. (S.R. 0011) - from S. Main St. eastward to S. Second St. – 534 feet 12) Center St. - Hood St. westward to Reservoir St. – 1,200 feet 13) Duke Alley - from Vine St. northward to Alley – 1,300 feet 14) Pleasant St. - from Center St. northward to Elder St. – 450 feet 15) Poplar Ave./Commerce St. – from Vine St. to Philadelphia Ave. – 850 feet

III. Resource Review

Air Quality and Greenhouse Gases (GHG)	
Question	Information and Justification
Is the project located in an area designated by the EPA as non-attainment or maintenance status for one or more of the National Ambient Air Quality Standards (NAAQS)?	Yes, based on a review of the EPA Greenbook. ²
Will the construction activities produce emissions that exceed de minimis thresholds (tons per year)?	No
Will mitigation measures be used to capture blowdown ³ ?	No
Does the system have the capability to reduce pressure on the segments to be replaced? If yes, what is the lowest psi your system can reach prior to venting?	No
Will project proponent commit to reducing pressure on your line to this psi prior to venting? Please calculate venting emissions based on this commitment and also provide comparison figure of venting emissions volume without pressure reduction/drawdown using calculation methods	<p>The Borough does not have the capability to reduce pressure prior to venting.</p> <p>The existing system operates at 125 pounds per square inch (PSI). Based on the size of the existing pipes, it is estimated that 29.92 thousand cubic feet (MCF) of methane would be vented during</p>

² <https://www.epa.gov/green-book/green-book-national-area-and-county-level-multi-pollutant-information>

³ Blowdown refers to the venting of natural gas in current facilities, in order to begin rehabilitation, repair, or replacement activities.

identified in the initial Tier 2 EA worksheet.	construction. ⁴
Estimate the current leak rate per mile based on the type of pipeline material. Based on mileage of replacement and new pipeline material, estimate the total reduction of methane.	The existing leak rate is estimated to be 16,091 kg/year. Replacement would result in a leak rate of approximately 101 kg/year or a reduction of approximately 318,883 kg over a 20-year timeframe.
<p>Conclusion:</p> <p>The project area is located within the Borough of Chambersburg in Franklin County, Pennsylvania. Based on EPA's Greenbook, the project area falls within an orphan⁵ non-attainment area for the 8-hour ozone national ambient air quality standard (NAAQS). Ozone is one of the six common air pollutants identified in the Clean Air Act.⁶ The Environmental Protection Agency (EPA) calls these "criteria air pollutants" because their levels in outdoor air need to be limited based on health criteria.</p> <p>No Action:</p> <p>Under the No Action alternative, existing and planned pipeline activities, including construction and maintenance activities, would continue unchanged. The project proponent would continue to use legacy cast iron and unprotected steel and other leak prone pipe material. The total methane emissions for the pipelines within the project area were extrapolated over 20 years to represent the continuation of methane release under the No Action alternative. Under the No Action alternative, PHMSA estimates that 16,091 kg of methane would be released each year from the existing pipelines within the project area. This amounts to 321,818 kg of methane over a 20-year time frame. See Appendix B, Air Quality, for estimated methane leak rate calculations.</p> <p>Proposed Action:</p> <p>The Proposed Action alternative would result in minor air quality impacts associated with exhaust emissions from construction activities and the intentional venting of methane contained in the existing pipelines prior to replacement. Pipeline blowdowns are typically necessary to ensure that construction and maintenance work can be conducted safely on depressurized natural gas facilities and pipelines. PHMSA reviewed the Borough's construction emissions calculations to assess if the project would exceed the EPA's thresholds for NAAQS.⁷ See Appendix B, Air Quality, for the emissions calculations. Due to the relatively minor scope of the proposed action, impacts to local air quality resulting from construction activities such as dust and exhaust from construction equipment, would be temporary and considered <i>de minimis</i>. Thus, the Proposed Action alternative does not require a General Conformity Analysis under Section 176(c)(4) of the Clean Air Act at the</p>	

⁴ Leak rates are based on Pre-1990 Installation emission factors found in *Table 1 Average methane emission factors for natural gas pipelines (adopted from EPA GHG Inventory, Annex 3.6, Table 3.62)* in the November 9, 2022, PHMSA: Natural Gas Distribution Infrastructure Safety and Modernization Grant Program Programmatic Environmental Assessment, Tier 1 Nationwide Environmental Analysis.

⁵

<https://nepis.epa.gov/Exe/ZyNET.exe/P100VQME.txt?ZyActionD=ZyDocument&Client=EPA&Index=2016%20Thru%202020&Docs=&Query=&Time=&EndTime=&SearchMethod=1&TocRestrict=n&Toc=&TocEntry=&QField=&QFieldYear=&QFieldMonth=&QFieldDay=&UseQField=&IntQFieldOp=0&ExtQFieldOp=0&XmlQuery=&File=D%3A%5CZYFILES%5CINDEX%20DATA%5C16THRU20%5CTXT%5C00000010%5CP100VQME.txt&User=ANONYMOUS&Password=a nonymous&SortMethod=h%7C-&MaximumDocuments=1&FuzzyDegree=0&ImageQuality=r75g8/r75g8/x150y150g16/i425&Display=hpfr&DefSeekPage=x&SearchBack=ZyActionL&Back=ZyActionS&BackDesc=Results%20page&MaximumPages=1&ZyEntry=7>

⁶ <https://www.epa.gov/ground-level-ozone-pollution/ground-level-ozone-basics>

⁷ <https://www.epa.gov/general-conformity/de-minimis-tables>

proposed project sites.

Venting methane is required when service is switched from the existing line to the newly constructed line, but the volume of vented gas can depend on the ability to reduce pressure on the pipe segment or other mitigation actions. Therefore, some methane would be vented into the atmosphere during construction. Based on an operating pressure of 125 pound per square inch (PSI) and a pipe diameter that varies from 4 – 6 inches, PHMSA estimates 29.92 MCF of methane (or 919 kg) would be vented into the atmosphere during construction. See Appendix B, Air Quality, for the methane venting calculations.

As described in the Tier 1 EA, methane leaks from natural gas distribution pipelines increase with age and are considerably higher for cast iron and steel pipelines, as compared with plastic. Replacing leak prone pipe with newer, more durable materials would reduce leaks and methane emissions. Based on the current leak rate of the existing pipe within the project area, this project would reduce overall emissions by 15,071 kg of methane in the first year (when considering the methane that would be released from blowdown that would occur during construction) and would reduce 15,990 kg of methane per year thereafter). This amounts to a reduction of 318,883 kg of methane over a 20-year time frame. See Appendix B, Air Quality, for the methane reduction calculations. Therefore, it is PHMSA's assessment that the proposed project would have a net benefit to air quality from the overall reduction of greenhouse gas emissions and that no indirect or cumulative impacts would result from the Proposed Action.

Mitigation Measures:

The Borough of Chambersburg shall implement the following mitigation measures:

- Efficient use of on-road and non-road vehicles, by minimizing speeds and vehicles.
- Minimize excavation to the greatest extent practical.
- Use cleaner, newer, non-road equipment as practicable.
- Minimize all vehicle idling and at minimum, conform with local idling regulations.
- Ensure all vehicles and equipment are in proper operating condition.
- Ensure on-road and non-road engines meet EPA exhaust emission standards (40 CFR Parts 85, 86, and 89).
- Cover open-bodied trucks while transporting materials.
- Conduct watering, or use of other approved dust suppressants, at construction sites and on unpaved roadways, as necessary.
- Minimize the area of soil disturbance to those necessary for construction.
- Minimize construction site traffic by the use of offsite parking and shuttle buses, as necessary.

Water Resources	
Question	Information and Justification
Are there water resources within the project area, such as wetlands, streams, rivers, or floodplains? If so, would the project temporarily or permanently impact wetlands or waterways?	According to USFWS National Wetland Inventory (NWI), there are no wetlands or streams in the project area. According to Federal Emergency Management Agency (FEMA) maps, the project area does include mapped floodplains.

Under the Clean Water Act, is a Section 401 State certification potentially required? If yes, describe anticipated permit and how project proponent will ensure permit compliance.	No
Under the Clean Water Act, is a USACE Section 404 Permit required for the discharge of dredge and fill material? If yes, describe anticipated permit and how project proponent will ensure permit compliance.	No
Under the Clean Water Act, is an EPA or State Section 402 permit required for the discharge of pollutants into the waters of the United States? Is a Stormwater Pollution Prevention Plan (SWPPP) required?	No - construction activities are not anticipated to exceed soil disturbance thresholds.
Will work activities take place within a FEMA designated floodplain? If so, describe any permanent or temporary impacts and the required coordination efforts with state or local floodplain regulatory agencies.	Yes, see below.
Will the proposed project activities potentially occur within a coastal zone ⁸ or affect any coastal use or natural resource of the coastal zone, requiring a Consistency Determination and Certification?	No, the Project is not located within a coastal zone, nor will it affect any coastal use or natural resource of the coastal zone.
<p>Conclusion:</p> <p>PHMSA reviewed NWI maps to assist in identifying aquatic features including wetlands, streams, and other water resources in or near the project area. Based on a review of the NWI maps, topographic maps, and information provided by the Borough, there are no wetland or streams identified in the project areas.</p> <p>PHMSA also reviewed information provided by the Borough and FEMA's National Flood Hazard Layer to identify any Special Flood Hazard Areas in the project areas. Review of available information indicates that there are three different areas, identified as falling within either special flood hazard areas (Zone AE) or moderate flood hazard areas (shaded Zone X). These FEMA flood zones located within the project area are associated with Conococheague Creek and Falling Spring Branch. The first identified flood zone area located at the intersection of Center Street and Hood Street is designated as being in a shaded Zone X. The second area is located near Commerce Street, Philadelphia Avenue, East and West Vine Street, and Poplar Avenue where portions of the project area are within Zone AE and shaded Zone X. The third shaded Zone X area is located where Philadelphia Avenue becomes College Avenue. These three shaded areas of Zone X, according to the National Flood Hazard Layer Maps, are the areas between the limits of the base flood and the 0.2-percent-annual-chance (or 500-year) flood.⁹ Zone AE identified areas that have at least a 1%-annual-chance of being flooded.¹⁰ See Appendix C, Water Resources.</p>	

⁸ The term "coastal zone" means the coastal waters (including the lands therein and thereunder) and the adjacent shorelands (including the waters therein and thereunder), strongly influenced by each other and in proximity to the shorelines of the several coastal states, and includes islands, transitional and intertidal areas, salt marshes, wetlands, and beaches.)

⁹ <https://www.fema.gov/glossary/flood-zones>

¹⁰ <https://www.fema.gov/flood-maps/coastal/insurance-rate-maps>

No Action:

Under the No Action alternative, the existing pipeline will remain in the current location and normal maintenance activities would continue. If maintenance or repair work was to occur in an area identified as a special flood hazard area, prior coordination with the local Floodplain Manager may be required.

Proposed Action:

The proposed Action Alternative includes replacing approximately 3.5 miles of existing pipelines as well as the associated service lines. At most locations, the new gas lines will be located next to the existing gas lines and the existing gas line will be abandoned in place. All old lines will be purged of natural gas and then sealed on each end. All areas will be restored to pre-construction conditions. In Pennsylvania, municipalities that propose impacts to floodplains are often required to complete and submit a Chapter 106 (Floodplain Management regulations) permit application to the Pennsylvania Department of Environmental Protection (PADEP). Chapter 106 Section 106.11(b) of Pennsylvania Floodplain Management regulations states that *“routine maintenance activities which will not impede, retard, or change flood flows do not require a permit under the act or this chapter”*.¹¹ The proposed work would be consistent with the above regulatory exclusion as replacing the pipelines, with restoring elevations to pre-construction conditions, would not impede, retard, or change flood flows. While excavation activities would occur in the floodplain, the proposed excavation and associated disturbances would be entirely within existing roadways and impervious surfaces. Therefore, the proposed work would result in no disturbance of natural areas and would not cause an impediment, retardation, and/or alteration of flood flows within designated floodplains.

Based on information provided by the Borough and a review of available information, PHMSA’s assessment is that there will be no permanent impacts to water resources located within the project. The pipeline placement and abandonment of the existing pipeline is not anticipated to cause any reasonably foreseeable indirect effects or cumulative effects to water resources. Therefore, PHMSA’s assessment is that there will be no adverse impacts to water resources.

Mitigation Measures:

The Borough of Chambersburg shall avoid staging in wetlands or floodplains and all preconstruction contours shall be restored with natural areas reseeded or repaved as soon as practical. Best Management Practices shall be used during construction to control sediment and erosion and prevent pollutants from entering adjacent waterways.

Groundwater and Hazardous Materials/Waste	
Question	Information and Justification
Does the project have potential to encounter and impact groundwater? If yes, describe potential impacts from construction activities.	No
Will the project require boring or directional drilling that may require pits containing mud and inadvertent	No

¹¹ <https://pacodeandbulletin.gov/display/pacode?file=/secure/pacode/data/025/chapter106/s106.11.html&d=>

return fluids? If yes, describe measures that will be taken during construction activities to prevent impacts to groundwater resources.	
Will the project potentially involve a site(s) contaminated by hazardous waste? Is there any indication that the pipeline was ever used to convey coal gas? If yes, PHMSA will work with the project proponent for required studies.	<p>No, the project is not anticipated to involve a site contaminated by hazardous waste.</p> <p>Yes, the 15 segments of pipeline to be removed as part of the Project have been confirmed to convey coal gas from the Chambersburg Gas Company manufactured gas plant (MGP) from as early as 1856 until approximately 1953.</p>
Does the project have the potential to encounter or disturb lead pipes or asbestos?	No. According to the Borough of Chambersburg, the pipes are cast iron and do not contain any lead components. In addition, the pipes are not wrapped with or have any associated asbestos containing materials.
<p>Conclusion:</p> <p>PHMSA reviewed EPA's NEPAAssist¹² website to identify any Brownfields properties, and superfund sites. There were no brownfields properties or superfund sites identified in the project area. Additionally, an Environmental Data Resources, Inc. (EDR) report was reviewed. State and Federal environmental databases were searched for listings within a mile radius of the 15 pipeline segments. Information detailing the sites identified with release-type listings, including Leaking Underground Storage Tank (LUST) and Leaking Aboveground Storage Tank (LAST) can be found in Appendix D, Hazardous Materials. Based on the information available on the database search, predicted groundwater flow based on localized topography, and the locations of the segments in relation to the database listings, no open release-type cases were identified as anticipated to impact the soils within the Project areas.</p> <p>The Borough of Chambersburg purchased the gas utility in 1946, and in 1953, the Borough converted the system to natural gas. In some cases, residue from the transportation of coal gas remains in the pipelines or possibly in the trenches in which the pipelines are buried that could persist today. The Manufactured Gas Plant used to distribute the coal gas into the piping system utilized numerous methods to alleviate the potential for coal gas residue to enter the piping system.</p> <p>No Action:</p> <p>Under the No Action alternative, the cast iron pipes would remain in their current location and ongoing and routine maintenance activities would occur. Pipes would be replaced under failed circumstances. While there are no adverse impacts to groundwater anticipated by the No Action alternative, increased methane emissions are likely to occur if the leak prone pipes remain (EPA, PRO Fact Sheet No. 402¹³) and the risk of failure is higher among these types of pipes. Therefore, under the no action alternative, PHMSA anticipates an increased risk for the release of methane, both as leaks and during a pipeline failure, which could then</p>	

¹² <https://nepassisttool.epa.gov/nepassist/nepamap.aspx>

¹³ [Insert Gas Main Flexible Liners at https://www.epa.gov/sites/default/files/2016-06/documents/insertgasmainflexibleliners.pdf#:~:text=Methane%20emissions%20reductions%20come%20from%20lower%20leakage%20rates,pipe%20and%20external%20corrosion%20in%20unprotected%20steel%20piping.](https://www.epa.gov/sites/default/files/2016-06/documents/insertgasmainflexibleliners.pdf#:~:text=Methane%20emissions%20reductions%20come%20from%20lower%20leakage%20rates,pipe%20and%20external%20corrosion%20in%20unprotected%20steel%20piping.)

result in ground disturbances from construction activities, potentially impacting groundwater.

