

THE SECRETARY OF TRANSPORTATION
WASHINGTON DC 20590

June 3, 2013

The Honorable John D. Rockefeller IV
Chairman
Committee on Commerce,
Science, and Transportation
United States Senate
Washington, DC 20510

Dear Mr. Chairman:

I am pleased to send you the Hazardous Materials Emergency Preparedness (HMEP) Grant Annual Report to Congress. Under provision 49 U.S.C. § 5116(k), the Secretary of Transportation is required to submit an Annual Report to Congress covering the planning and training grants program administered by the Pipeline and Hazardous Materials Safety Administration. Enclosed is the report covering HMEP grants awarded in Fiscal Year 2010 and expended during Fiscal Year 2011 and Hazardous Materials Instructor Training and Supplemental Public Sector Training grants awarded in Fiscal Year 2011 and expended in Fiscal Year 2011.

One of my priorities is to ensure the safe transportation of hazardous materials. Hazardous Materials Emergency Preparedness grants provide the assistance needed by States, Territories, and Native American Indian Tribes to enhance hazardous materials planning and training throughout the Nation.

A similar letter has been sent to the Ranking Member of the Senate Committee on Commerce, Science, and Transportation; the Chairman and Ranking Member of the House Committee on Transportation and Infrastructure; and the Chairman and Ranking Member of the House Committee on Energy and Commerce.

Sincerely yours,

Ray LaHood

Enclosure

THE SECRETARY OF TRANSPORTATION
WASHINGTON DC 20590

June 3, 2013

The Honorable John Thune
Ranking Member
Committee on Commerce,
Science, and Transportation
United States Senate
Washington, DC 20510

Dear Senator Thune:

I am pleased to send you the Hazardous Materials Emergency Preparedness (HMEP) Grant Annual Report to Congress. Under provision 49 U.S.C. § 5116(k), the Secretary of Transportation is required to submit an Annual Report to Congress covering the planning and training grants program administered by the Pipeline and Hazardous Materials Safety Administration. Enclosed is the report covering HMEP grants awarded in Fiscal Year 2010 and expended during Fiscal Year 2011 and Hazardous Materials Instructor Training and Supplemental Public Sector Training grants awarded in Fiscal Year 2011 and expended in Fiscal Year 2011.

One of my priorities is to ensure the safe transportation of hazardous materials. Hazardous Materials Emergency Preparedness grants provide the assistance needed by States, Territories, and Native American Indian Tribes to enhance hazardous materials planning and training throughout the Nation.

A similar letter has been sent to the Chairman of the Senate Committee on Commerce, Science, and Transportation; the Chairman and Ranking Member of the House Committee on Transportation and Infrastructure; and the Chairman and Ranking Member of the House Committee on Energy and Commerce.

Sincerely yours,

Ray LaHood

A large, stylized handwritten signature in blue ink, which appears to be "Ray LaHood", is written over the typed name.

APPENDIX E-Reported Planning Grant Outputs E-1

I. INTRODUCTION

The U.S. Department of Transportation's (DOT), Pipeline and Hazardous Materials Safety Administration's (PHMSA), Hazardous Materials Grant Program (the program) comprises three emergency preparedness grants: Hazardous Materials Emergency Preparedness (HMEP) Grant, Supplemental Public Sector Training (SPST) Grant, and Hazardous Materials Instructor Training (HMIT) Grant. The HMEP grants awarded with fiscal year 2010 funds were expended almost entirely during fiscal year 2011. In contrast, the performance period for HMIT and SPST grants awarded with fiscal year 2011 funds occurred during the 2010 fiscal year. Total program budgets, per fiscal year, are detailed in Section II.

The grant program is funded by registration fees collected from hazardous materials (hazmat) shippers and carriers who offer for transportation or transport certain hazmat in intrastate, interstate, or foreign commerce in accordance with 49 C.F.R. Part 107, Subpart G. These fees fund training and planning grants, monitoring and technical assistance, training curriculum development, and staffing costs. Registration fees also fund the publication and distribution of the Emergency Response Guidebook (ERG), which is updated and redistributed to first responders every 4 years.

Use of Registration Fees

In addition to funding planning and training grants, registration fees are used for monitoring and technical assistance, training curriculum development, and other administrative costs. Monitoring and technical assistance includes grantee site visits; conference attendance and participation; and contractor support for the development of outreach, evaluation, and other materials. The program provides funding to other federal agencies to assist in the development of the National Fire Protection Association (NFPA) 472 Curriculum and related materials.

NFPA 472 is the standard for competence of first responders who respond to hazmat accidents or incidents. Per 49 U.S.C. § 5116(i)(4), up to two percent of funds can be used for administrative purposes, including staff salaries. Lastly, registration fees fund the publication and distribution of the ERG. The ERG is used by firefighters, police, and other emergency services personnel who may be the first to arrive at the scene of a transportation incident involving hazmat. It is primarily a guide to aid first responders in quickly identifying the specific or generic classification of the material(s) involved in the incident, and protecting themselves and the general public during this initial response phase of the incident.

