Re: Withdrawal of Interpretation Letter PI-18-0010

Dear Mr. Chislea:

On October 4, 2018, PHMSA responded to your request for an interpretation of the federal pipeline safety regulations in 49 CFR Part 192 regarding the inspection and testing of compressor station relief valves under section 192.731(a). This letter is to inform you that PHMSA has withdrawn that response to further consider the matter.

If we can be of further assistance, please contact Joseph Berry at (720) 601-3577.

Sincerely,

Cameron Satterthwaite
Acting Director, Standards and Rulemaking
Division, Office of Pipeline Safety