Proposed Action:

Based on a review of available information, the Project does not have the potential to encounter and impact groundwater. The Borough indicated that trenching activities for the removal and replacement of the existing gas lines would occur at depths up to approximately four (4) feet below grade. Groundwater in the Borough of Chambersburg is reported to be at depths ranging approximately 18 to 23 feet below land surface, according to open well data obtained from the Pennsylvania Department of Conservation and Natural Resources, Bureau of Geological Survey, Water Well Program. Based on the information available, the surface trenching planned for the proposed activities would not encounter groundwater, and planned project activities would not impact the groundwater. While the gas utility system did previously convey coal gas, according to the Borough of Chambersburg, no residue has been encountered in previous pipeline replacement projects. While the presence is unlikely, the potential cannot be fully precluded. To account for this potential, all pipes and the surrounding area would be inspected prior to removal, and if residue is found, work would stop immediately. The Borough has committed to work with a certified environmental professional to develop and soil management plan, health and safety plan, and any other remedial needs. In addition, the Borough would immediately contact the Pennsylvania Department of Environmental Protection to determine the regulatory requirements needed to address any potential environmental concerns encountered during construction.

With the inclusion of mitigative measures to assist in the prevention of potential impacts, PHMSA's assessment is that there will be no adverse impacts to groundwater associated with the project. Trenching activities are not likely to intercept groundwater. Additionally, there are no hazardous waste or brownfield, or superfund sites identified in the area where work would occur that could be potentially impacted by the Proposed Action Alternative. While there are identified sites that contain, store or dispose of hazardous materials, these are not within the construction areas as work is limited to existing ROW and would not be impacted by the proposed project. PHMSA has not identified any indirect or cumulative effects to groundwater or hazardous materials.

Mitigation Measures:

In the event of a release of hazardous materials/waste into the environment during construction, the Borough of Chambersburg shall notify the appropriate emergency response agencies, potentially impacted residents, and regulatory agencies of the release or exposure.

The Borough of Chambersburg will work with a certified environmental professional to develop and soil management plan, health and safety plan, and any other remedial needs. All pipes and the surrounding area will be inspected prior to removal, and if coal residue exists, or any contaminated materials are discovered, work will stop immediately. In addition, the Borough of Chambersburg will immediately contact the Pennsylvania Department of Environmental Protection to determine the regulatory requirements needed to address the concern.

Prior to the commencement of work, the Borough of Chambersburg shall develop a Soil Management Plan to address the likelihood and procedures for encountering coal residue, unsuitable or contaminated pipelines and/or soils. The plan should include soil screening requirements, the oversight or monitoring of soil moving activities, contingency plans for the handling, removing, temporarily storing, characterizing, disposing of contaminated or unsuitable materials, and measures for containing, treating, and disposing of stormwater that may contact exposed soils or contaminated materials. The Soil Management Plan shall also include a list

of appropriate response agencies, regulatory agencies, project managers, etc. and shall also outline the proper protocol for notifying the appropriate parties to ensure that any encounters with contaminated materials are handled appropriately.

Soils	
Will all bare soils be stabilized using methods using methods identified in the initial Tier 2 EA worksheet? Will additional measures be required?	Yes, the contractor will utilize erosion and sediment control while trenching/ open cutting.
Will the project require unique impacts related to soils?	No
Conclusion: PHMSA obtained a custom soil report for the project area from the USDA, NRCS's web soil survey which indicates that the project area is comprised of various soils, mostly urban land complexes. The majority of these soils are well-drained soils where the depth to the water table is found somewhere greater than 80 inches. It is noted that the project area is an urban residential area where ground disturbance activities have already occurred and there are very few areas, if any, that remain in a natural state. Therefore, while the soils report provides valuable information, the soils have been disturbed and likely contain some degree of fill material brought in as a suitable base for construction. See Appendix E, Soils. No Action: Under the No Action alternative, the cast iron and steel pipes would remain in their current location and soils would remain in their current state and condition. Normal maintenance activities would occur, and pipes would be replaced under failed circumstances. Some soil disturbance would occur during emergency repairs and the affected areas would be restored upon completion. Under either scenario, no adverse impacts to soils would be anticipated under the No Action alternative. Proposed Action: Under the proposed action alternative, the Borough would replace approximately 3.5 miles of cast iron and steel pipelines within the existing ROW. The new gas lines will be installed at a depth of 48 inches below grade and will be installed by cut and cover construction methods (trenching). All disturbed areas will be re-paved (as appropriate) and restored to pre-existing conditions. Therefore, PHMSA's assessment is that there will be no adverse impact to soils resulting from the Proposed Action alternative. Additionally, there are no indirect or cumulative impacts anticipated as the Borough will restore all areas to pre-construction conditions.	
Mitigation Measures: The Borough of Chambersburg shall utilize best management practices, as appropriate, to control sediment and erosion during construction which may include silt fencing, check dams, and promptly covering all bare areas. All impacted areas shall be restored to pre-construction conditions.	

Biological Resources

Question	Information and Justification
Based on review of IPaC and NOAA Fisheries database, are there any federally threatened or endangered species and/or critical habitat within the project area?, ¹⁴ If no, no further analysis is required.	Yes, based on review of the USFWS's Information for Planning and Consultation (IPaC) website. ¹⁵ Additionally, Pennsylvania resources were inventoried to identify potential state listed species.
Will the project impact any areas in or adjacent to habitat for Federally, listed threatened or endangered species or their critical habitat? If no, provide justification and avoidance measures. If yes, PHMSA will work with the project proponent to conduct necessary consultation with resource agencies.	No
<p>Conclusion:</p> <p>PHMSA reviewed information obtained by the Borough from the USFWS's IPaC website as well as information from Pennsylvania's Department of Conservation and Natural Resources. See Appendix F, Biological Resources. The following were identified as potentially occurring within the geographic area:</p> <ul style="list-style-type: none"> • Indiana Bat (mammal) <i>Myotis sodalis</i> -Endangered • Northern Long-eared Bat (mammal) <i>Myotis septentrionalis</i>- Endangered • Tricolored Bat (mammal) <i>Perimyotis subflavus</i>- Proposed Endangered • Monarch Butterfly (insect) <i>Danaus plexippus</i> -Candidate • Green Floater (clam) <i>Lasmigona subviridis</i>- Proposed Threatened • Northeastern Bulrush (flowering plant) <i>Scirpus ancistrochaetus</i>- Endangered <p>The Project Area consists entirely of road ROW and impervious surfaces as the existing natural gas pipelines run underneath paved roads, within the Borough of Chambersburg. Therefore, there is no habitat for any of the above species in and along the paved project areas.</p> <p>No Action:</p> <p>Under the No Action alternative, existing conditions would remain, and normal maintenance activities would occur. The project area is in an urbanized environment and therefore has very limited biological resources present. Additionally, the project area does not contain suitable habitat for listed species, therefore no impacts to biological resources would occur under the No Action alternative.</p> <p>Proposed Action:</p> <p>The project area is in a built-out, urban environment where the areas of disturbance would be within existing transportation corridors, under paved surfaces. Because these areas are within ROW that has been previously impacted (pipeline laid in the ground in close proximity to the location where new pipes would be laid and subsequently paved), the immediate project area does not contain suitable habitat for either federal or state listed species. As a result, PHMSA's assessment is that the project is unlikely to have any detrimental effects to federally- listed species or critical habitat and the project would have no effect on the Indiana bat, northern long-eared bat, or northeastern bulrush. Federal proposed threatened, federal candidate species,</p>	

¹⁴ <https://www.fisheries.noaa.gov/species-directory/threatened-endangered>

¹⁵ <https://ipac.ecosphere.fws.gov/>

and state listed species are not subject to Section 7 of the Endangered Species Act. PHMSA's assessment is also that the project is unlikely to have any detrimental effects to state listed species or other biological resources. Additionally, there are no indirect or cumulative impacts anticipated as a result of the Proposed Action alternative.

Mitigation Measures:

No impacts to biological resources are anticipated and therefore, no mitigative measures are necessary.

Cultural Resources	
Question	Information and Justification
Does the project include any ground disturbing activities, modifications to buildings or structures, or construction or installation of any new aboveground components?	Yes. The proposed project will include ground disturbing activities. However, the proposed earth disturbance will occur entirely within existing paved road rights-of-way, beneath the paved road. There will be no modifications to buildings or structures, or construction or installation of any aboveground components. The Project will impact previously disturbed land, as the existing pipelines extend below the roadbed.
Is the project located within a previously identified local, state, or National Register historic district or adjacent to any locally or nationally recognized historic properties? This information can be gathered from the local government and/or State Historic Preservation Office. ¹⁶	Yes. The project is located within the Chambersburg Historic District.
Does the project or any part of the project take place on tribal lands or land where a tribal cultural interest may exist? ¹⁷	Yes, Franklin County has several areas where tribal cultural interest may exist.
Are there any nearby properties or resources that either appear to be or are documented to have been constructed more than 45 years ago? ¹⁸ Does there appear to be a group of properties of similar age, design, or method of construction? Any designed landscapes such as a park or cemetery? Please provide photographs to show the context of the project area and adjacent properties.	Yes. The project is located within the Chambersburg Historic District.
Has the entire area and depth of construction for the project been previously disturbed by the original installation or other activities? If so, provide any	Yes. The proposed project will include ground disturbing activities. However, the proposed earth disturbance will occur entirely within existing paved

¹⁶ Many SHPOs have an [online system](https://www.nps.gov/subjects/nationalregister/state-historic-preservation-offices.htm) at <https://www.nps.gov/subjects/nationalregister/state-historic-preservation-offices.htm> that can tell you previously identified historic properties in your project area. The [National Register list](https://www.nps.gov/subjects/nationalregister/database-research.htm) at <https://www.nps.gov/subjects/nationalregister/database-research.htm> can also be accessed online.

¹⁷ The SHPO may have information on areas of tribal interest, or a good source is the [HUD TDAT website](https://egis.hud.gov/TDAT/) at <https://egis.hud.gov/TDAT/>.

¹⁸ Local tax and property records or historic maps may indicate dates of construction.

documentation of prior ground disturbances.	road rights-of-way, beneath the paved road.
Will project implementation require removal or disturbance of any stone or brick sidewalk, roadway, or landscape materials or other old or unique features? Please provide photos of the project area that include the roadway and sidewalk materials in the project and staging areas.	No
<p>Conclusion:</p> <p>PHMSA must consider the impact of projects for which they provide funding on historic and archeological properties in accordance with Section 106 of the National Historic Preservation Act (Section 106). Pursuant to 36 CFR 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the Undertaking may directly or indirectly affect historic resources. Based on the proposed scope of work, PHMSA has delineated the APE for this project to encompass the existing ROW, which include the limits of disturbance and the limits of any potential vibration effects. The APE extends to the depth of proposed ground disturbance of up to 48 in. below grade. The Undertaking does not have the potential to cause visual or audible effects after the completion of construction. The existing ROW encompasses various roads, signage, sidewalks, and grassy areas throughout the Borough of Chambersburg. See Appendix G, Cultural Resources, for a map of the APE.</p> <p>No Action:</p> <p>Under the No Action alternative, existing conditions would remain, and normal maintenance activities would occur. These activities could result in ground disturbance that might affect historic resources. However, no federal funding would be applied and therefore Section 106 would not be required.</p> <p>Proposed Action:</p> <p>PHMSA staff identified properties based on available information on previously identified historic properties in the APE, including the National Register of Historic Places (NRHP) database and data received from the Pennsylvania State Historic Preservation's database (PA-SHARE). PHMSA staff also conducted research to determine if there are any previously unidentified properties within the APE that are 45 years of age or older and may be eligible for the NRHP. The Chambersburg Historic District (resources number 1980RE00652) is the only NRHP-listed historic property within the APE. The Virginia Path (resources number 2019RE06606), which has not been evaluated for eligibility for inclusion on the NRHP, was identified during a review of PA-SHARE. A small portion of the southern part of the APE crosses the Virginia Path. See Appendix G, Cultural Resources, for additional information about the APE and the properties identified.</p> <p>PHMSA's assessment is that the proposed action would not alter any of the characteristics or contributing features of these historic properties that qualify them for inclusion in the NRHP in a manner that would diminish their integrity. No character-defining materials or features would be removed or altered as a result of the project. Therefore, the proposed action does not have the potential to adversely affect the identified above-ground historic property. Project work would be limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources and would not result in lasting physical, visual, or audible effects to NRHP-listed historic properties. The project also would not include land acquisition, nor would it limit access to or change the use of any of the historic properties identified above. In accordance with 36 CFR Part 800.5, PHMSA's assessment is that the Undertaking would</p>	

have No Adverse Effect on historic properties.

A letter was sent on December 7, 2023, to the Pennsylvania State Historic Preservation Officer (SHPO), federally recognized tribes with a potential interest in the project area, and all consulting parties outlining the Section 106 process, including a description of the undertaking, delineation and justification of the APE, identification of historic properties and an evaluation and proposed finding of no adverse effects. PHMSA has requested comments on the Section 106 process, identification of historic properties, and proposed finding within 30 days of receipt of the letter. See Appendix G, Cultural Resources, for more information.

Mitigation Measures:

The Borough of Chambersburg shall notify PHMSA immediately of any changes to the scope of work that may change the impacts to historic properties or the areas that may be impacted, including location of work, depth of construction, or change in construction methods.

Section 4(f)	
Question	Information and Justification
Are there Section 4(f) properties within or immediately adjacent to the project area? If yes, provide a list of properties or as an attachment.	Yes.
Will any construction activities occur within the property boundaries of a Section 4(f) property? If so, please detail these activities and indicate if these are temporary or permanent uses of the Section 4(f) property. Further coordination with PHMSA is required for all projects that might impact a Section 4(f) property.	No
<p>Conclusion:</p> <p>Section 4(f) of the US Department of Transportation (USDOT) Act of 1966 as amended (Section 4(f)) (49 U.S.C. § 303(c)); is a federal law that applies to transportation projects that require funding or other approvals by the USDOT. Section 4(f) prohibits the Secretary of Transportation from approving any program or project which requires the use of any publicly owned land from a public park, recreation area, or wildlife and waterfowl refuge of national, state, or local significance, or any land from an historic site of national, state, or local significance unless:</p> <ul style="list-style-type: none">• There is no feasible and prudent alternative to the use of the land;• The program or project includes all possible planning to minimize harm to such park, recreational area, wildlife and waterfowl refuge, or historic site, resulting from such use. <p>PHMSA conducted a review of properties that are located within the Project Area to identify potential properties that qualify as Section 4(f). The Chambersburg Historic District, Mike Waters Memorial Park, Reservoir Hill Park and Henninger Field and Playground were identified within the project area as potential 4(f) properties. See Appendix H.</p>	

No Action:

Under the No Action alternative, there would be no change to existing pipeline infrastructure pursuant to federal funding provided by the Program. Therefore, there would be no use of a Section 4(f) property under the No Action alternative.

Proposed Action:

Under the Proposed Action alternative, construction activities would not impact the resources identified above. All work would be within the paved road ROW and all areas will be restored to pre-construction conditions. Access to the parks would remain throughout the duration of construction and no physical use of the parks would occur. In addition, as described in the Noise section of this Tier 2 EA, no adverse impacts associated with construction noise have been identified that could affect the use of these properties. Therefore, PHMSA's assessment is that there would be no use of any Section 4(f) resources.

Mitigation Measures:

The Borough of Chambersburg shall ensure that full public access to, and use of Mike Waters Memorial Park, Reservoir Hill Park and Henninger Field and Playground is maintained during construction.

Land Use and Transportation	
Question	Information and Justification
Will the full extent of the project boundaries remain within the existing right-of-way or easements? If no, please describe any right-of-way acquisitions or additional easements needed.	Yes, the project would remain within existing ROW.
Will the project result in detours, transportation restrictions, or other impacts to normal traffic flow or to existing transportation facilities during construction? Will there be any permanent change to existing transportation facilities? If so, what are the changes, and how would changes affect the public?	Yes, the project would result in detours, transportation restrictions, and impacts to normal traffic flow; however, there would be no permanent changes to transportation facilities.
Will the project interrupt or impede emergency response services from fire, police, ambulance or any other emergency or safety response providers? If so, describe any coordination that will occur with emergency response providers?	No
Conclusion: The project is located in the Borough of Chambersburg consisting of commercial and residential areas. No Action: Under the No Action alternative, the cast iron and steel pipes would remain in their current location and no	

changes to land use would occur. Normal maintenance activities would occur, and pipes would be replaced under failed circumstances.