II. REPORT TO CONGRESS

As mandated by 49 U.S.C. § 5116(k), the Secretary of Transportation is required to submit to Congress annual reports covering the grant program administered by PHMSA. A grant period is for one year. Grantees are then afforded a 90-day grace period, through December 31st, to submit invoices and satisfy all PHMSA reporting requirements. This report fulfills the reporting requirement for HMEP grants awarded in fiscal year 2010 and expended during fiscal year 2011, and for HMIT and SPST grants awarded in fiscal year 2011 and expended during fiscal year 2011.

A. Grant Administration, Budget, and Accomplishments

The program affords grantees some flexibility in their training and planning activities, allowing them to focus on planning and training activities best suited to their needs, while minimizing resources spent on reporting. Currently, PHMSA collects statistical output measures from grantees; however, the program is evaluating alternative measures to better assess the program's efficacy.

The Hazardous Materials Grant Program Budget is composed of allotments for the three grant programs as well as administrative and other programmatic efforts. Funds are used to enhance multiple aspects of the program, including provision of support services.

Administrative activities for the Hazmat grant program include publication of the ERG, training curriculum updates, and monitoring and technical assistance. Table 1 provides the breakdown of funding by those specific activities.

Table 1. Funding Allocated for Administrative and Programmatic Activities

ADMINISTRATIVE/PROGRAMMATIC ACTIVITIES	FY 2010 Funding Available
Emergency Response Guidebook (ERG)	\$625,000
Administrative Expenses	\$555,000
Training Curriculum	\$188,000
Monitoring and Technical Assistance	\$150,000
TOTAL	\$1,518,000

B. HMEP Grant and Outputs

The HMEP grant program, as mandated by 49 U.S.C. § 5101 et seq., provides Federal financial and technical assistance to States, Territories, and Tribes to “develop, improve, and carry out emergency plans” within the National Response System and the Emergency Planning and Community Right-To-Know Act of 1986 (EPCRA, Title III), 42 U.S.C. § 11001 et seq. The program is designed to allow grantees flexibility in implementing training and planning programs that address differing needs for each location based on demographics, emergency response capabilities, commodity flow studies,¹ and hazard analysis. States have the ability to target specific training needs and planning activities using these funds.

Governors in each State, or their counterparts within Territories or Tribes, designate an agency to receive the HMEP grant funds. Agencies submit grant applications to PHMSA annually requesting funds for proposed activities. PHMSA reviews and evaluates applications to make

¹ Commodity Flow Studies identify hazmat trends in communities. Results are used for various reasons, including the development of hazmat response plans specific to local needs. PHMSA collects data on the number of studies conducted; however, study results are not collected.

certain the proposed activities support the program mission to ensure the safe transportation of hazmat. If approved, PHMSA offers the agency a Notice of Grant Award (NGA) for acceptance and signature. Once executed, the agency may distribute grant funds in accordance with the planned activities identified in the grant application within the State, Territory, or Tribe to Local Emergency Planning Committees (LEPCs) and first responder organizations (see Appendix A).

Since its inception in 1993 through 2008, the HMEP program received an annual budget of \$12.8 million. In fiscal year 2008, Congress increased the budget amount to \$21.8 million in HMEP grants to States, Territories, and Tribes. In fiscal years 2009-2012, the HMEP grant award remained at \$21.8 million per year. Table 2, below, details HMEP allocations for fiscal year 2010.

Table 2. HMEP Allocations for FY 2010

ACTIVITY	FY 2010 Funding Available	FY 2010 Funds Awarded
Planning and Training Grants (HMEP)	\$21,800,000	\$21,123,317
TOTAL	\$21,800,000	\$21,123,317

The following is a summary of reported eligible planning activities performed during fiscal year 2011 with fiscal year 2010 funding, with more detailed information provided in Appendix C:

- Trained more than 100,600 emergency responders to the NFPA 472 standard. By supporting a standardized, accepted, and proven program for use by all grantees, PHMSA ensures a higher level of efficacy of grantee training programs. The program continues to monitor developments in hazmat training.
- Developed 134 additional emergency plans;²
- Updated 1,077 emergency response plans;
- Performed approximately 770 emergency response exercises; and
- Performed more than 468 Commodity Flow Studies.

A summary of the number of responders trained, as reported by States, Territories, and Tribes, is detailed in Appendix D.³

C. HMIT Grant and Outputs

The HMIT grant was instituted during fiscal year 2008. The program is open to non-profit hazmat employee organizations demonstrating expertise in conducting train-the-trainer programs for employees. A hazmat employee, as defined under the Hazardous Materials Regulations

² EPCRA required LEPCs to submit emergency response plans by October 17, 1988; however, additional emergency plans are developed when new LEPCs are formed.

³ Individual responders may be trained at multiple levels (i.e., awareness, operations, specialist, and technician) during a grant period. Appendix D reflects the number of responders trained at each level.

