Subject: **Categorical Exclusion Determination**
City of Tallassee, NGDISM-FY23-CE-2024-31

PROPOSED ACTION

The Pipeline and Hazardous Materials Safety Administration (PHMSA) has reviewed the materials submitted by the city of Tallassee (Sponsor) to support PHMSA's environmental review for the pipeline replacement project in Tallassee, Carrville, and Tallapoosa City, Alabama (the Project). A map of the project area is enclosed as Attachment A. PHMSA understands the Project includes replacing approximately 13.4 miles of pipeline with medium density polyethylene pipe. The construction will be completed within existing rights-of-way and easements using horizontal directional drilling and trenching.

APPLICABLE CATEGORICAL EXCLUSION

C(5): Repair, rehabilitation, or replacement of natural gas distribution pipelines and associated equipment within existing rights-of-way or easements.

EXTRAORDINARY CIRCUMSTANCES

Based on the scope of the action, PHMSA has determined that the proposed action does not meet the criteria for extraordinary circumstances listed in DOT 5610.1D.

RESOURCE REVIEW

Air Quality: The Project falls within Tallapoosa County, Alabama which is designated by the EPA as in attainment for all NAAQS based on EPA's Greenbook. Replacing leak prone pipe with newer, more durable materials will result in the overall reduction of risks from leaking natural gas. Therefore, it is PHMSA's assessment that the Project would provide a net benefit to air quality from the overall reduction of risks from leaking natural gas and that no adverse indirect or cumulative air quality impacts would result from the project.

Cultural Resources: PHMSA sent a consultation letter to the Alabama State Historic Preservation Officer (SHPO) on June 30, 2025 with PHMSA's determination of a finding of no adverse effect under Section 106 of the National Historic Preservation Act. The SHPO concurred with findings presented by PHMSA on July 21, 2025. PHMSA also invited federally recognized tribes to participate in consultation by separate letter on June 30, 2025. None of these tribes have elected to participate in the process or provided comments.

Section 4(f): The Project would not result in a use of a property protected by Section 4(f) of the Department of Transportation Act.

Biological Resources: The Project would have no effect on any Endangered Species Act listed species or designated critical habitat, or on any essential fish habitat as outlined in the Magnuson-Stevens Fishery Conservation and Management Act.

Land Use: The Project is not located in a coastal zone under the Coastal Zone Management Act.

The Sponsor must implement all mitigation and other commitments identified in Attachment B. In addition, the Sponsor is responsible for securing all necessary permits, approvals, and authorizations.

DETERMINATION

Based on a review of the information and documentation submitted by the Sponsor, including review of Extraordinary Circumstances, PHMSA finds the proposed action qualifies as a Categorical Exclusion in accordance with Section 102 of the National Environmental Policy Act, 42 U.S.C. § 4332 and DOT Order 5610.D, Departmentwide National Environmental Policy Act Implementing Procedures.