Proposed Action:

The Borough is proposing to replace pipeline infrastructure within existing ROW and would not include adding pipeline to serve new areas. During construction, the proposed action would result in detours, transportation restrictions, and impacts to normal traffic flow. Affected roads would be closed while work is ongoing and state routes would have flaggers routing traffic through single lane closures. Access would resume at night for all segments. The Borough would abide by all applicable local ordinances and regulations, as outlined in the Borough of Chambersburg Part II General Legislation. Sections D, E and F of Chapter 200 Noise Ordinances (200-2 Quiet period: time and place restrictions on activities) would apply to the proposed work and are as stated below:

The following actions are specifically prohibited between the hours of 10:00 p.m. of one day and 6:00 a.m. of the following day on Sundays and weekdays (except Friday evening the quiet period begins at 11:00 p.m.) and between 11:00 p.m. of Saturday and 8:00 a.m. Sunday morning (the quiet periods), regardless of the sound level which is emitted, unless otherwise exempted in this chapter.

D. *Operate or permit the operation of any equipment used in construction, repair, alteration or demolition work on buildings, structures, streets, alleys or appurtenances. [Amended 3-27-2023 by Ord. No. 2023- 11]*

E. *In residential zoned districts, except when necessary to provide access to and from a property, operate or permit the operation of any power equipment used for home or building repair or grounds maintenance, including, but not limited to, power saw, power generator, sander, lawn mower, and garden equipment. [Amended 3-27-2023 by Ord. No. 2023-11]*

F. *Operate or permit the operation of any power equipment, including, but not limited to, chain saws, pavement breakers, log chippers, power generators, powered hand tools. In addition, if such activity is inherent to the occupying land use, then the performance standards outlined in § 300-171 of the Code also apply.*

The proposed construction activities would abide by the Borough of Chambersburg's noise ordinances. Consideration of emergency response vehicles, travel restrictions, and other impacts to local transportation are anticipated to be temporary and would only last for the duration of construction. Minor disruptions to on-street parking may occur, but access to existing residences would not be restricted. The Borough would coordinate with the appropriate local and state agencies regarding interruptions to traffic and detours and appropriate protocol would be used where traffic would be temporarily diverted to one-lane. Normal traffic flow would be maintained to the extent possible and traffic control measures would be utilized to assist traffic negotiating through construction areas, as needed. The Borough would notify emergency services of the scheduled work and traffic implications and would use various methods of communication to notify any potentially impacted residents, business owners, and the general public. Notification would be provided by the Borough through several public Borough Council meetings (dates TBD), notification on the Borough website, and a public comment period. During construction activities, traffic flows would be maintained by keeping construction equipment as far off the road as much as possible. Therefore, because the work consists of the replacement of existing pipeline, would not convert any new areas into a different use and impacts would only occur during construction, PHMSA's assessment is that there would be no impact to land use.

PHMSA considered the cumulative effects of this action with ongoing and planned transportation related construction projects that could cumulatively impact land use and transportation. The Borough, like many

municipalities, has various maintenance, drainage improvement, and other projects occurring throughout any given year. All municipalities and businesses must abide by the same requirements and must coordinate with state and local agencies on any disruptions to normal traffic patterns. Through this coordination, the overall cumulative effects of multiple projects occurring would be minimized by planning and scheduling efforts with responsible agency oversight. Land use changes are not anticipated as the projects are occurring in an urbanized area that is built out and therefore would not change the existing residential or commercial use.

Mitigation Measures:

The Borough of Chambersburg shall maintain traffic flows to the extent possible and use traffic control measures to assist traffic negotiating through construction areas, as needed.

The Borough of Chambersburg shall coordinate with state and local agencies regarding detours and/or routing adjustments during construction and will notify any potentially impacted residents and/or business owners.

The Borough of Chambersburg shall have a traffic control plan in place, prior to construction, and coordinate with the appropriate agency well in advance of any impacted emergency services or essential agency functions.

Noise and Vibration	
Question	Information and Justification
Will the project construction occur for longer than a month at a single project location?	Yes. It is estimated that the construction phase of the Project would take approximately 4 years. Segments would be started and completed in one continuous mobilization.
Will the project location be in proximity (less than 50-ft.) to noise sensitive receivers (residences, schools, houses of worship, etc.)? If so, what measures will be taken to reduce noise and vibration impacts to sensitive receptors?	Yes, the Project would occur within a 50' radius of noise sensitive receivers. The following measures will take place in order to reduce impacts: 1. Adhering to state, local, and tribal noise regulations. 2. Limiting activities to occur only during normal weekday business hours, when noise restrictions (if applicable), are not in place. 3. Proper maintenance and utilization of equipment mufflers. 4. Use of acoustical noise tent and/or enclosures surrounding pavement breaking methods to the extent practicable given space constraints at the work sites.
Will the project require high-noise and vibration inducing construction methods? If so, please specify.	While not anticipated, if the composition of the areas being affected is compiled of rock, hammer attachments could be utilized to break up any rock/concrete within the area.
Will the project comply with state and local ordinances? If so, identify applicable ordinances and limitations on noise/vibration times or sound levels.	Yes. The Borough of Chambersburg Part II General Legislation. Sections D, E and F of Chapter 200 of the Borough's local noise ordinances.

Will construction activities require large bulldozers, hoe ram, or other vibratory equipment within 20 ft. of a structure?	No large equipment would be utilized within 20 feet of structures.
<p>Conclusion:</p> <p>The project is located in residential and commercial areas within the Borough of Chambersburg. The ambient noise in the project area consists of a combination of environmental noise from road traffic, construction, industry, the built environment, population density and other sources. There are several sensitive noise receptors (residences, schools, etc.) located adjacent to the streets where work would occur.</p> <p>No Action:</p> <p>Under the No Action, the project would not move forward and the pipelines along the designated streets in the project area would not be replaced at this time. If replacement activities occur in the future, they would not likely be replaced all at once. It is likely that these pipelines would need to be repaired or replaced due to leaks or deteriorating conditions in the future. If replacement or repairs occur under emergency conditions, noise from construction equipment would add to that of the current ambient noise and would be of a shorter duration.</p> <p>Proposed Action:</p> <p>Backhoes, portable electric generators, air compressors, concrete saws, vacuum trucks, excavators, dump trucks, skid steers, rollers, pavers, and other similar construction equipment would be used to excavate a trench, lay pipe, compact soils and re-pave the affected areas. Sensitive noise receptors would likely experience temporary noise impacts while outdoors in the vicinity of the work; however, PHMSA's assessment is that the noise impacts would be minor and temporary and no adverse vibration impacts would result from the proposed work.</p> <p>PHMSA considered the cumulative effects of this action with ongoing and planned transportation related construction projects that could cumulatively have an impact on the noise and vibration impacts within the Borough of Chambersburg. Rural areas often have paving, drainage improvement, and other construction or maintenance projects on going which could occur within or near the project area, which would contribute to increased noise. These construction and maintenance projects could occur at the same time as the Proposed Action alternative and would contribute to an increase in cumulative noise effects during construction. However, adhering to state and local noise ordinances would ensure the project does not cause cumulatively more than minor adverse noise or vibration impacts.</p>	
<p>Mitigation Measures:</p> <p>The Borough of Chambersburg shall adhere to local noise ordinances.</p>	

Environmental Justice	
Question	Information and Justification
Using the EPA EJScreen or census data ¹⁹ , is the project located in an area of minority and/or low-income individuals as defined by USDOT Order 5610.2(c)? If so, provide demographic data for minority and/or low-income individuals within ½ mile from the project area as a percentage of the total population.	Yes. Based on review of socioeconomic data using the EPAs EJScreen, the population residing within the general project area for Chambersburg, PA contains 41% low income and 40% minority populations.
Will the project displace existing residents or workers from their homes and communities? If so, what is the expected duration?	No
Will the project require service disruptions to homes and communities? If so, what is the expected communication and outreach plan to the residents and the duration of the outages?	Yes. When the Project is ready to switch over to the new pipeline system, service disruption would temporarily occur for approximately 30-60 minutes. Rigorous mitigation and avoidance measures are proposed to minimize any adverse effects to the EJ communities. Notification to property owners, businesses and emergency response providers regarding the construction and any construction-related impacts will be provided through several public Borough Council meetings (dates TBD), notification on the Borough website, and a public comment period.
Are there populations with Limited English Proficiency located in the project area? If so, what measures will be taken to provide communications in other languages?	Yes. Measures would be taken to provide multi-lingual communications to these communities.
<p>Conclusion:</p> <p>Executive Order (E.O.) 14096—"Revitalizing Our Nation's Commitment to Environmental Justice for All" was enacted on April 21, 2023. E.O. 14096 on environmental justice does not rescind E.O. 12898 – "Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations," which has been in effect since February 11, 1994 and is currently implemented through DOT Order 5610.2C. This implementation will continue until further guidance is provided regarding the implementation of the new E.O. 14096 on environmental justice.</p> <p>PHMSA reviewed socioeconomic data using the EPAs EJScreen and found the population residing within the project area in Chambersburg, PA contains 41% low income and 40% minority populations. The percentage of these populations is above the Franklin County average of 28% low income and 13% minority populations.</p>	

¹⁹ <https://www.census.gov/quickfacts/fact/table/US/PST045222>

See Appendix I, Environmental Justice, for socioeconomic data.

No Action:

Under the No Action alternative, existing and planned pipeline activities, including construction and maintenance activities, would continue unchanged. The Borough would continue to use leak prone pipe material that could lead to safety incidents and service disruptions. Additionally, if a pipeline segment is not repaired or replaced prior to failure, it is likely to be associated with even more emissions under the No Action alternative. Thus, emissions benefits to the community associated with repairing or replacing existing pipelines with updated material would not be achieved and the incident risks and leaks would remain. There may be some degree of air pollution associated with construction activities for maintenance and repairs of existing pipelines under the No Action alternative, either through planned repair or replacement efforts or unplanned, emergency repairs or replacements.

Proposed Action:

The Proposed Action alternative would result in an overall reduction in GHG emissions. Construction activities would result in minor temporary air quality impacts, including the intentional venting of existing distribution lines prior to replacement. Noise impacts associated with construction are anticipated to be minor. Traffic impacts would be temporary and only minor disruptions or delays would occur. However, removal of leak prone pipe would reduce leaks and the potential for incidents, resulting in an increase in pipeline safety across the system while also improving operation and reliability. Therefore, consistent with Executive Order 12898 and DOT Order 5610.2(c), PHMSA's assessment is that the project would not result in disproportionately high and adverse effects on minority or low-income populations, or other underserved and disadvantaged communities. The project would have an overall beneficial effect on environmental justice populations and would not result in indirect or cumulative impacts.

Mitigation Measures:

The Borough of Chambersburg shall provide advanced public notifications of service disruptions and construction schedules to all affected parties including residents and businesses adjacent to the project area.

Safety	
Question	Information and Justification
Has a risk profile been developed to describe the condition of the current infrastructure and potential safety concerns?	Yes.
Has a public awareness program been developed and implemented that follows the guidance provided by the American Petroleum Institute (API) Recommended Practice (RP) 1162?	Yes. The Borough Gas Department cosponsors the annual Pennsylvania One-Call (811) Pipeline Safety Bulletin each year. Because the Borough must approve development, land use and blasting, they have opportunities to address excavation safety, in many cases, early in a project's development. They address public awareness and regularly send gas safety/gas odor information to the public. The Borough Utilities Service Center is staffed 24/7/365

	for calls from the public and customers.
Does the project area include pipes prone to leakage?	Yes.
Will construction safety methods and procedures to protect human health and prevent/minimize hazardous materials releases during construction, including personal protection, workplace monitoring and site-specific health and safety plans, be utilized? If yes, document measures and reference appropriate safety plans.	Yes. Construction safety methods and procedures to protect human health and prevent/minimize hazardous materials releases during construction, including personal protection, workplace monitoring and site-specific health and safety plans would be utilized. The proposed Project would follow the safety guides as outlined in Chapter XV Safety Rules of the Gas Department (updated July 25, 2022). Workers would be made aware of the natural gas properties, both the explosion hazard and asphyxiation hazard. Workers would wear gas department personal protection equipment, including protective footwear, hard hats, gloves, eye protection, hearing protection and respirators and understand the safe methods and practice caution while operating hand and power tools, heavy equipment, and chains and slings. Fire retardant clothing would be worn by employees when necessary. Workplace monitoring and site-specific health and safety plans would be utilized at all times.
Has an assessment of the project been performed to analyze the risk and benefits of implementation?	Yes
<p>Conclusion:</p> <p>The proposed project would replace cast iron and steel pipes. Pipelines that are known to leak based on the material include cast iron, bare steel, wrought iron, and historic plastics with known issues (PIPES Act of 2020). PHMSA establishes safety regulations for all pipelines (49 CFR Parts 190-199). In 2011, following major natural gas pipeline incidents, DOT and PHMSA issued a Call to Action to accelerate the repair, rehabilitation, and replacement of the highest-risk pipeline infrastructure. Among other factors, pipeline age and material are significant risk indicators. Pipelines constructed of cast and wrought iron, as well as bare steel, are among the pipelines that pose the highest risk. This is reflected in the Borough's DIMP plan. PHMSA continues to encourage legacy pipeline repair or replacement to increase the safety of these segments of the gas distribution systems. Pipeline incidents can result in death, injury, property damage, and environmental damage.</p> <p>No Action:</p> <p>Under the No Action alternative, the cast iron and steel pipes would remain in their current location, state, and condition. Normal maintenance activities would occur, and pipes would be replaced under failed circumstances. Safety risks resulting from existing leak prone pipes remaining in place would persist until the existing leak-prone pipes are replaced.</p>	

Proposed Action:

The proposed project is necessary to replace leak prone pipes. This replacement is in alignment with the Borough's DIMP plan, increasing the overall safety of the community.

The project would reduce the risk profile of existing pipeline systems prone to methane leakage and would also benefit disadvantaged communities with the safe provision of natural gas. The project responds to the need to address the potentially unsafe condition of the natural gas distribution system of pipelines. The repair, rehabilitation, or replacement of pipelines would be constructed in accordance with industry best practices and would comply with all local, state, and federal regulations, including those for safety.

The abandonment of the existing pipeline is necessary, it would be conducted in accordance with PHMSA requirements found in 49 CFR 192.727 and 195.402(c)(10). These requirements include disconnecting pipelines from all sources and supplies of gas, purging all combustibles and sealing the facilities left in place. These requirements for purging and sealing abandoned pipelines would ensure that the abandoned pipelines are properly purged and cleaned and pose no risk to safety in their abandoned state. Therefore, PHMSA's assessment is that the replacement project would improve the overall safety of the Borough's infrastructure.

Mitigation Measures:

The Borough of Chambersburg shall use standard construction safety methods and procedures; and conduct regular safety audits of crews performing work in the field and subsequent follow-up reporting and/or training, as required.

The Borough of Chambersburg shall ensure their DIMP procedures are updated as necessary, the work is constructed in accordance with industry best practices and the project will comply with all local, state, and federal regulations, including those for safety.

IV.**Public Involvement**

On November 9, 2022, PHMSA published a Federal Register notice (87 FR 67748) with a 30-day comment period soliciting comments on the "Tier 1 Nationwide Environmental Assessment for the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program." During the 30-day comment period, PHMSA received one comment letter from the APGA on various aspects of the program and air quality related analysis in the EA on December 9, 2022. This APGA letter is available for public review at the Docket No: PHMSA-2022-0123²⁰. PHMSA reviewed the comment letter and determined the comments were not substantial and did not warrant further analysis. One comment provided by the APGA indicated that the majority of construction methods used for pipe replacements would be replacement by open trenching and that some may want to abandon the existing pipe rather than removing it for replacement. Any departures from methods described in the Tier 1 EA will require additional documentation from the project proponent, as reflected in this Tier 2.

