Subject: Categorical Exclusion Determination
HM-268J: Reducing Training Burdens for American Farmers

FINAL ACTION

This final rule streamlines the exceptions for in-depth security plan requirements for farmers by raising the dollar amount of the exception threshold listed in 49 CFR 172.800(c). PHMSA is raising the monetary threshold for farmers to be eligible for the exception from the security plan requirements in § 172.800(c) to account for inflation. Farmers with less than \$825,000 in annual gross receipts from the sale of agricultural commodities or products will be excepted from security plan requirements in 49 CFR Part 172, subpart I.

APPLICABLE CATEGORICAL EXCLUSION

Categorical exclusions (CE) are categories of actions that the agency has determined normally do not significantly affect the quality of the human environment and therefore do not require either an environmental assessment (EA) or an environmental impact statement (EIS). [DOT Order 5610.1D](#), DOT's current National Environmental Policy Act (NEPA) procedures, notes in paragraph 9(f) that "[a]n OA may apply a CE established in another OA's procedures." PHMSA coordinated with the Federal Highway Administration (FHWA) to determine that the following FHWA CE is applicable to the action described above and can be used by PHMSA per Section 9(f) of DOT Order 5610.1D:

*Promulgation of rules, regulations, and directives.*¹

¹ 23 CFR 771.117(c)(20)

UNUSUAL CIRCUMSTANCES

Based on the scope of the action, PHMSA has determined that this rulemaking action does not meet the criteria for unusual circumstances listed in 23 CFR 771.117(b), which would require PHMSA to conduct appropriate environmental studies to determine if the CE classification is proper.

DETERMINATION

PHMSA analyzed the proposed rule and determined that the rulemaking will not adversely affect safety and will not significantly affect the quality of the human and natural environment. Based on the information provided in the Notice of proposed rulemaking (NPRM), including a review of unusual circumstances, PHMSA finds the final action qualifies as a Categorical Exclusion in accordance with Section 102 of the National Environmental Policy Act, 42 U.S.C. § 4332, DOT Order 5610.1D, Departmentwide National Environmental Policy Act Implementing Procedures, and 23 CFR 771.

Approved by the Environmental Analysis and Compliance Division:
