TYPE C – CHANGE IN THE PRIMARY ENTITY RESPONSIBLE (I.E., WITH AN ASSIGNED OPID) FOR MANAGING OR ADMINISTERING A SAFETY PROGRAM REQUIRED BY 49 CFR 192, 194, 195, OR 199 COVERING PIPELINE FACILITIES OPERATED UNDER MULTIPLE OPIDS

Sometimes, existing pipelines, pipeline segments, or pipeline facilities are part of a common PHMSA-required pipeline safety program which also involves other assets covered by additional OPIDs. (These common safety programs are sometimes referred to as “umbrella” safety programs.) The questions in this section notify PHMSA of changes in these relationships so that compliance performance can be accurately portrayed, as well as to facilitate PHMSA’s resource planning and preparation in the conduct of inspections of these PHMSA-required safety programs.

Important Instruction to Operator: When a common PHMSA-required pipeline safety program exists which covers assets having multiple OPID numbers, the Operators assigned those OPIDs are required to inform PHMSA as to which one of the various OPIDs is “primary” for the purposes of PHMSA inspections and Operator Registry Reporting (e.g., which OPID should be contacted and referred to when PHMSA or a state exercising jurisdiction intends to inspect that safety program), and must do so for each PHMSA-required pipeline safety program listed below.

1. List the new Operator-designated “primary” OPID for each common PHMSA-required pipeline safety program associated with this Operator Registry Notification, and also list the previous “primary” OPID associated with the program. Those programs not selected below will be considered to not have changed: *(select all that apply)*