As part of this Tier 2, PHMSA is soliciting public comments through a public comment period. This Tier 2 is available on PHMSA's website where comments can be submitted to the contact noted below. PHMSA will accept public comments for 30 days on this Tier 2. PHMSA will consider comments received and incorporate

²⁰ <https://www.regulations.gov/document/PHMSA-2022-0123-0002/comment>

them in the decision-making process. Consultation with appropriate agencies on related processes, regulations, and permits is ongoing. Please submit all comments to: PHMSABILGrantNEPAComments@dot.gov and reference NGDISM-FY22-EA-2023-15 in your response.

Appendix B

Methane Calculations

Table 1 Average methane emission factors for natural gas pipelines (adapted from EPA GHG Inventory, Annex 3.6, Table 3.6-2)

Pipeline Material	Pre-1990 Installation (kg/mile)	1990-2020 Installation (kg/mile)	Average Rate (kg/mile/year)
Cast Iron	4,597.40	1,157.30	2,877.35
Unprotected steel	2,122.30	861.3	1,491.80
Protected steel	59.1	96.7	77.90
Plastic	190.9	28.8	109.85

Table 2 No Action Leak Rate

Pipeline Material Type	Average Rate (kg/mile/year)	Miles	Current Methane Leak Rate (kg/year)
Cast Iron	4,597.40	3.5	16091
Unprotected steel	2,122.30	0	0
Protected steel	59.1	0	0
Plastic	190.9		0
Total Annual Methane Leak Rate			16091
20-year Methane Emissions			321818

Table 3 Proposed Action Leak Rate

Pipeline Material Type	Average Rate (kg/mile/year)	Miles	New Methane Leak Rate (kg/year)
Plastic	28.8	3.5	101
Year 1 Methane Reduction			15071
Annual Methane Reduction			15990
20-year Methane Reduction			318883

Construction Emissions

		Coastal Transect
		Base Flood Elevation Line (BFE)
		Limit of Study
		Jurisdiction Boundary
MAP PANELS		Coastal Transect Baseline
		Profile Baseline
		Hydrographic Feature
		Digital Data Available
		No Digital Data Available
		Unmapped

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on **11/28/2023 at 11:16 AM** and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

STANDARD ENVIRONMENTAL RECORDS

Federal ERNS list

ERNS: Emergency Response Notification System

A review of the ERNS list, as provided by EDR, and dated 03/20/2023 has revealed that there are 2 ERNS sites within the requested target property.

<u>Site</u>	<u>Address</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will replace the Permit

Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichlorethylene
Waste Code:	F001
Waste Description:	The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

FINDS:

Registry ID: 110001054162

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

MUN WASTE OPER: Municipal Waste Operations Listing

A Municipal Waste Operation is a DEP primary facility type related to the Waste Management Municipal Waste Program.

The sub-facility types related to Municipal Waste Operations that are included are: Composting: Includes facilities that use land for processing municipal waste by composting. Composting is a process that biologically decomposes organic waste under controlled anaerobic or aerobic conditions to yield a humus-like product. Land Application: Includes facilities that uses agricultural utilization or land reclamation of waste. Sewage sludge is land-applied for its nutrient value or as a soil conditioner.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RES WASTE OPER: Residual Waste Operations Listing

A Residual Waste Operation is a DEP primary facility type related to the Waste Management Residual Waste Program. Residual waste is waste generated at an industrial, mining, or wastewater treatment facility. The sub-facility types related to Residual Waste that are included are: ____ Generator: A generator is a person, company, institution, or municipality that produces or creates residual waste. Residual waste is waste generated at an industrial, mining, or wastewater treatment facility. Impoundment: An impoundment is a facility designed to hold an accumulation of liquid wastes. Incinerator: An incinerator is an enclosed device using controlled combustion to thermally break down residual waste.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

PFAS: Sites With Known PFAS Contamination

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are man-made chemicals, are resistant to heat, water and oil, and persist in the environment and the human body. PFAS are not found naturally in the environment. They have been used to make cookware, carpets, clothing, fabrics for furniture, paper packaging for food, and other materials that are resistant to water, grease, or stains. They are also used in firefighting foams and in a number of industrial processes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Custom Soil Resource Report for Franklin County, Pennsylvania

November 28, 2023

Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (<http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/> and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center <https://offices.sc.egov.usda.gov/locator/app?agency=nrcs> or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require

alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil

scientists classified and named the soils in the survey area, they compared the individual soils with similar soils in the same taxonomic class in other areas so that they could confirm data and assemble additional data based on experience and research.

The objective of soil mapping is not to delineate pure map unit components; the objective is to separate the landscape into landforms or landform segments that have similar use and management requirements. Each map unit is defined by a unique combination of soil components and/or miscellaneous areas in predictable proportions. Some components may be highly contrasting to the other components of the map unit. The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The delineation of such landforms and landform segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, onsite investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map. The frequency of observation is dependent upon several factors, including scale of mapping, intensity of mapping, design of map units, complexity of the landscape, and experience of the soil scientist. Observations are made to test and refine the soil-landscape model and predictions and to verify the classification of the soils at specific locations. Once the soil-landscape model is refined, a significantly smaller number of measurements of individual soil properties are made and recorded. These measurements may include field measurements, such as those for color, depth to bedrock, and texture, and laboratory measurements, such as those for content of sand, silt, clay, salt, and other components. Properties of each soil typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of characteristics for the components. The aggregated values are presented. Direct measurements do not exist for every property presented for every map unit component. Values for some properties are estimated from combinations of other properties.

While a soil survey is in progress, samples of some of the soils in the area generally are collected for laboratory analyses and for engineering tests. Soil scientists interpret the data from these analyses and tests as well as the field-observed characteristics and the soil properties to determine the expected behavior of the soils under different uses. Interpretations for all of the soils are field tested through observation of the soils in different uses and under different levels of management. Some interpretations are modified to fit local conditions, and some new interpretations are developed to meet local needs. Data are assembled from other sources, such as research information, production records, and field experience of specialists. For example, data on crop yields under defined levels of management are assembled from farm records and from field or plot experiments on the same kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on such variables as climate and biological activity. Soil conditions are predictable over long periods of time, but they are not predictable from year to year. For example, soil scientists can predict with a fairly high degree of accuracy that a given soil will have a high water table within certain depths in most years, but they cannot predict that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the survey area, they drew the boundaries of these bodies on aerial photographs and

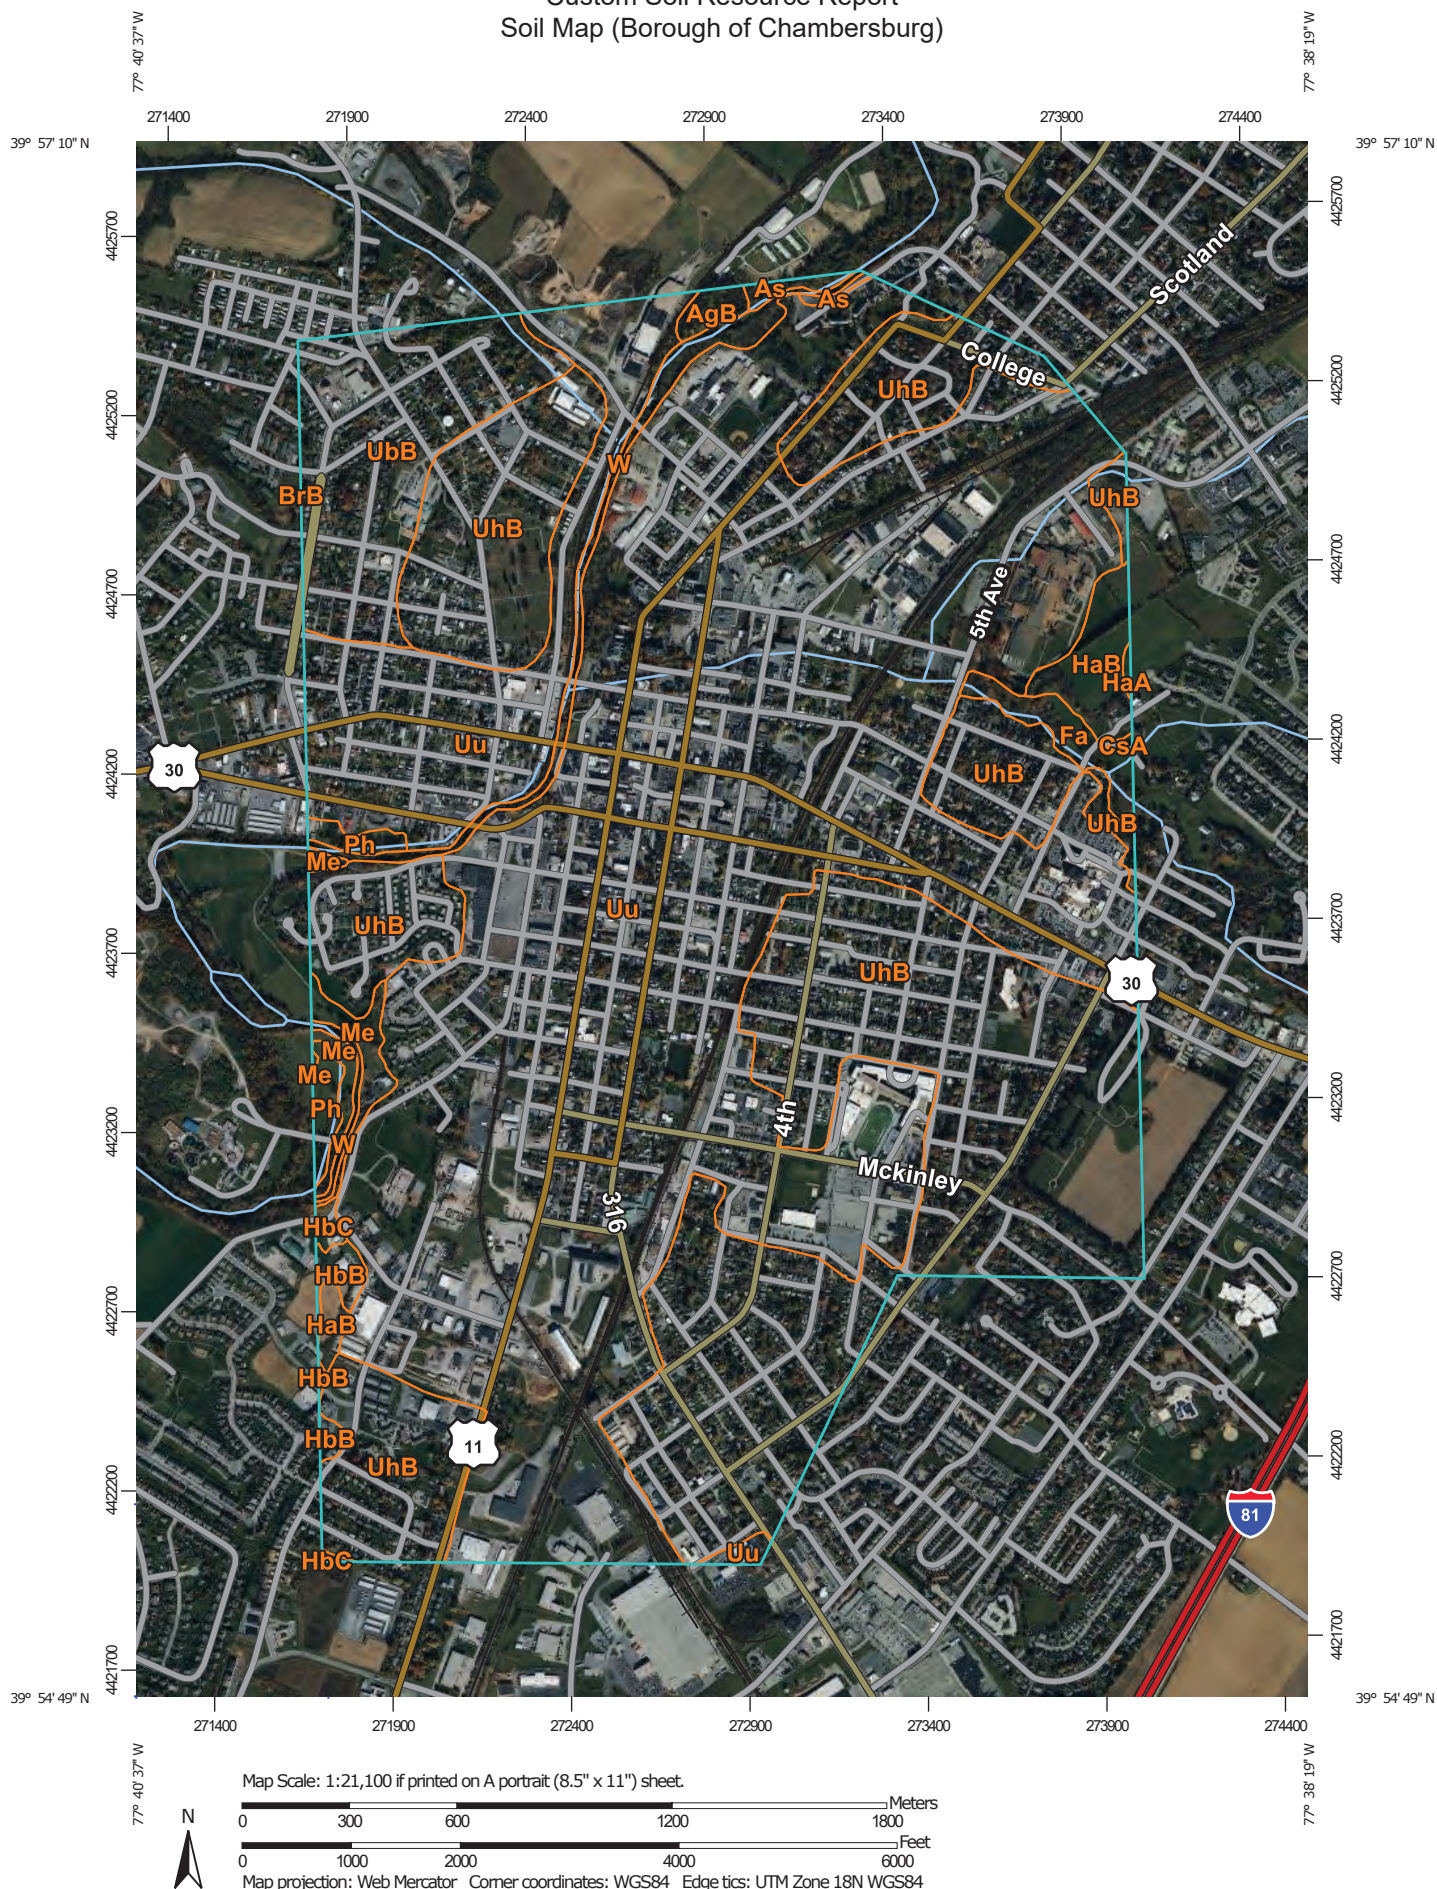

Custom Soil Resource Report

identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.

Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Franklin County, Pennsylvania
Survey Area Data: Version 17, Sep 4, 2023

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Sep 23, 2020—Nov 20, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend (Borough of Chambersburg)

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
AgB	Allegheny loam, 3 to 8 percent slopes	4.6	0.3%
As	Atkins silt loam	4.0	0.2%

Map Unit Descriptions (Borough of Chambersburg)

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic

class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

Custom Soil Resource Report

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

Franklin County, Pennsylvania

AgB—Allegheny loam, 3 to 8 percent slopes

Map Unit Setting

National map unit symbol: 19cj
Elevation: 390 to 3,000 feet
Mean annual precipitation: 36 to 55 inches
Mean annual air temperature: 46 to 59 degrees F
Frost-free period: 120 to 214 days
Farmland classification: All areas are prime farmland

Map Unit Composition

Allegheny and similar soils: 85 percent
Minor components: 15 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Allegheny

Setting

Landform: Terraces
Down-slope shape: Linear
Across-slope shape: Linear
Parent material: Old fine-loamy alluvium

Typical profile

H1 - 0 to 8 inches: loam
H2 - 8 to 42 inches: silt loam
H3 - 42 to 65 inches: gravelly loam

Properties and qualities

Slope: 3 to 8 percent
Depth to restrictive feature: More than 80 inches
Drainage class: Well drained
Runoff class: Medium
Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high
0.60 to 2.00 in/hr)
Depth to water table: More than 80 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: High (about 9.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified
Land capability classification (nonirrigated): 2e
Hydrologic Soil Group: B
Ecological site: F147XY007PA - Loamy To Coarse Terrace
Hydric soil rating: No

Minor Components

Hydric soil rating: No

As—Atkins silt loam

Map Unit Setting

National map unit symbol: I95q

Elevation: 300 to 3,000 feet

Mean annual precipitation: 30 to 65 inches

Mean annual air temperature: 44 to 59 degrees F

Frost-free period: 120 to 214 days

Farmland classification: Not prime farmland

Map Unit Composition

Atkins and similar soils: 85 percent

Minor components: 15 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Atkins

Setting

Landform: Flood plains

Landform position (two-dimensional): Toeslope

Landform position (three-dimensional): Dip

Down-slope shape: Linear

Across-slope shape: Concave

Parent material: Alluvium derived from shale and siltstone

Typical profile

H1 - 0 to 4 inches: silt loam

H2 - 4 to 40 inches: silty clay loam

H3 - 40 to 60 inches: gravelly silty clay loam

Properties and qualities

Slope: 0 to 3 percent

Depth to restrictive feature: More than 80 inches

Drainage class: Poorly drained

Runoff class: Very high

Custom Soil Resource Report

Capacity of the most limiting layer to transmit water (Ksat): Moderately low to high
0.06 to 2.00 in/hr)

Depth to water table: About 0 to 12 inches

Frequency of flooding: Frequent

Frequency of ponding: None

Available water supply, 0 to 60 inches: High (about 9.1 inches)

Interpretive groups

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 3w

Mean annual precipitation: 30 to 65 inches

Mean annual air temperature: 46 to 59 degrees F

Frost-free period: 120 to 217 days

Farmland classification: Not prime farmland

Map Unit Composition

Brinkerton and similar soils: 75 percent

Minor components: 25 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Brinkerton

Setting

Landform: Depressions
Landform position (two-dimensional): Toeslope
Landform position (three-dimensional): Base slope
Down-slope shape: Concave
Across-slope shape: Concave
Parent material: Local fine-silty colluvium derived from sedimentary rock

Typical profile

H1 - 0 to 9 inches: silt loam
H2 - 9 to 18 inches: silty clay loam
H3 - 18 to 46 inches: silty clay loam
H4 - 46 to 65 inches: channery silt loam

Properties and qualities

Slope: 3 to 8 percent
Depth to restrictive feature: 15 to 34 inches to fragipan
Drainage class: Poorly drained
Runoff class: Very high
Capacity of the most limiting layer to transmit water (Ksat): Moderately low to moderately high (0.06 to 0.20 in/hr)
Depth to water table: About 0 to 6 inches
Frequency of flooding: None
Frequency of ponding: None
Available water supply, 0 to 60 inches: Low (about 3.4 inches)

Interpretive groups

Depth to restrictive feature: 60 to 80 inches to lithic bedrock

Runoff class: Very high

Available water supply, 0 to 60 inches: Very low (about 0.0 inches)

Interpretive groups

Land capability classification (irrigated): None specified

Land capability classification (nonirrigated): 8s

Hydric soil rating: No

Description of Udorthents

Setting

Down-slope shape: Linear

Across-slope shape: Linear

Parent material: Man made and altered materials from mixed rock types

Typical profile

H1 - 0 to 4 inches: channery silty clay loam

H2 - 4 to 65 inches: channery silty clay loam

Properties and qualities

Slope: 0 to 25 percent

Depth to restrictive feature: 0 to 10 inches to

Drainage class: Well drained

Runoff class: Medium

Capacity of the most limiting layer to transmit water (Ksat): Moderately high to high
0.60 to 2.00 in/hr)

Depth to water table: More than 80 inches

Frequency of flooding: None

Frequency of ponding: None

Available water supply, 0 to 60 inches: Very low (about 0.0 inches)

Minor Components

Somewhat poorly drained soils

Percent of map unit: 5 percent

Hydric soil rating: No

Well drained soils

Percent of map unit: 5 percent

Hydric soil rating: No

W—Water

Map Unit Setting

National map unit symbol: 19br

Mean annual precipitation: 36 to 50 inches

Mean annual air temperature: 46 to 59 degrees F

Frost-free period: 120 to 214 days

Farmland classification: Not prime farmland

Map Unit Composition

Water: 100 percent

Estimates are based on observations, descriptions, and transects of the mapunit.

Description of Water

Setting

Parent material: Rivers streams ponds

Properties and qualities

Frequency of ponding: Frequent

Biological Resources

1. PROJECT INFORMATION

Project Name: **Chambersburg Pipeline Replacement**

Date of Review: **9/11/2023 08:36:36 AM**

Project Category: **Energy Storage, Production, and Transfer, Energy Transfer, Pipeline (gas, oil) - service, replace existing line**

Project Area: **29.11 acres**

County(s): **Franklin**

Township/Municipality(s): **CHAMBERSBURG**

ZIP Code:

Quadrangle Name(s): **CHAMBERSBURG**

Watersheds HUC 8: **Conococheague-Opequon**

Watersheds HUC 12: **Falling Spring Branch-Conococheague Creek; Mountain Creek-Conococheague Creek**

Decimal Degrees: **39.944409, -77.656518**

Degrees Minutes Seconds: **39° 56' 39.8732" N, 77° 39' 23.4655" W**

2. SEARCH RESULTS

Agency	Results	Response
PA Game Commission	No Known Impact	No Further Review Required
PA Department of Conservation and Natural Resources	No Known Impact	No Further Review Required
PA Fish and Boat Commission	No Known Impact	No Further Review Required
U.S. Fish and Wildlife Service	No Known Impact	No Further Review Required

As summarized above, Pennsylvania Natural Diversity Inventory (PNDI) records indicate no known impacts to threatened and endangered species and/or special concern species and resources within the project area. Therefore, based on the information you provided, no further coordination is required with the jurisdictional agencies. This response does not reflect potential agency concerns regarding impacts to other ecological resources, such as wetlands.

3. AGENCY COMMENTS

Regardless of whether a DEP permit is necessary for this proposed project, any potential impacts to threatened and endangered species and/or special concern species and resources must be resolved with the appropriate jurisdictional agency. In some cases, a permit or authorization from the jurisdictional agency may be needed if adverse impacts to these species and habitats cannot be avoided.

These agency determinations and responses are **valid for two years** (from the date of the review), and are based on the project information that was provided, including the exact project location; the project type, description, and features; and any responses to questions that were generated during this search. If any of the following change: 1) project location, 2) project size or configuration, 3) project type, or 4) responses to the questions that were asked during the online review, the results of this review are not valid, and the review must be searched again via the PNDI Environmental Review Tool and resubmitted to the jurisdictional agencies. The PNDI tool is a primary screening tool, and a desktop review may reveal more or fewer impacts than what is listed on this PNDI receipt. The jurisdictional agencies **strongly advise against** conducting surveys for the species listed on the receipt prior to consultation with the agencies.

PA Game Commission

RESPONSE:

No Impact is anticipated to threatened and endangered species and/or special concern species and resources.

PA Department of Conservation and Natural Resources

RESPONSE:

No Impact is anticipated to threatened and endangered species and/or special concern species and resources.

PA Fish and Boat Commission

RESPONSE:

No Impact is anticipated to threatened and endangered species and/or special concern species and resources.

U.S. Fish and Wildlife Service

RESPONSE:

No impacts to **federally** listed or proposed species are anticipated. Therefore, no further consultation/coordination under the Endangered Species Act (87 Stat. 884, as amended; 16 U.S.C. 1531 et seq. is required. Because no take of federally listed species is anticipated, none is authorized. This response does not reflect potential Fish and Wildlife Service concerns under the Fish and Wildlife Coordination Act or other authorities.

4. DEP INFORMATION

The Pa Department of Environmental Protection (DEP) requires that a signed copy of this receipt, along with any required documentation from jurisdictional agencies concerning resolution of potential impacts, be submitted with applications for permits requiring PNDI review. Two review options are available to permit applicants for handling PNDI coordination in conjunction with DEP's permit review process involving either T&E Species or species of special concern. Under sequential review, the permit applicant performs a PNDI screening and completes all coordination with the appropriate jurisdictional agencies prior to submitting the permit application. The applicant will include with its application, both a PNDI receipt and/or a clearance letter from the jurisdictional agency if the PNDI Receipt shows a Potential Impact to a species or the applicant chooses to obtain letters directly from the jurisdictional agencies. Under concurrent review, DEP, where feasible, will allow technical review of the permit to occur concurrently with the T&E species consultation with the jurisdictional agency. The applicant must still supply a copy of the PNDI Receipt with its permit application. The PNDI Receipt should also be submitted to the appropriate agency according to directions on the PNDI Receipt. The applicant and the jurisdictional agency will work together to resolve the potential impact(s). See the DEP PNDI policy at <https://conservationexplorer.dcnr.pa.gov/content/resources>.

5. ADDITIONAL INFORMATION

The PNDI environmental review website is a preliminary screening tool. There are often delays in updating species status classifications. Because the proposed status represents the best available information regarding the conservation status of the species, state jurisdictional agency staff give the proposed statuses at least the same consideration as the current legal status. If surveys or further information reveal that a threatened and endangered and/or special concern species and resources exist in your project area, contact the appropriate jurisdictional agency/agencies immediately to identify and resolve any impacts.

For a list of species known to occur in the county where your project is located, please see the species lists by county found on the PA Natural Heritage Program (PNHP) home page (www.naturalheritage.state.pa.us). Also note that the PNDI Environmental Review Tool only contains information about species occurrences that have actually been reported to the PNHP.

Subject: PNDI

Good Morning,

I am reaching out to for confirmation regarding the PNDI Project Reviews.

If a Project is ran through the PNDI system, resulting in a "No Further Review Required" from the US Fish and Wildlife Service, does that constitute clearance for Section 7 consultation under NEPA?

V/r,

Joseph P. Kempf, MD Qualified Professional

In Reply Refer To:

August 28, 2023

Project Code: 2023-0121621

Project Name: Borough of Chambersburg Natural Gas Pipeline Resiliency Project - Phase I

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf>

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts see <https://www.fws.gov/program/migratory-bird-permit/what-we-do>.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures see <https://www.fws.gov/library/collections/threats-birds>.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/partner/council-conservation-migratory-birds>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

PROJECT SUMMARY

Project Code: 2023-0121621

Project Name: Borough of Chambersburg Natural Gas Pipeline Resiliency Project - Phase I

Project Type: Operations and Maintenance - Natural Gas Distribution Facilities

Project Description: The trenching of and replacement of natural gas main lines within the Borough of Chambersburg. These lines exist below existing paved roadways.

Project Location:

The approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@39.9390151,-77.66656679999998,14z>

Counties: Franklin County, Pennsylvania

ENDANGERED SPECIES ACT SPECIES

There is a total of 6 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

MAMMALS

NAME	STATUS
Indiana Bat <i>Myotis sodalis</i> There is final critical habitat for this species. Your location does not overlap the critical habitat. Species profile: https://ecos.fws.gov/ecp/species/5949	Endangered
Northern Long-eared Bat <i>Myotis septentrionalis</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9045	Endangered
Tricolored Bat <i>Perimyotis subflavus</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/10515	Proposed Endangered

CLAMS

NAME	STATUS
Green Floater <i>Lasmigona subviridis</i> There is proposed critical habitat for this species. Species profile: https://ecos.fws.gov/ecp/species/7541	Proposed Threatened

INSECTS

NAME	STATUS
Monarch Butterfly <i>Danaus plexippus</i> No critical habitat has been designated for this species. Species profile: https://ecos.fws.gov/ecp/species/9743	Candidate

FLOWERING PLANTS

NAME	STATUS
Northeastern Bulrush <i>Scirpus ancistrochaetus</i>	Endangered
Population:	
No critical habitat has been designated for this species.	
Species profile: https://ecos.fws.gov/ecp/species/6715	

CRITICAL HABITATS

THERE ARE NO CRITICAL HABITATS WITHIN YOUR PROJECT AREA UNDER THIS OFFICE'S JURISDICTION.

YOU ARE STILL REQUIRED TO DETERMINE IF YOUR PROJECT(S) MAY HAVE EFFECTS ON ALL ABOVE LISTED SPECIES.

USFWS NATIONAL WILDLIFE REFUGE LANDS AND FISH HATCHERIES

Any activity proposed on lands managed by the [National Wildlife Refuge](#) system must undergo a 'Compatibility Determination' conducted by the Refuge. Please contact the individual Refuges to discuss any questions or concerns.

THERE ARE NO REFUGE LANDS OR FISH HATCHERIES WITHIN YOUR PROJECT AREA.

MIGRATORY BIRDS

Certain birds are protected under the Migratory Bird Treaty Act¹ and the Bald and Golden Eagle Protection Act².

Any person or organization who plans or conducts activities that may result in impacts to migratory birds, eagles, and their habitats should follow appropriate regulations and consider implementing appropriate conservation measures, as described [below](#).

-
1. The [Migratory Birds Treaty Act](#) of 1918.
 2. The [Bald and Golden Eagle Protection Act](#) of 1940.
 3. 50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)

MIGRATORY BIRD INFORMATION WAS NOT AVAILABLE WHEN THIS SPECIES LIST WAS GENERATED. PLEASE CONTACT THE FIELD OFFICE FOR FURTHER INFORMATION.

MIGRATORY BIRDS FAQ

Tell me more about conservation measures I can implement to avoid or minimize impacts to migratory birds.

[Nationwide Conservation Measures](#) describes measures that can help avoid and minimize impacts to all birds at any location year round. Implementation of these measures is particularly important when birds are most likely to occur in the project area. When birds may be breeding in

the area, identifying the locations of any active nests and avoiding their destruction is a very helpful impact minimization measure. To see when birds are most likely to occur and be breeding in your project area, view the Probability of Presence Summary. [Additional measures](#) or [permits](#) may be advisable depending on the type of activity you are conducting and the type of infrastructure or bird species present on your project site.

What does IPaC use to generate the list of migratory birds that potentially occur in my specified location?

The Migratory Bird Resource List is comprised of USFWS [Birds of Conservation Concern \(BCC\)](#) and other species that may warrant special attention in your project location.

The migratory bird list generated for your project is derived from data provided by the [Avian Knowledge Network \(AKN\)](#). The AKN data is based on a growing collection of [survey, banding, and citizen science datasets](#) and is queried and filtered to return a list of those birds reported as occurring in the 10km grid cell(s) which your project intersects, and that have been identified as warranting special attention because they are a BCC species in that area, an eagle ([Eagle Act](#) requirements may apply), or a species that has a particular vulnerability to offshore activities or development.

Again, the Migratory Bird Resource list includes only a subset of birds that may occur in your project area. It is not representative of all birds that may occur in your project area. To get a list of all birds potentially present in your project area, please visit the [Rapid Avian Information Locator \(RAIL\) Tool](#).

What does IPaC use to generate the probability of presence graphs for the migratory birds potentially occurring in my specified location?

The probability of presence graphs associated with your migratory bird list are based on data provided by the [Avian Knowledge Network \(AKN\)](#). This data is derived from a growing collection of [survey, banding, and citizen science datasets](#).

Probability of presence data is continuously being updated as new and better information becomes available. To learn more about how the probability of presence graphs are produced and how to interpret them, go the Probability of Presence Summary and then click on the "Tell me about these graphs" link.

How do I know if a bird is breeding, wintering or migrating in my area?

To see what part of a particular bird's range your project area falls within (i.e. breeding, wintering, migrating or year-round), you may query your location using the [RAIL Tool](#) and look at the range maps provided for birds in your area at the bottom of the profiles provided for each bird in your results. If a bird on your migratory bird species list has a breeding season associated with it, if that bird does occur in your project area, there may be nests present at some point within the timeframe specified. If "Breeds elsewhere" is indicated, then the bird likely does not breed in your project area.

What are the levels of concern for migratory birds?

Migratory birds delivered through IPaC fall into the following distinct categories of concern:

1. "BCC Rangewide" birds are [Birds of Conservation Concern](#) (BCC) that are of concern throughout their range anywhere within the USA (including Hawaii, the Pacific Islands, Puerto Rico, and the Virgin Islands);
2. "BCC - BCR" birds are BCCs that are of concern only in particular Bird Conservation Regions (BCRs) in the continental USA; and
3. "Non-BCC - Vulnerable" birds are not BCC species in your project area, but appear on your list either because of the [Eagle Act](#) requirements (for eagles) or (for non-eagles) potential susceptibilities in offshore areas from certain types of development or activities (e.g. offshore energy development or longline fishing).