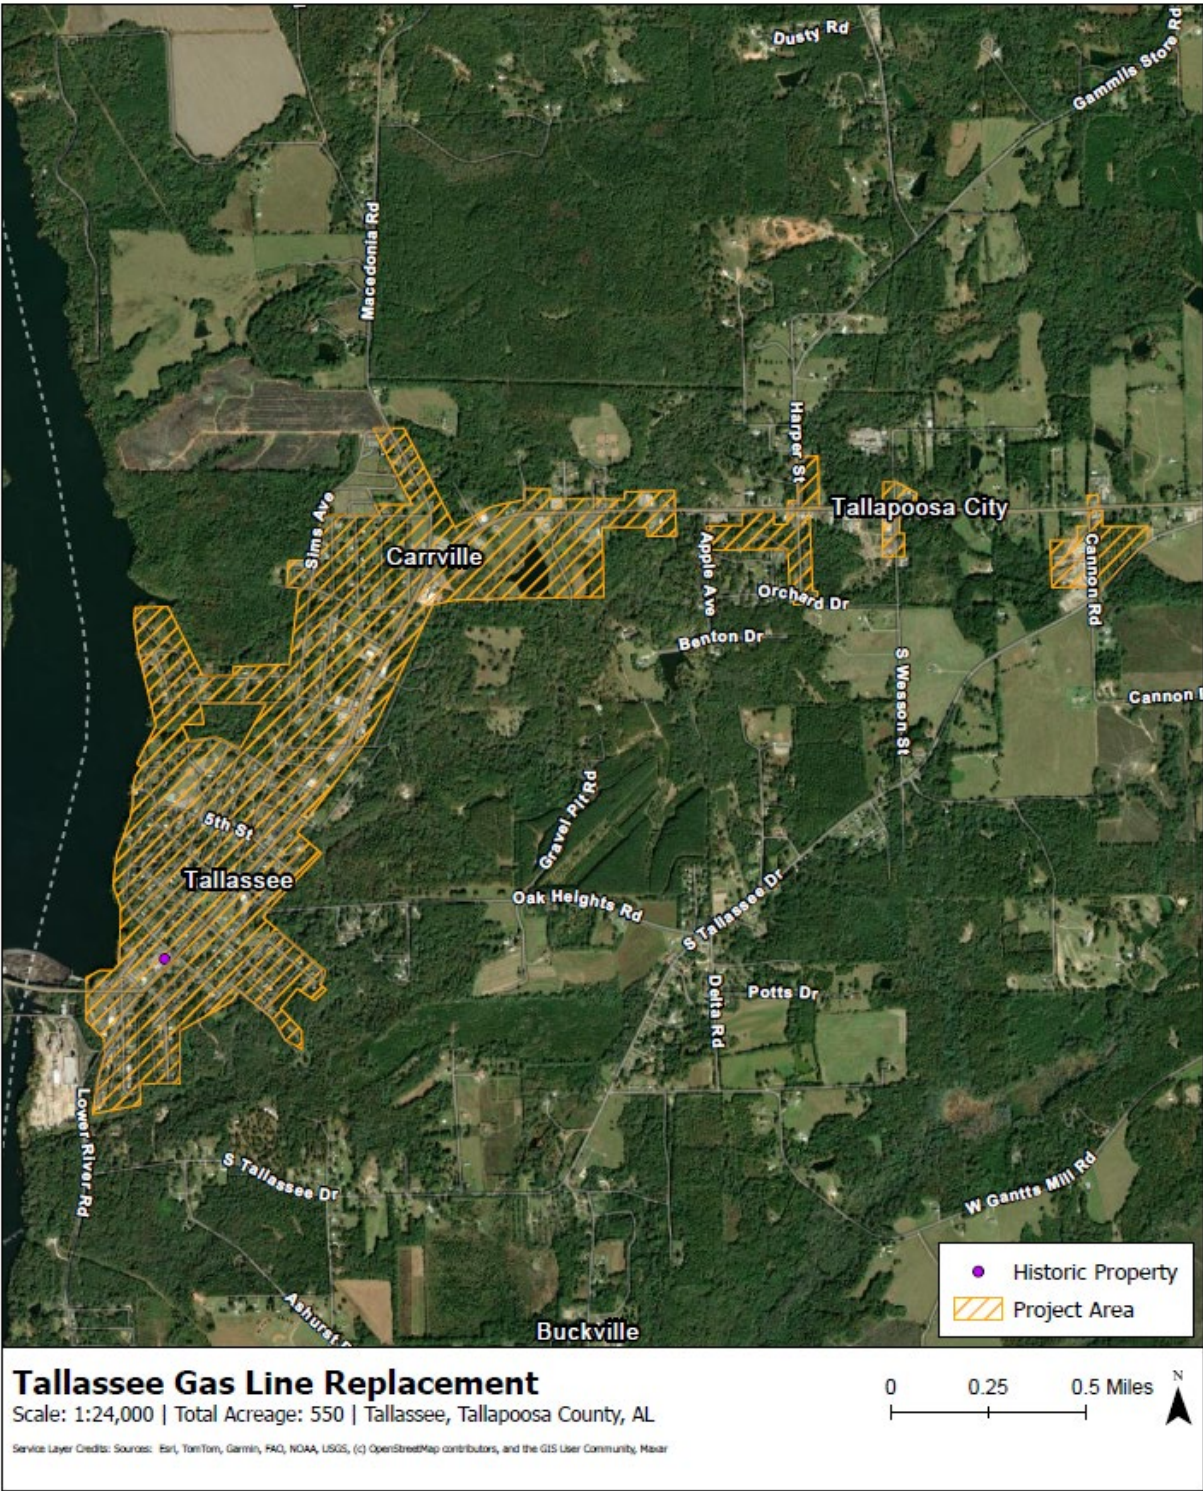

Approval by Environmental Analysis and Compliance Division:

Cultural Resources

If, during project implementation, a previously undiscovered archaeological or cultural resource that is or could reasonably be a historic property is encountered or a previously known historic property will be affected in an unanticipated manner, all project activities in the vicinity of the discovery will cease and the city of Tallassee will immediately notify PHMSA. This may include discovery of cultural features (*e.g.*, foundations, water wells, trash pits, etc.) or artifacts (*e.g.*, pottery, stone tools and flakes, animal bones, etc.) or damage to a historic property that was not anticipated. PHMSA will notify the State Historic Preservation Office and participating federally recognized tribes and conduct consultation as appropriate in accordance with 36 CFR § 800.13. Construction in the area of the discovery must not resume until PHMSA provides further direction. The city of Tallassee will strictly adhere to PHMSA's Unanticipated Discoveries Protocols.

In the event that unmarked human remains are encountered during permitted activities, all work shall halt and the city of Tallassee shall immediately contact PHMSA as well as the proper authorities in accordance with applicable state statutes to determine if the discovery is subject to a criminal investigation, of Native American origin, or associated with a potential archaeological resource. At all times human remains must be treated with the utmost dignity and respect. Human remains and associated artifacts will be left in place and not disturbed. No skeletal remains or materials associated with the remains will be photographed, collected, or removed until PHMSA has conducted the appropriate consultation and developed a plan of action. Project activities shall not resume until PHMSA provides further direction.

All work, material, equipment, and staging to remain within the road's existing right-of-way or utility easement or other staging areas as identified in the environmental documentation. If the scope of work changes in any way that may alter the effects to historic properties as described herein, the grant recipient must notify PHMSA, and consultation may be reopened under Section 106.
