PHMS-2024-00264	06/24/2024	Stanford Law School	I request that a copy of the following: record(s) be provided to me: records of individuals who served as incoming and outgoing interagency detailees from 2000-2023. Ideally, the data would include the dates of the detail, the name of the individual, the individual's originating, pre-detail position and the position to which they are detailed, whether the detail was reimbursable, whether the detail was incoming or outgoing, and the source or destination of the detailee. I also request copies of Interagency Agreements related to detailees for these dates. (Date Range for Record Search: From 1/1/2020 To 12/31/2023)
PHMS-2024-00265	06/24/2024	21 News WFMJ-TV (NBC) Youngstown	Looking for these statistics: -How many natural gas explosions occur annually in the United States? I read about 300 - but want to confirm that. How many have occurred thus far in 2024? -Of that amount, how many of those natural gas explosions occur annually in commercial buildings (including residential commercial buildings, any structure besides a home) in the US? -Also going to look back at the past 40 years. Is PHMSA able to tell me how many natural gas explosions occurred each year since 1984? And how many of those were commercial buildings each year since 1984? Looking for estimates if we cannot get exact numbers. A breakdown of each year since 1984 would be ideal. Hoping to look back at least 20 years - but 40 years would be great. -We are trying to understand the trend of natural gas explosions in recent history and whether they have increased or decreased. Can you also provide me with a list stating the location and incident of the most serious, notable natural gas explosions in the past 40 years (preferably in buildings, including residential apartment buildings) along with the causes - that would be great. -What is the average annual cost of natural gas explosions in the United States for commercial buildings, again including residential apartment buildings and any other commercial structure? How much has been spent on natural gas explosion damage for these buildings in the past 20 years? Past 40 years?
PHMS-2024-00267	06/24/2024	Individual	Hello, I am in escrow for a house and am wondering what the risk is from being close to underground pipelines. The address is 17645 Loganberry Rd, Carson, CA 90746, so I am requesting info on the pipe's lines running under the streets of E Victoria, and S Central Ave, two main streets that connect to the community. I am mostly interested in what those pipelines carry, if they are active or shutdown, and how big they are/if the house is outside the radius of a disasters damage. Also, what programs are used to monitor them and keep them safe. I have read that pipelines can be fatal up to 700 ft away and so am concerned.
PHMS-2024-00268	06/24/2024	Individual	I am an individual representing myself investigating the reliability of the natural gas supply to the city of White Salmon, WA 98672. On January 13, 2024, the coldest day of 2024 so far for the Columbia Gorge, we lost electric power. Then we were notified that the natural gas supply was also in peril. Fortunately, both of these were restored within 6 hours. Had this lasted 24 hours the results would have been catastrophic. Bonneville Power Administration attributed the power outage to a fallen tree. My research showed the natural gas capacity warning was due to a

			shutdown of the Jackson Prairie Natural Gas Storage Facility AND a compressor failure in the Canadian Pipeline system. Puget Sound Energy, the operator of Jackson Prairie, attributed the facility shutdown to a "failure in a redundant fiber optic system", with no further details. I am requesting all information DOT has with respect to this outage at Jackson Prairie, including the root cause of the failure and what mitigation projects are being undertaken to assure this is unlikely to re-occur in the future. I would prefer the information be provided electronically to waynethayer0@gmail.com.
