Subject: **Categorical Exclusion Determination**
Pipeline Safety: Removing Obsolete Provision in Safety-Related Condition
Reporting Requirements

FINAL ACTION

In this final rule, PHMSA removes an obsolete provision from the safety-related condition reporting requirements in 49 CFR 191.25. Specifically, § 191.25(c) gives operators the option to file a safety-related condition report by email or by facsimile. PHMSA no longer allows operators to file a safety-related condition report by facsimile. PHMSA is therefore revising section 191.25(c) to remove all references to filing a safety-related condition report by facsimile. Safety-related condition reports must be filed by email to InformationResourcesManager@dot.gov. This correction will remove unnecessary delays in the process of operators filing a safety-related condition report.

APPLICABLE CATEGORICAL EXCLUSION

Categorical exclusions (CE) are categories of actions that the agency has determined normally do not significantly affect the quality of the human environment and therefore do not require either an environmental assessment (EA) or an environmental impact statement (EIS). [DOT Order 5610.1D](#), DOT's current National Environmental Policy Act (NEPA) procedures, notes in paragraph 9(f) that "[a]n OA may apply a CE established in another OA's procedures." PHMSA coordinated with the Federal Highway Administration (FHWA) to determine that the following FHWA CE is applicable to the action described above and can be used by PHMSA per Section 9(f) of DOT Order 5610.1D:

*Promulgation of rules, regulations, and directives.*¹

UNUSUAL CIRCUMSTANCES

¹ 23 CFR 771.117(c)(20)

Based on the scope of the action, PHMSA has determined that this rulemaking action does not meet the criteria for unusual circumstances listed in 23 CFR 771.117(b), which would require PHMSA to conduct appropriate environmental studies to determine if the CE classification is proper.

DETERMINATION

PHMSA analyzed the final rule and determined that the rulemaking will not adversely affect safety and will not significantly affect the quality of the human and natural environment. Based on the information provided in the final rule, including a review of unusual circumstances, PHMSA finds the final action qualifies as a Categorical Exclusion in accordance with Section 102 of the National Environmental Policy Act, 42 U.S.C. § 4332, DOT Order 5610.1D, Departmentwide National Environmental Policy Act Implementing Procedures, and 23 CFR 771.
