Reference No. 24-0103

Dear Mr. den Herder:

This letter is in response to your October 23, 2024, email and subsequent email conversation requesting clarification of the Hazardous Materials Regulations (HMR; 49 CFR Parts 171-180) applicable to data plate marking requirements for United Nations (UN) portable tanks. Specifically, you describe a UN portable tank with a country of approval other than the United States (*e.g.*, the Netherlands). The UN portable tank's design was approved by an approval agency authorized to review and approve the design of UN portable tanks by the competent authority of the country of approval. The approval agency has also been authorized to approve the design of a UN portable tank by the competent authority of the United States (*i.e.*, the Pipeline and Hazardous Materials Safety Administration (PHMSA)). The approval agency maintains valid approval numbers issued by both competent authorities. Is the UN portable tank's data plate (see § 178.274(i)) required to display the approval number assigned by PHMSA, in addition to the approval number of the country of approval?

No. The data plate of a UN portable tank marked with the United States as the country of approval must display the approval number issued by PHMSA to the approval agency. The data plate of a UN portable tank marked with a country other than the United States as the country of approval is subject to the regulations and requirements of that particular competent authority. UN portable tanks with a country of approval other than the United States may be used in the United States in accordance with § 173.24(d)—see previously issued Letters of

Interpretation Reference Nos. 23-0004 and 13-0151, enclosed with this response. Moreover, regarding this scenario, the HMR does not restrict a person from permissively marking the approval number issued by PHMSA on the data plate.

I hope this information is helpful. Please contact us if we can be of further assistance.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dirk Der Kinderen". The signature is fluid and cursive, with a prominent initial "D".

Dirk Der Kinderen

Good day Mr. Shane Kelley,

Emailing to have in clear determination in writing on the below issue.

For portable container (ISO container) hauling bulk liquid hazardous products. Would the CSC plate on the ISO container legally be required to have the below highlighted IA number which is an identifier number for the original approving (survey) agency.

Thank you and best regards,

Payton den Herder

Subject: US/DOT approval NO - IA identification number for Surveying company

Good day,

Checking regulations for hauling hazardous material with ISO containers.

This is specifically in relation to 49 CFR, Section 107.402 and whether or not the identifier number for the original approving agency (IA number highlighted below as example) is required to be stamped on the data plate of the ISO container.

Thank you and best regards,

Payton den Herder