Although it is important to try to avoid and minimize impacts to all birds, efforts should be made, in particular, to avoid and minimize impacts to the birds on this list, especially eagles and BCC species of rangewide concern. For more information on conservation measures you can implement to help avoid and minimize migratory bird impacts and requirements for eagles, please see the FAQs for these topics.

Details about birds that are potentially affected by offshore projects

For additional details about the relative occurrence and abundance of both individual bird species and groups of bird species within your project area off the Atlantic Coast, please visit the [Northeast Ocean Data Portal](#). The Portal also offers data and information about other taxa besides birds that may be helpful to you in your project review. Alternately, you may download the bird model results files underlying the portal maps through the [NOAA NCCOS Integrative Statistical Modeling and Predictive Mapping of Marine Bird Distributions and Abundance on the Atlantic Outer Continental Shelf](#) project webpage.

Bird tracking data can also provide additional details about occurrence and habitat use throughout the year, including migration. Models relying on survey data may not include this information. For additional information on marine bird tracking data, see the [Diving Bird Study](#) and the [nanotag studies](#) or contact [Caleb Spiegel](#) or [Pam Loring](#).

What if I have eagles on my list?

If your project has the potential to disturb or kill eagles, you may need to [obtain a permit](#) to avoid violating the Eagle Act should such impacts occur.

Proper Interpretation and Use of Your Migratory Bird Report

The migratory bird list generated is not a list of all birds in your project area, only a subset of birds of priority concern. To learn more about how your list is generated, and see options for identifying what other birds may be in your project area, please see the FAQ "What does IPaC use to generate the migratory birds potentially occurring in my specified location". Please be aware this report provides the "probability of presence" of birds within the 10 km grid cell(s) that overlap your project; not your exact project footprint. On the graphs provided, please also look carefully at the survey effort (indicated by the black vertical bar) and for the existence of the "no data" indicator (a red horizontal bar). A high survey effort is the key component. If the survey effort is high, then the probability of presence score can be viewed as more dependable. In contrast, a low survey effort bar or no data bar means a lack of data and, therefore, a lack of

certainty about presence of the species. This list is not perfect; it is simply a starting point for identifying what birds of concern have the potential to be in your project area, when they might be there, and if they might be breeding (which means nests might be present). The list helps you know what to look for to confirm presence, and helps guide you in knowing when to implement conservation measures to avoid or minimize potential impacts from your project activities, should presence be confirmed. To learn more about conservation measures, visit the FAQ "Tell me about conservation measures I can implement to avoid or minimize impacts to migratory birds" at the bottom of your migratory bird trust resources page.

WETLANDS

Impacts to [NWI wetlands](#) and other aquatic habitats may be subject to regulation under Section 404 of the Clean Water Act, or other State/Federal statutes.

For more information please contact the Regulatory Program of the local [U.S. Army Corps of Engineers District](#).

Please note that the NWI data being shown may be out of date. We are currently working to update our NWI data set. We recommend you verify these results with a site visit to determine the actual extent of wetlands on site.

THERE ARE NO WETLANDS WITHIN YOUR PROJECT AREA.

Section 106 Consultation: PHMSA Pipeline Replacement Project in the Borough of Chambersburg (ER # 2023PR04044)

Grant Recipient: Chambersburg Gas Department

Project Location: Borough of Chambersburg, Pennsylvania

Dear Emma Diehl:

The Pipeline and Hazardous Materials Safety Administration (PHMSA) provides funds authorized under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program. PHMSA proposes to provide funds to the Chambersburg Gas Department (Grant Recipient) for the replacement of pipeline (Undertaking). PHMSA is initiating consultation for the above referenced Undertaking in accordance with Section 106 of the National Historic Preservation Act of 1966, as amended, and the associated implementing regulations, 36 CFR Part 800 (Section 106).

On August 18, 2023, the Grant Recipient submitted this undertaking to the Pennsylvania State Historic Preservation Office (PA SHPO) for review under ER # 2023PR04044. The PA SHPO concurred with a finding of No Adverse Effect on above-ground historic properties and No Effect on below-ground historic properties. PHMSA has not delegated Section 106 consultation and is therefore resubmitting this undertaking for Section 106 review as the federal agency.

Project Description/Background

The Grant Recipient is proposing to replace cast iron and unprotected steel gas mains. The Undertaking will replace 18,469 feet (ft.) or approximately 3.5 miles of pipe with polyethylene (PE) plastic mains. Additionally, the Grant Recipient will replace every existing steel service line within its footprint along the streets where mains will be replaced. The existing mains are located entirely within public right-of-way (ROW).

The Undertaking will take place at various locations within the Borough of Chambersburg. Cut and cover (trenching) and pipe insertion methods will be used to replace the mains. Ground disturbance will occur entirely within existing road ROW, beneath the paved road. There will be no modifications to buildings or structures, or construction or installation of any aboveground components. The Grant Recipient will abandon some of the existing pipeline (versus excavation and removal), which will minimize ground disturbance. The total depth of excavation is 48 inches (in.) below grade by 24 in. wide.

The staging and material storage areas for the project will be located at the Customer Service Center (80 S. Franklin Street) and the Wayne Avenue Reg Station (across from 307 Wayne Avenue). Both areas are currently utilized for staging and material storage. Project location maps are enclosed in **Attachment A**. Photographs showing the overall character of the project areas are included in **Attachment B**.

Area of Potential Effects (APE)

Pursuant to 36 CFR 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the Undertaking may directly or indirectly affect historic resources. Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, PHMSA has delineated the APE for this Undertaking to encompass the existing ROW, which includes the limits of disturbance and the limits of any potential vibration effects during construction. The APE extends to the depth of proposed ground disturbance of up to 48 in. below grade. The Undertaking does not have the potential to cause visual or audible effects after the completion of construction. The existing ROW encompasses various roads, signage, sidewalks, and grassy areas throughout the Borough of Chambersburg. The APE is shown on the maps in **Attachment A**.

Identification and Evaluation

To identify historic properties in the APE, individuals who meet the Secretary of the Interior's (SOI) Professional Qualification Standards reviewed available information on previously identified historic properties in the APE, including the National Register of Historic Places (NRHP) database and data gathered from the PA SHPO's database (PA-SHARE). SOI-qualified individuals also conducted research to determine if there are any previously unidentified properties within the APE that are 45 years of age or older and may be eligible for the NRHP.

Historic Architecture

The Chambersburg Historic District (1980RE00652), which is listed in the NRHP, is the only historic property located within the APE. The location of the district is shown on the APE map in **Attachment A**.

The significance of the Chambersburg Historic District relates primarily to the Borough's civil war history as it was occupied by Confederate soldiers in 1862, 1863, and 1864, and it was the only major northern city burned by Confederate forces. Chambersburg's downtown streetscapes offer the opportunity for visual comparisons of a rapidly reconstructed area to those areas resulting from the first occupation as well as to later 19th century growth. Moreover, these comparisons are easily made because 20th century growth in Chambersburg has not been accompanied by mass demolition and therefore the architectural assemblage not only reflects its civil war heritage, but also contains significant vestiges of a major 18th century agricultural community and a post-civil war industrial town based upon supplies of charcoal and iron ore.

Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, the identification effort for previously unidentified above-ground historic properties focused on identifying properties that are susceptible to the vibration effects of pipeline replacement and could experience diminished integrity as a result of the Undertaking. A review of the APE found no additional above-ground resources that have the potential to be affected by the Undertaking.

In a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Adverse Effect on the Chambersburg Historic District. This letter is included as **Attachment C**.

Archeology

A small portion of the southern part of the APE crosses the Virginia Path (2019RE06606), which has not been evaluated for eligibility for inclusion on the NRHP. A description of the Virginia Path in PA-SHARE says, "The 'Great Trail,' which ran from the site of Harris' Ferry to the Potomac, was the most eastern war path of the Iroquois into the Carolinas and was used by the warriors of the Confederation in their expeditions

against the Cherokee and Catawba, and was likewise used by these southern tribes in their northward expeditions." (History of Cumberland Valley in Pennsylvania, George P. Donahoo). Historic aerial photographs from 1957 and 1989 were examined for archeological resource potential within the APE. Aerial photographs show numerous historic structures and development such as schools, churches, businesses, municipal buildings that are located within and adjacent to the APE. A review of Google Streetview shows that many of these structures are still standing today.

An examination of Web Soil Survey data within the APE reveals 2 soil classes including Urban land-Hagerstown complex with a 0 to 8 percent slope and Urban land-Udorthents complex with a 0 to 25 percent slope. Typically slopes greater than 15 percent are not suitable for human occupation, and soil types within the APE vary from 0 to 25 percent slope. The APE is comprised of nearly all well drained soils indicating suitable conditions for human habitation in both the pre-contact and historic periods. However, Urban land soils are typically areas of largely built environment that have been disturbed by capping or filling and areas that are covered by buildings and pavement.

While archeological deposits associated with expeditions of pre-historic people and historic structures associated with the civil war era of the Borough of Chambersburg may exist within the APE, the Undertaking is occurring within the ROW, which contains roads, sidewalks and previously installed utilities. Examination of historic aerials and soils within the APE indicates that the undertaking will take place within soils that have likely been disturbed by construction of infrastructure. While factors may suggest a potential for archeological deposits within the portion of the APE that is within the Virginia Path, the Undertaking will occur within previous road construction and utility installation corridors. Most of the project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. Furthermore, in a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Effect on archaeological resources. This letter is included as **Attachment C**.

Determination of Effect

Based on the aforementioned identification and evaluation, PHMSA has determined that there is one historic property as defined in 36 CFR 800.16(l) within the APE: Chambersburg Historic District, which is listed in the NRHP.

While the NRHP-listed historic property is located in the APE, the Undertaking will not alter any of the characteristics or contributing features of this historic property that qualify it for inclusion in the NRHP in a manner that would diminish its integrity. No character-defining materials or features will be removed or altered as a result of the Undertaking. Therefore, the Undertaking does not have the potential to adversely affect the identified above-ground historic property. Project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. The Undertaking will not result in lasting physical, visual, or audible effects to NRHP-listed historic properties. The Undertaking also does not include land acquisition, nor would it limit access to or change the use of the historic property identified above.

In accordance with 36 CFR Part 800.5, PHMSA has determined the Undertaking will have No Adverse Effect on historic properties.

Consulting Party Outreach

PHMSA identified parties that may be interested in the Project and its effects on historic properties. PHMSA invites the individuals/organizations copied on this letter to participate as Section 106 consulting parties. Invited parties should indicate their willingness to participate as a consulting party and provide comments on the enclosed form (**Attachment D**) within 30 calendar days from the date on this letter. Note that a non-response is considered to be a declination to participate; however, interested parties can request to join

consultation at any time in the process. If any invited party expresses concern about the Project's potential effects to historic properties, PHMSA will consult with the party to resolve those concerns prior to project implementation.

PHMSA will also invite the following federally recognized tribes to participate in consultation by separate letter:

- Delaware Nation
- Delaware Tribe of Indians
- Tuscarora Nation

Request for Section 106 Concurrence

Based on the information presented above, PHMSA has determined that the Undertaking will result in No Adverse Effect to properties that are either in, or eligible for inclusion in, the NRHP. PHMSA is submitting this Undertaking to your office for your review and comment. PHMSA requests your concurrence with this determination of effect within 30 calendar days of the date of this letter. Should you need additional information please contact Kat Giraldo, Section 106 specialist, at PHMSASection106@dot.gov or 857-320-1359.

Sincerely,

Matt Fuller

Pennsylvania State Historic Preservation Office

PENNSYLVANIA HISTORICAL AND MUSEUM COMMISSION

August 21, 2023

Joseph Kempf
BL Companies
2601 Market Place
Suite 350
Harrisburg PA 17110

RE: ER Project # 2023PR04044.001, Borough of Chambersburg Pipeline Resiliency Project - Phase I, Department of Transportation (PennDOT), Chambersburg Borough, Franklin County

Dear Joseph Kempf:

Thank you for submitting information concerning the above referenced project. The Pennsylvania State Historic Preservation Office (PA SHPO) reviews projects in accordance with state and federal laws. Section 106 of the National Historic Preservation Act of 1966, and the implementing regulations (36 CFR Part 800) of the Advisory Council on Historic Preservation, is the primary federal legislation. The Environmental Rights amendment, Article 1, Section 27 of the Pennsylvania Constitution and the Pennsylvania History Code, 37 Pa. Cons. Stat. Section 500 et seq. (1988) is the primary state legislation. These laws include consideration of the project's potential effects on both historic and archaeological resources.

Above Ground Resources

No Above Ground Concerns - Environmental Review - No Adverse Effect - Above Ground

Based on the information received and available within our files, in our opinion, the proposed project will have No Adverse Effect on the following historic properties: Chambersburg Historic District, 1980RE00652. Should the scope of the project change and/or should you be made aware of historic property concerns, you will need to reinitiate consultation with our office using PA-SHARE.

For questions concerning above ground resources, please contact John Gardosik at jgardosik@pa.gov.

Archaeological Resources

No Archaeological Concerns - Environmental Review - No Effect - Archaeological

Based on the information received and available in our files, in our opinion, the proposed project should have No Effect on archaeological resources. Our analysis indicates that archaeological resources are potentially located in this project area. Should the scope of the project be amended to include additional ground-disturbing activity and/or should you be made aware of historic property concerns, you will need to reinitiate consultation with

our office using PA-SHARE.

For questions concerning archaeological resources, please contact John Gardosik at jgardosik@pa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Emma Diehl". The signature is fluid and cursive, with a long horizontal stroke at the end.

Emma Diehl
Environmental Review Division Manager

Section 106 Consultation: PHMSA Pipeline Replacement Project in the Borough of Chambersburg
Grant Recipient: Chambersburg Gas Department
Project Location: Borough of Chambersburg, Pennsylvania

Dear President Dotson:

The Pipeline and Hazardous Materials Safety Administration (PHMSA) provides funds authorized under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program. PHMSA proposes to provide funds to the Chambersburg Gas Department (Grant Recipient) for the replacement of pipeline (Undertaking). PHMSA is initiating consultation for the above referenced Undertaking in accordance with Section 106 of the National Historic Preservation Act of 1966, as amended, and the associated implementing regulations, 36 CFR Part 800 (Section 106). The purpose of this letter is to initiate Section 106 consultation for the Project to determine if there are historic properties of cultural or religious significance to your Tribe/Nation that may be affected by the Project, to determine if you want to be a consulting party, and/or to notify your Tribe/Nation of PHMSA's intention to make a finding of No Adverse Effect to Historic Properties. PHMSA is also available for Government-to-Government consultation on this Program.

On August 18, 2023, the Grant Recipient submitted this undertaking to the Pennsylvania State Historic Preservation Office (PA SHPO) for review under ER # 2023PR04044. The PA SHPO concurred with a finding of No Adverse Effect on above-ground historic properties and No Effect on below-ground historic properties. PHMSA has not delegated Section 106 consultation and has therefore resubmitting this undertaking to PA SHPO for Section 106 review as the federal agency.

Project Description/Background

The Grant Recipient is proposing to replace cast iron and unprotected steel gas mains. The Undertaking will replace 18,469 feet (ft.) or approximately 3.5 miles of pipe with polyethylene (PE) plastic mains. Additionally, the Grant Recipient will replace every existing steel service line within its footprint along the streets where mains will be replaced. The existing mains are located entirely within public right-of-way (ROW).

The Undertaking will take place at various locations within the Borough of Chambersburg. Cut and cover (trenching) and pipe insertion methods will be used to replace the mains. Ground disturbance will occur

entirely within existing road ROW, beneath the paved road. There will be no modifications to buildings or structures, or construction or installation of any aboveground components. The Grant Recipient will abandon some of the existing pipeline (versus excavation and removal), which will minimize ground disturbance. The total depth of excavation is 48 inches (in.) below grade by 24 in. wide.

The staging and material storage areas for the project will be located at the Customer Service Center (80 S. Franklin Street) and the Wayne Avenue Reg Station (across from 307 Wayne Avenue). Both areas are currently utilized for staging and material storage. Project location maps are enclosed in **Attachment A**. Photographs showing the overall character of the project areas are included in **Attachment B**.