(HMR; 49 C.F.R. Parts 171-180), is a person who, in the course of full-time, part-time, or temporary employment, directly affects hazmat transportation safety.

HMIT grants are awarded to non-profit hazmat organizations to fund train-the-trainer instruction to hazmat employees. Trainers developed from this grant program are familiar with their workplaces, the jobs that they and their co-workers perform, and the hazards they encounter on a daily basis; therefore, they are in an ideal position to train and work with their co-workers and employers to ensure that the workplace is safe relative to hazmat, and offer assistance and advice on hazmat-related issues.

During the fiscal years of 2008, 2009, and 2010, approximately \$4 million per year was made available for the HMIT program. Table 3 details HMIT allocations for fiscal year 2011. Appendix B provides a breakdown of drawdowns, obligations, and de-obligations for each grantee. Individual non-profit hazmat employee organization award amounts are determined by the evaluation and scoring of applications through a competitive process.

Table 3. HMIT and SPST Allocations for FY 2011

ACTIVITY	FY 2011 Funding Available	FY 2011 Funds Awarded
Discretionary Grants Program (HMIT)	\$4,000,000	\$2,633,852

Grantees reported approximately 1,276 trainers were trained during fiscal year 2011. HMIT grantees also demonstrated program productivity and creativity. The International Brotherhood of Teamsters (IBT) developed a website for their training program to help with research. The result is increased access to information on course offerings, schedules, training locations, and pertinent contact information. Students also proactively request training. Additionally, IBT developed a private group on Facebook that allows instructors and mentors to post ideas and activities, as well as pose questions for mentors. This integration of real-time technology and ease of information access allows for immediate dissemination of information on an as-needed basis.

D. SPST Grant and Outputs

SPST grant funding is provided to non-profit employee organizations engaged solely in fighting fires for the purpose of training instructors to conduct hazmat response training programs for individuals with statutory responsibility to respond to hazmat accidents and incidents. This program ensures hazmat awareness and operations training are available in the most convenient, cost-effective locations by allowing graduating instructors to train new, local instructors and responders, while also guaranteeing continuity and efficiency.

The SPST grant total award amount during fiscal year 2007 was \$250,000; the total award amount was increased in fiscal year 2008 to \$1 million. The total annual award amount

remained at \$1 million for fiscal years 2009 and 2010. Table 4 details SPST allocations for fiscal year 2011.

Table 4. HMIT and SPST Allocations for FY 2011

ACTIVITY	FY 2011 Funding Available	FY 2011 Funds Awarded
Supplemental Public Sector Training Grants (SPST)	\$1,000,000	\$1,000,000

The SPST grant was awarded to the International Association of Fire Fighters (IAFF) in fiscal year 2011 to fund and increase the number of hazmat emergency response trainers nationwide. IAFF is a nationwide non-profit organization whose members are engaged solely in firefighting, rescue, and emergency medical services.

The IAFF has demonstrated its ability to develop and coordinate HMEP instructor training, deliver it to target populations, and subsequently evaluate short- and long-term knowledge retention. In 2011, IAFF conducted 15 Instructor Training/Train-the-Trainer classes and 34 Supportive Teaching Sessions by conducting a total of 59 training events training 881 emergency responders during 16,378 contact hours.

III. DEVELOPMENTS IN 2010 AND 2011

In fiscal year 2010, PHMSA sought the assistance of a contractor specializing in grant programs to assess the efficacy of the program. Later in fiscal year 2010, PHMSA was notified by the Department’s Office of Inspector General (OIG) that it would conduct an audit of the program. PHMSA successfully implemented all ten OIG audit recommendations.

In addition to implementing the OIG recommendation, PHMSA has also implemented the following program improvements:

- Strengthened program management and oversight by conducting site visits, risk assessments, and desk audits to ensure that grant funds are used in compliance with Federal law and program-specific requirements;
- Developed a new policy to ensure that all grant specialists obtain certification to manage federal grants by completing the course on Uniform Administrative Requirements: OMB Circular A-102 & 2 CFR Part 215;
- Updated written standard operating procedures (SOPs) to document the steps necessary to successfully administer the Program; and
- Deployed the Grant Portal—a web-based tool allowing grantees the ability to submit payment requests and post-award activity changes via a centralized approval system. This system enhances transparency and allows for expeditious processing of requests.

PHMSA continues to make significant progress in reforming the HMEP Grant Program with the understanding that some benefits will not be realized for several grant cycles. Future program goals include:

- Increasing outreach to Native American Indian Tribes to expand the number of Tribal grant recipients for HMEP grants;
- Launching a new interactive training module accessible via the internet for grantees based on the NFPA 472 standard; and
- Implementing a quarterly progress report to be submitted by grantees, along with their SF-270 statements. This new reporting tool will enable the grant program to verify the progress of grantees and address potential issues prior to the end of the performance period.

Developments will continue on other efforts to improve the efficacy of PHMSA's program including implementation of grantee training program evaluations, and the development of additional guidance on effective uses of planning funds.