Area of Potential Effects (APE)

Pursuant to 36 CFR 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the Undertaking may directly or indirectly affect historic resources. Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, PHMSA has delineated the APE for this Undertaking to encompass the existing ROW, which includes the limits of disturbance and the limits of any potential vibration effects during construction. The APE extends to the depth of proposed ground disturbance of up to 48 in. below grade. The Undertaking does not have the potential to cause visual or audible effects after the completion of construction. The existing ROW encompasses various roads, signage, sidewalks, and grassy areas throughout the Borough of Chambersburg. The APE is shown on the maps in **Attachment A**.

Identification and Evaluation

To identify historic properties in the APE, individuals who meet the Secretary of the Interior's (SOI) Professional Qualification Standards reviewed available information on previously identified historic properties in the APE, including the National Register of Historic Places (NRHP) database and data gathered from the PA SHPO's database (PA-SHARE). SOI-qualified individuals also conducted research to determine if there are any previously unidentified properties within the APE that are 45 years of age or older and may be eligible for the NRHP.

Historic Architecture

The Chambersburg Historic District (1980RE00652), which is listed in the NRHP, is the only historic property located within the APE. The location of the district is shown on the APE map in **Attachment A**.

The significance of the Chambersburg Historic District relates primarily to the Borough's civil war history as it was occupied by Confederate soldiers in 1862, 1863, and 1864, and it was the only major northern city burned by Confederate forces. Chambersburg's downtown streetscapes offer the opportunity for visual comparisons of a rapidly reconstructed area to those areas resulting from the first occupation as well as to later 19th century growth. Moreover, these comparisons are easily made because 20th century growth in Chambersburg has not been accompanied by mass demolition and therefore the architectural assemblage not only reflects its civil war heritage, but also contains significant vestiges of a major 18th century agricultural community and a post-civil war industrial town based upon supplies of charcoal and iron ore.

Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, the identification effort for previously unidentified above-ground historic properties focused on identifying properties that are susceptible to the vibration effects of pipeline replacement and could experience diminished integrity as a result of the Undertaking. A review of the APE found no additional above-ground resources that have the potential to be affected by the Undertaking.

In a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Adverse Effect on the Chambersburg Historic District. This letter is included as **Attachment C**.

Archeology

A small portion of the southern part of the APE crosses the Virginia Path (2019RE06606), which has not been evaluated for eligibility for inclusion on the NRHP. A description of the Virginia Path in PA-SHARE says, "The 'Great Trail,' which ran from the site of Harris' Ferry to the Potomac, was the most eastern war path of the Iroquois into the Carolinas and was used by the warriors of the Confederation in their expeditions against the Cherokee and Catawba, and was likewise used by these southern tribes in their northward expeditions." (History of Cumberland Valley in Pennsylvania, George P. Donahoo). Historic aerial photographs from 1957 and 1989 were examined for archeological resource potential within the APE. Aerial photographs show numerous historic structures and development such as schools, churches, businesses, municipal buildings that are located within and adjacent to the APE. A review of Google Streetview shows that many of these structures are still standing today.

An examination of Web Soil Survey data within the APE reveals 2 soil classes including Urban land-Hagerstown complex with a 0 to 8 percent slope and Urban land-Udorthents complex with a 0 to 25 percent slope. Typically slopes greater than 15 percent are not suitable for human occupation, and soil types within the APE vary from 0 to 25 percent slope. The APE is comprised of nearly all well drained soils indicating suitable conditions for human habitation in both the pre-contact and historic periods. However, Urban land soils are typically areas of largely built environment that have been disturbed by capping or filling and areas that are covered by buildings and pavement.

While archeological deposits associated with expeditions of pre-historic people and historic structures associated with the civil war era of the Borough of Chambersburg may exist within the APE, the Undertaking is occurring within the ROW, which contains roads, sidewalks and previously installed utilities. Examination of historic aerials and soils within the APE indicates that the undertaking will take place within soils that have likely been disturbed by construction of infrastructure. While factors may suggest a potential for archeological deposits within the portion of the APE that is within the Virginia Path, the Undertaking will occur within previous road construction and utility installation corridors. Most of the project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. Furthermore, in a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Effect on archaeological resources. This letter is included as **Attachment C**.

Determination of Effect

Based on the aforementioned identification and evaluation, PHMSA has determined that there is one historic property as defined in 36 CFR 800.16(l) within the APE: Chambersburg Historic District, which is listed in the NRHP.

While the NRHP-listed historic property is located in the APE, the Undertaking will not alter any of the characteristics or contributing features of this historic property that qualify it for inclusion in the NRHP in a manner that would diminish its integrity. No character-defining materials or features will be removed or altered as a result of the Undertaking. Therefore, the Undertaking does not have the potential to adversely affect the identified above-ground historic property. Project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. The Undertaking will not result in lasting physical, visual, or audible effects to NRHP-listed historic properties. The Undertaking also does not include land acquisition, nor would it limit access to or change the use of the historic property identified above.

In accordance with 36 CFR Part 800.5, PHMSA has determined the Undertaking will have No Adverse Effect on historic properties.

Request for Section 106 Concurrence

PHMSA requests that you provide any information you have regarding historic properties of religious or cultural significance to your Tribe/Nation that may be present in the APE and affected by the Project. If your Tribe/Nation is unaware of any historic properties beyond what we have identified to date, PHMSA is notifying your Tribe/Nation of our intention to make a No Adverse Effect to Historic Properties finding. Please notify us within 30 days from the date of receipt of this letter if you have any concerns about the project's effects to historic properties. Should you need additional information please contact Kat Giraldo, Section 106 specialist, at PHMSASection106@dot.gov or 857-320-1359.

Sincerely,

Matt Fuller

Section 106 Consultation: PHMSA Pipeline Replacement Project in the Borough of Chambersburg
Grant Recipient: Chambersburg Gas Department
Project Location: Borough of Chambersburg, Pennsylvania

Dear Chief Killscrow:

The Pipeline and Hazardous Materials Safety Administration (PHMSA) provides funds authorized under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program. PHMSA proposes to provide funds to the Chambersburg Gas Department (Grant Recipient) for the replacement of pipeline (Undertaking). PHMSA is initiating consultation for the above referenced Undertaking in accordance with Section 106 of the National Historic Preservation Act of 1966, as amended, and the associated implementing regulations, 36 CFR Part 800 (Section 106). The purpose of this letter is to initiate Section 106 consultation for the Project to determine if there are historic properties of cultural or religious significance to your Tribe/Nation that may be affected by the Project, to determine if you want to be a consulting party, and/or to notify your Tribe/Nation of PHMSA's intention to make a finding of No Adverse Effect to Historic Properties. PHMSA is also available for Government-to-Government consultation on this Program.

On August 18, 2023, the Grant Recipient submitted this undertaking to the Pennsylvania State Historic Preservation Office (PA SHPO) for review under ER # 2023PR04044. The PA SHPO concurred with a finding of No Adverse Effect on above-ground historic properties and No Effect on below-ground historic properties. PHMSA has not delegated Section 106 consultation and has therefore resubmitting this undertaking to PA SHPO for Section 106 review as the federal agency.

Project Description/Background

The Grant Recipient is proposing to replace cast iron and unprotected steel gas mains. The Undertaking will replace 18,469 feet (ft.) or approximately 3.5 miles of pipe with polyethylene (PE) plastic mains. Additionally, the Grant Recipient will replace every existing steel service line within its footprint along the streets where mains will be replaced. The existing mains are located entirely within public right-of-way (ROW).

The Undertaking will take place at various locations within the Borough of Chambersburg. Cut and cover (trenching) and pipe insertion methods will be used to replace the mains. Ground disturbance will occur entirely within existing road ROW, beneath the paved road. There will be no modifications to buildings or

structures, or construction or installation of any aboveground components. The Grant Recipient will abandon some of the existing pipeline (versus excavation and removal), which will minimize ground disturbance. The total depth of excavation is 48 inches (in.) below grade by 24 in. wide.

The staging and material storage areas for the project will be located at the Customer Service Center (80 S. Franklin Street) and the Wayne Avenue Reg Station (across from 307 Wayne Avenue). Both areas are currently utilized for staging and material storage. Project location maps are enclosed in **Attachment A**. Photographs showing the overall character of the project areas are included in **Attachment B**.

Area of Potential Effects (APE)

Pursuant to 36 CFR 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the Undertaking may directly or indirectly affect historic resources. Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, PHMSA has delineated the APE for this Undertaking to encompass the existing ROW, which includes the limits of disturbance and the limits of any potential vibration effects during construction. The APE extends to the depth of proposed ground disturbance of up to 48 in. below grade. The Undertaking does not have the potential to cause visual or audible effects after the completion of construction. The existing ROW encompasses various roads, signage, sidewalks, and grassy areas throughout the Borough of Chambersburg. The APE is shown on the maps in **Attachment A**.

Identification and Evaluation

To identify historic properties in the APE, individuals who meet the Secretary of the Interior's (SOI) Professional Qualification Standards reviewed available information on previously identified historic properties in the APE, including the National Register of Historic Places (NRHP) database and data gathered from the PA SHPO's database (PA-SHARE). SOI-qualified individuals also conducted research to determine if there are any previously unidentified properties within the APE that are 45 years of age or older and may be eligible for the NRHP.

Historic Architecture

The Chambersburg Historic District (1980RE00652), which is listed in the NRHP, is the only historic property located within the APE. The location of the district is shown on the APE map in **Attachment A**.

The significance of the Chambersburg Historic District relates primarily to the Borough's civil war history as it was occupied by Confederate soldiers in 1862, 1863, and 1864, and it was the only major northern city burned by Confederate forces. Chambersburg's downtown streetscapes offer the opportunity for visual comparisons of a rapidly reconstructed area to those areas resulting from the first occupation as well as to later 19th century growth. Moreover, these comparisons are easily made because 20th century growth in Chambersburg has not been accompanied by mass demolition and therefore the architectural assemblage not only reflects its civil war heritage, but also contains significant vestiges of a major 18th century agricultural community and a post-civil war industrial town based upon supplies of charcoal and iron ore.

Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, the identification effort for previously unidentified above-ground historic properties focused on identifying properties that are susceptible to the vibration effects of pipeline replacement and could experience diminished integrity as a result of the Undertaking. A review of the APE found no additional above-ground resources that have the potential to be affected by the Undertaking.

In a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Adverse Effect on the Chambersburg Historic District. This letter is included as **Attachment C**.

Archeology

A small portion of the southern part of the APE crosses the Virginia Path (2019RE06606), which has not been evaluated for eligibility for inclusion on the NRHP. A description of the Virginia Path in PA-SHARE says, "The 'Great Trail,' which ran from the site of Harris' Ferry to the Potomac, was the most eastern war path of the Iroquois into the Carolinas and was used by the warriors of the Confederation in their expeditions against the Cherokee and Catawba, and was likewise used by these southern tribes in their northward expeditions." (History of Cumberland Valley in Pennsylvania, George P. Donahoo). Historic aerial photographs from 1957 and 1989 were examined for archeological resource potential within the APE. Aerial photographs show numerous historic structures and development such as schools, churches, businesses, municipal buildings that are located within and adjacent to the APE. A review of Google Streetview shows that many of these structures are still standing today.

An examination of Web Soil Survey data within the APE reveals 2 soil classes including Urban land-Hagerstown complex with a 0 to 8 percent slope and Urban land-Udorthents complex with a 0 to 25 percent slope. Typically slopes greater than 15 percent are not suitable for human occupation, and soil types within the APE vary from 0 to 25 percent slope. The APE is comprised of nearly all well drained soils indicating suitable conditions for human habitation in both the pre-contact and historic periods. However, Urban land soils are typically areas of largely built environment that have been disturbed by capping or filling and areas that are covered by buildings and pavement.

While archeological deposits associated with expeditions of pre-historic people and historic structures associated with the civil war era of the Borough of Chambersburg may exist within the APE, the Undertaking is occurring within the ROW, which contains roads, sidewalks and previously installed utilities. Examination of historic aerials and soils within the APE indicates that the undertaking will take place within soils that have likely been disturbed by construction of infrastructure. While factors may suggest a potential for archeological deposits within the portion of the APE that is within the Virginia Path, the Undertaking will occur within previous road construction and utility installation corridors. Most of the project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. Furthermore, in a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Effect on archaeological resources. This letter is included as **Attachment C**.

Determination of Effect

Based on the aforementioned identification and evaluation, PHMSA has determined that there is one historic property as defined in 36 CFR 800.16(l) within the APE: Chambersburg Historic District, which is listed in the NRHP.

While the NRHP-listed historic property is located in the APE, the Undertaking will not alter any of the characteristics or contributing features of this historic property that qualify it for inclusion in the NRHP in a manner that would diminish its integrity. No character-defining materials or features will be removed or altered as a result of the Undertaking. Therefore, the Undertaking does not have the potential to adversely affect the identified above-ground historic property. Project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. The Undertaking will not result in lasting physical, visual, or audible effects to NRHP-listed historic properties. The Undertaking also does not include land acquisition, nor would it limit access to or change the use of the historic property identified above.

In accordance with 36 CFR Part 800.5, PHMSA has determined the Undertaking will have No Adverse Effect on historic properties.

Request for Section 106 Concurrence

PHMSA requests that you provide any information you have regarding historic properties of religious or cultural significance to your Tribe/Nation that may be present in the APE and affected by the Project. If your Tribe/Nation is unaware of any historic properties beyond what we have identified to date, PHMSA is notifying your Tribe/Nation of our intention to make a No Adverse Effect to Historic Properties finding. Please notify us within 30 days from the date of receipt of this letter if you have any concerns about the project's effects to historic properties. Should you need additional information please contact Kat Giraldo, Section 106 specialist, at PHMSASection106@dot.gov or 857-320-1359.

Sincerely,

Matt Fuller

Section 106 Consultation: PHMSA Pipeline Replacement Project in the Borough of Chambersburg (ER # 2023PR04044)

Grant Recipient: Chambersburg Gas Department

Project Location: Borough of Chambersburg, Pennsylvania

Dear Emma Diehl:

The Pipeline and Hazardous Materials Safety Administration (PHMSA) provides funds authorized under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program. PHMSA proposes to provide funds to the Chambersburg Gas Department (Grant Recipient) for the replacement of pipeline (Undertaking). PHMSA is initiating consultation for the above referenced Undertaking in accordance with Section 106 of the National Historic Preservation Act of 1966, as amended, and the associated implementing regulations, 36 CFR Part 800 (Section 106).

On August 18, 2023, the Grant Recipient submitted this undertaking to the Pennsylvania State Historic Preservation Office (PA SHPO) for review under ER # 2023PR04044. The PA SHPO concurred with a finding of No Adverse Effect on above-ground historic properties and No Effect on below-ground historic properties. PHMSA has not delegated Section 106 consultation and is therefore resubmitting this undertaking for Section 106 review as the federal agency.

Project Description/Background

The Grant Recipient is proposing to replace cast iron and unprotected steel gas mains. The Undertaking will replace 18,469 feet (ft.) or approximately 3.5 miles of pipe with polyethylene (PE) plastic mains. Additionally, the Grant Recipient will replace every existing steel service line within its footprint along the streets where mains will be replaced. The existing mains are located entirely within public right-of-way (ROW).

The Undertaking will take place at various locations within the Borough of Chambersburg. Cut and cover (trenching) and pipe insertion methods will be used to replace the mains. Ground disturbance will occur entirely within existing road ROW, beneath the paved road. There will be no modifications to buildings or structures, or construction or installation of any aboveground components. The Grant Recipient will abandon some of the existing pipeline (versus excavation and removal), which will minimize ground disturbance. The total depth of excavation is 48 inches (in.) below grade by 24 in. wide.

The staging and material storage areas for the project will be located at the Customer Service Center (80 S. Franklin Street) and the Wayne Avenue Reg Station (across from 307 Wayne Avenue). Both areas are currently utilized for staging and material storage. Project location maps are enclosed in **Attachment A**. Photographs showing the overall character of the project areas are included in **Attachment B**.

Area of Potential Effects (APE)

Pursuant to 36 CFR 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the Undertaking may directly or indirectly affect historic resources. Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, PHMSA has delineated the APE for this Undertaking to encompass the existing ROW, which includes the limits of disturbance and the limits of any potential vibration effects during construction. The APE extends to the depth of proposed ground disturbance of up to 48 in. below grade. The Undertaking does not have the potential to cause visual or audible effects after the completion of construction. The existing ROW encompasses various roads, signage, sidewalks, and grassy areas throughout the Borough of Chambersburg. The APE is shown on the maps in **Attachment A**.

Identification and Evaluation

To identify historic properties in the APE, individuals who meet the Secretary of the Interior's (SOI) Professional Qualification Standards reviewed available information on previously identified historic properties in the APE, including the National Register of Historic Places (NRHP) database and data gathered from the PA SHPO's database (PA-SHARE). SOI-qualified individuals also conducted research to determine if there are any previously unidentified properties within the APE that are 45 years of age or older and may be eligible for the NRHP.

Historic Architecture

The Chambersburg Historic District (1980RE00652), which is listed in the NRHP, is the only historic property located within the APE. The location of the district is shown on the APE map in **Attachment A**.

The significance of the Chambersburg Historic District relates primarily to the Borough's civil war history as it was occupied by Confederate soldiers in 1862, 1863, and 1864, and it was the only major northern city burned by Confederate forces. Chambersburg's downtown streetscapes offer the opportunity for visual comparisons of a rapidly reconstructed area to those areas resulting from the first occupation as well as to later 19th century growth. Moreover, these comparisons are easily made because 20th century growth in Chambersburg has not been accompanied by mass demolition and therefore the architectural assemblage not only reflects its civil war heritage, but also contains significant vestiges of a major 18th century agricultural community and a post-civil war industrial town based upon supplies of charcoal and iron ore.

Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, the identification effort for previously unidentified above-ground historic properties focused on identifying properties that are susceptible to the vibration effects of pipeline replacement and could experience diminished integrity as a result of the Undertaking. A review of the APE found no additional above-ground resources that have the potential to be affected by the Undertaking.

In a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Adverse Effect on the Chambersburg Historic District. This letter is included as **Attachment C**.

Archeology

A small portion of the southern part of the APE crosses the Virginia Path (2019RE06606), which has not been evaluated for eligibility for inclusion on the NRHP. A description of the Virginia Path in PA-SHARE says, "The 'Great Trail,' which ran from the site of Harris' Ferry to the Potomac, was the most eastern war path of the Iroquois into the Carolinas and was used by the warriors of the Confederation in their expeditions

against the Cherokee and Catawba, and was likewise used by these southern tribes in their northward expeditions." (History of Cumberland Valley in Pennsylvania, George P. Donahoo). Historic aerial photographs from 1957 and 1989 were examined for archeological resource potential within the APE. Aerial photographs show numerous historic structures and development such as schools, churches, businesses, municipal buildings that are located within and adjacent to the APE. A review of Google Streetview shows that many of these structures are still standing today.

An examination of Web Soil Survey data within the APE reveals 2 soil classes including Urban land-Hagerstown complex with a 0 to 8 percent slope and Urban land-Udorthents complex with a 0 to 25 percent slope. Typically slopes greater than 15 percent are not suitable for human occupation, and soil types within the APE vary from 0 to 25 percent slope. The APE is comprised of nearly all well drained soils indicating suitable conditions for human habitation in both the pre-contact and historic periods. However, Urban land soils are typically areas of largely built environment that have been disturbed by capping or filling and areas that are covered by buildings and pavement.

While archeological deposits associated with expeditions of pre-historic people and historic structures associated with the civil war era of the Borough of Chambersburg may exist within the APE, the Undertaking is occurring within the ROW, which contains roads, sidewalks and previously installed utilities. Examination of historic aerials and soils within the APE indicates that the undertaking will take place within soils that have likely been disturbed by construction of infrastructure. While factors may suggest a potential for archeological deposits within the portion of the APE that is within the Virginia Path, the Undertaking will occur within previous road construction and utility installation corridors. Most of the project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. Furthermore, in a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Effect on archaeological resources. This letter is included as **Attachment C**.

Determination of Effect

Based on the aforementioned identification and evaluation, PHMSA has determined that there is one historic property as defined in 36 CFR 800.16(l) within the APE: Chambersburg Historic District, which is listed in the NRHP.

While the NRHP-listed historic property is located in the APE, the Undertaking will not alter any of the characteristics or contributing features of this historic property that qualify it for inclusion in the NRHP in a manner that would diminish its integrity. No character-defining materials or features will be removed or altered as a result of the Undertaking. Therefore, the Undertaking does not have the potential to adversely affect the identified above-ground historic property. Project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. The Undertaking will not result in lasting physical, visual, or audible effects to NRHP-listed historic properties. The Undertaking also does not include land acquisition, nor would it limit access to or change the use of the historic property identified above.

In accordance with 36 CFR Part 800.5, PHMSA has determined the Undertaking will have No Adverse Effect on historic properties.

Consulting Party Outreach

PHMSA identified parties that may be interested in the Project and its effects on historic properties. PHMSA invites the individuals/organizations copied on this letter to participate as Section 106 consulting parties. Invited parties should indicate their willingness to participate as a consulting party and provide comments on the enclosed form (**Attachment D**) within 30 calendar days from the date on this letter. Note that a non-response is considered to be a declination to participate; however, interested parties can request to join

consultation at any time in the process. If any invited party expresses concern about the Project's potential effects to historic properties, PHMSA will consult with the party to resolve those concerns prior to project implementation.

PHMSA will also invite the following federally recognized tribes to participate in consultation by separate letter:

- Delaware Nation
- Delaware Tribe of Indians
- Tuscarora Nation

Request for Section 106 Concurrence

Based on the information presented above, PHMSA has determined that the Undertaking will result in No Adverse Effect to properties that are either in, or eligible for inclusion in, the NRHP. PHMSA is submitting this Undertaking to your office for your review and comment. PHMSA requests your concurrence with this determination of effect within 30 calendar days of the date of this letter. Should you need additional information please contact Kat Giraldo, Section 106 specialist, at PHMSASection106@dot.gov or 857-320-1359.

Section 106 Consultation: PHMSA Pipeline Replacement Project in the Borough of Chambersburg
Grant Recipient: Chambersburg Gas Department
Project Location: Borough of Chambersburg, Pennsylvania

Dear Chief Jonathan:

The Pipeline and Hazardous Materials Safety Administration (PHMSA) provides funds authorized under the Natural Gas Distribution Infrastructure Safety and Modernization Grant Program. PHMSA proposes to provide funds to the Chambersburg Gas Department (Grant Recipient) for the replacement of pipeline (Undertaking). PHMSA is initiating consultation for the above referenced Undertaking in accordance with Section 106 of the National Historic Preservation Act of 1966, as amended, and the associated implementing regulations, 36 CFR Part 800 (Section 106). The purpose of this letter is to initiate Section 106 consultation for the Project to determine if there are historic properties of cultural or religious significance to your Tribe/Nation that may be affected by the Project, to determine if you want to be a consulting party, and/or to notify your Tribe/Nation of PHMSA's intention to make a finding of No Adverse Effect to Historic Properties. PHMSA is also available for Government-to-Government consultation on this Program.

On August 18, 2023, the Grant Recipient submitted this undertaking to the Pennsylvania State Historic Preservation Office (PA SHPO) for review under ER # 2023PR04044. The PA SHPO concurred with a finding of No Adverse Effect on above-ground historic properties and No Effect on below-ground historic properties. PHMSA has not delegated Section 106 consultation and has therefore resubmitting this undertaking to PA SHPO for Section 106 review as the federal agency.

Project Description/Background

The Grant Recipient is proposing to replace cast iron and unprotected steel gas mains. The Undertaking will replace 18,469 feet (ft.) or approximately 3.5 miles of pipe with polyethylene (PE) plastic mains. Additionally, the Grant Recipient will replace every existing steel service line within its footprint along the streets where mains will be replaced. The existing mains are located entirely within public right-of-way (ROW).

The Undertaking will take place at various locations within the Borough of Chambersburg. Cut and cover (trenching) and pipe insertion methods will be used to replace the mains. Ground disturbance will occur entirely within existing road ROW, beneath the paved road. There will be no modifications to buildings or

structures, or construction or installation of any aboveground components. The Grant Recipient will abandon some of the existing pipeline (versus excavation and removal), which will minimize ground disturbance. The total depth of excavation is 48 inches (in.) below grade by 24 in. wide.

The staging and material storage areas for the project will be located at the Customer Service Center (80 S. Franklin Street) and the Wayne Avenue Reg Station (across from 307 Wayne Avenue). Both areas are currently utilized for staging and material storage. Project location maps are enclosed in **Attachment A**. Photographs showing the overall character of the project areas are included in **Attachment B**.

Area of Potential Effects (APE)

Pursuant to 36 CFR 800.4(a)(1), the Area of Potential Effects (APE) is defined as the geographic area(s) within which the Undertaking may directly or indirectly affect historic resources. Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, PHMSA has delineated the APE for this Undertaking to encompass the existing ROW, which includes the limits of disturbance and the limits of any potential vibration effects during construction. The APE extends to the depth of proposed ground disturbance of up to 48 in. below grade. The Undertaking does not have the potential to cause visual or audible effects after the completion of construction. The existing ROW encompasses various roads, signage, sidewalks, and grassy areas throughout the Borough of Chambersburg. The APE is shown on the maps in **Attachment A**.

Identification and Evaluation

To identify historic properties in the APE, individuals who meet the Secretary of the Interior's (SOI) Professional Qualification Standards reviewed available information on previously identified historic properties in the APE, including the National Register of Historic Places (NRHP) database and data gathered from the PA SHPO's database (PA-SHARE). SOI-qualified individuals also conducted research to determine if there are any previously unidentified properties within the APE that are 45 years of age or older and may be eligible for the NRHP.

Historic Architecture

The Chambersburg Historic District (1980RE00652), which is listed in the NRHP, is the only historic property located within the APE. The location of the district is shown on the APE map in **Attachment A**.

The significance of the Chambersburg Historic District relates primarily to the Borough's civil war history as it was occupied by Confederate soldiers in 1862, 1863, and 1864, and it was the only major northern city burned by Confederate forces. Chambersburg's downtown streetscapes offer the opportunity for visual comparisons of a rapidly reconstructed area to those areas resulting from the first occupation as well as to later 19th century growth. Moreover, these comparisons are easily made because 20th century growth in Chambersburg has not been accompanied by mass demolition and therefore the architectural assemblage not only reflects its civil war heritage, but also contains significant vestiges of a major 18th century agricultural community and a post-civil war industrial town based upon supplies of charcoal and iron ore.

Due to the scale and nature of the Undertaking, which is limited to the replacement of pipelines within existing ROW, the identification effort for previously unidentified above-ground historic properties focused on identifying properties that are susceptible to the vibration effects of pipeline replacement and could experience diminished integrity as a result of the Undertaking. A review of the APE found no additional above-ground resources that have the potential to be affected by the Undertaking.

In a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Adverse Effect on the Chambersburg Historic District. This letter is included as **Attachment C**.

Archeology

A small portion of the southern part of the APE crosses the Virginia Path (2019RE06606), which has not been evaluated for eligibility for inclusion on the NRHP. A description of the Virginia Path in PA-SHARE says, "The 'Great Trail,' which ran from the site of Harris' Ferry to the Potomac, was the most eastern war path of the Iroquois into the Carolinas and was used by the warriors of the Confederation in their expeditions against the Cherokee and Catawba, and was likewise used by these southern tribes in their northward expeditions." (History of Cumberland Valley in Pennsylvania, George P. Donahoo). Historic aerial photographs from 1957 and 1989 were examined for archeological resource potential within the APE. Aerial photographs show numerous historic structures and development such as schools, churches, businesses, municipal buildings that are located within and adjacent to the APE. A review of Google Streetview shows that many of these structures are still standing today.

An examination of Web Soil Survey data within the APE reveals 2 soil classes including Urban land-Hagerstown complex with a 0 to 8 percent slope and Urban land-Udorthents complex with a 0 to 25 percent slope. Typically slopes greater than 15 percent are not suitable for human occupation, and soil types within the APE vary from 0 to 25 percent slope. The APE is comprised of nearly all well drained soils indicating suitable conditions for human habitation in both the pre-contact and historic periods. However, Urban land soils are typically areas of largely built environment that have been disturbed by capping or filling and areas that are covered by buildings and pavement.

While archeological deposits associated with expeditions of pre-historic people and historic structures associated with the civil war era of the Borough of Chambersburg may exist within the APE, the Undertaking is occurring within the ROW, which contains roads, sidewalks and previously installed utilities. Examination of historic aerials and soils within the APE indicates that the undertaking will take place within soils that have likely been disturbed by construction of infrastructure. While factors may suggest a potential for archeological deposits within the portion of the APE that is within the Virginia Path, the Undertaking will occur within previous road construction and utility installation corridors. Most of the project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. Furthermore, in a letter dated August 21, 2023, the PA SHPO informed the Grant Recipient that the undertaking will have No Effect on archaeological resources. This letter is included as **Attachment C**.

Determination of Effect

Based on the aforementioned identification and evaluation, PHMSA has determined that there is one historic property as defined in 36 CFR 800.16(l) within the APE: Chambersburg Historic District, which is listed in the NRHP.

While the NRHP-listed historic property is located in the APE, the Undertaking will not alter any of the characteristics or contributing features of this historic property that qualify it for inclusion in the NRHP in a manner that would diminish its integrity. No character-defining materials or features will be removed or altered as a result of the Undertaking. Therefore, the Undertaking does not have the potential to adversely affect the identified above-ground historic property. Project work is limited to the replacement of existing pipelines in areas that demonstrate a low probability for intact significant archaeological resources. The Undertaking will not result in lasting physical, visual, or audible effects to NRHP-listed historic properties. The Undertaking also does not include land acquisition, nor would it limit access to or change the use of the historic property identified above.

In accordance with 36 CFR Part 800.5, PHMSA has determined the Undertaking will have No Adverse Effect on historic properties.

Request for Section 106 Concurrence

PHMSA requests that you provide any information you have regarding historic properties of religious or cultural significance to your Tribe/Nation that may be present in the APE and affected by the Project. If your Tribe/Nation is unaware of any historic properties beyond what we have identified to date, PHMSA is notifying your Tribe/Nation of our intention to make a No Adverse Effect to Historic Properties finding. Please notify us within 30 days from the date of receipt of this letter if you have any concerns about the project's effects to historic properties. Environmental Justice Supplemental Index

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the [EJScreen website](#).

EJ INDEXES

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

JND X SECT THE SELECT D LOCATION

SEENA INDEXES

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low-income, percent linguistically isolated, percent less than high school education, percent unemployed, and low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION

These percentiles provide perspective on how the selected background buffer area compares to the rest of the area.

Low Life Expectancy	17%	20%	27	20%	31

*Diesel particulate matter, air toxics cancer risk, and air toxics respiratory hazard index are from the EPA's Air Toxics Data Update, which is the Agency's ongoing, comprehensive evaluation of air toxics in the United States. This effort aims to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that the air toxics data presented here provide broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. Cancer risks and hazard indices from the Air Toxics Data Update are reported to one significant figure and any additional significant figures here are due to rounding. More information on the Air Toxics Data Update can be found at: <https://www.epa.gov/haps/air-toxics-data-update>.

Environmental Justice Supplemental Index

The environmental justice and supplemental indexes are a combination of environmental and socioeconomic information. There are thirteen EJ indexes and supplemental indexes in EJScreen reflecting the 13 environmental indicators. The indexes for a selected area are compared to those for all other locations in the state or nation. For more information and calculation details on the EJ and supplemental indexes, please visit the [EJScreen website](#).

EJ INDEX

The EJ indexes help users screen for potential EJ concerns. To do this, the EJ index combines data on low income and people of color populations with a single environmental indicator.

INDEXES FOR THE SELECTED LOCATION

The supplemental indexes offer a different perspective on community-level vulnerability. They combine data on percent low-income, percent linguistically isolated, percent less than high school education, percent unemployed, and low life expectancy with a single environmental indicator.

SUPPLEMENTAL INDEXES FOR THE SELECTED LOCATION1

These percentiles provide perspective on how the selected background buffer area compares to the research area.
