Hazardous Materials Transportation Training & Security Requirements
Objectives

- Clarify training requirements in the HMR, to identify those employees who must be trained and to determine what type of training may be best for the employees

- Increase awareness and understanding of the proper transportation of hazardous materials

- Familiarize the hazmat community with publications and training materials available from PHMSA

- Provide training aids to better meet the HMR requirements.

- To determine who needs a security plan
It’s the Law

The Federal hazardous materials transportation law requires training of *all* hazmat employees.

49 U.S.C. Section 5107
Inspections Trends

Common issues identified during inspections include:

- Failure to maintain training records
- Failure to train hazmat employees
- Packages not properly marked and labeled
- Incorrect shipping papers
- Failure to register with PHMSA
- Lack of a Security Plan
HAZMAT INCIDENTS

Hazmat incidents caused by human error can be reduced by implementing an effective training program.
Effective Training Program

- Develops strong safety culture
- Heightens employee safety
- Improves a company’s effectiveness, efficiency and productivity
- Increases employees skills
- Aids in ensuring safe and secure shipments
- Reduces likelihood of catastrophic event, such as a fire aboard aircraft
- Provides employees an understanding of compliance
Hazardous Material Training Requirements

- The HMR mandates training requirements for persons who prepare hazmat for shipment, who transport hazmat in commerce.
- The intent of the regulations is to ensure that each hazmat employee is familiar with the HMR, is able to recognize and identify hazardous material.
- Understands the functions of his/her job
- Is knowledgeable about emergency response, self-protection measures, security awareness and accident prevention.
Who Needs Hazmat Training?

- US DOT “Hazmat Employee” training rules apply to any company which performs any function in any way regulated by the US DOT Hazardous Material Regulations (HMR).

- The HMR requires all Hazmat employees to be trained including hazmat employers with direct supervision of hazmat transportation functions.
Who is a Hazmat Employer

- Any person who uses one or more employee in connection with:
  - Transporting hazmat in commerce
  - Causing hazmat to be transported or shipped
  - Representing, marking, certifying, selling, offering, reconditioning, testing, repairing or modifying packagings
Applicability and Responsibility

- A *hazmat employer* shall ensure that each of his or her *hazmat employees* is trained.

- The responsibility for training (*and the civil penalties for not training*) rests with the *employer*.

§172.702(a)
How to Begin

- Determine who your hazmat employees are.
- Determine the employees needs
- Assess the training options
- Develop a safety culture
- Designate a training coordinator
- Implement a planning process
- Implement a process for recordkeeping
- Understand the training curriculum
Who is a Hazmat Employee

A person who is:
- Employed full-time, part time, or temporarily
- Directly affecting hazmat transportation safety
- Self-employed
- Loads, unloads or handles hazmat
- A railroad signalman or maintenance-of-way employee
- Designs, manufactures, inspects, marks, tests, or reconditions containers
- Prepares hazmat for transportation
- Operates a transport vehicle
Training Frequency

- Initial training must be completed within 90 days of hazmat employment or change in job function.
- Hazmat employees must be directly supervised by a trained and knowledgeable employee until trained themselves.
- Recurrent (refresher) training is required at least every three years.
- Security awareness training is required at least every three years or when it has been revised.

§172.704(c)(1) & (2)
Additional Modal Training Requirements

Air - §175.20

Highway - §177.800 & §177.816

Vessel - §176.13
Training Requirements

Hazmat employee training must include:

- General awareness / familiarization training
- Function-specific training
- Safety training
- Security awareness training
- In-depth security training (when applicable)

§172.704(a)
General Awareness/Familiarization

Designed to:

- Provide familiarity with the requirements of the HMR
- Enable hazmat employees to recognize and identify hazardous materials using the hazard communication standards
- All hazmat employees **must** receive General Awareness Training.

§172.704(a)(1)
Function-Specific Training

- Provides a detailed understand of the HMR.
- Each employee must be trained on the specific functions they are required to perform.
- Training needs will depend on the company operations and the employee’s responsibilities.
- Meets requirements of Subchapter C, or special permits issued under subchapter A.
NEW: Hazardous Materials Transportation Training Modules

Free, interactive training modules available online:
http://phmsa.dot.gov/hazmat
Safety Training

Safety training must cover:

- Hazards presented by hazardous material
- Safe handling
- Emergency response information
- Methods and procedures for accident avoidance
- All hazmat employees must receive this training
- Example: Proper procedures for handling packages containing hazardous materials.

§172.704(a)(3)
Security Awareness

Security awareness training must provide:

- Awareness of security risks associated with hazmat transportation
- Methods to enhance transportation security
- How to recognize and respond to possible security threats
- All hazmat employees must receive Security Awareness Training.

Examples are:

- Regulatory Requirements
- Potential Threats
- Potential Targets
- Prevention Tools

§172.704(a)(4)
In-Depth Security Training

- Required for each hazmat employee of an employer required to have a security plan (per § 172.800).

- In-Depth Training must include:
  - Company security objectives
  - Specific security procedures
  - Actions to take in the event of a security breach
  - Employee responsibilities
  - Company organizational security structure

§172.704(a)(5)
Who needs a security plan?
Risk-Based Transportation Security Plan Requirements

- Only certain types and quantities of hazardous materials will be covered under the new security plan regulation.

- Considers physical and chemical properties, quantities shipped, mode of transportation, past terrorist use, potential use, availability of the materials and how they could contribute to a security incident.
Class/Division PHMSA Final Rule
Security Plan Revisions

- 1.1 Any quantity
- 1.2 Any quantity
- 1.3 Any quantity
- 1.4 Placarded quantity
- 1.5 Placarded quantity
- 1.6 Placarded quantity
- 2.1 A large bulk quantity
- 2.2 A large bulk quantity of materials with an oxidizer subsidiary
- 2.3 Any quantity
3. PG I and II in a large bulk quantity; Placarded quantity desensitized explosives - liquid

4.1 Placarded quantity desensitized explosives - solid

4.2 PG I and II in a large bulk quantity

4.3 Any quantity

5.1 Division 5.1 materials in PG I and II, and PG III perchlorates, ammonium nitrate, ammonium nitrate fertilizers, or ammonium nitrate emulsions or suspensions or gels in a large bulk quantity

5.2 Any quantity of Organic peroxide, Type B, liquid or solid, temperature controlled
Large Bulk Quantity

Definition of Large Bulk Quantity:

- “Large Bulk Quantity” refers to a quantity greater than >
- 3,000 kg (6,614 pounds) for solids
- 3,000 liters (792 gallons) for liquids
- gases in a single packaging such as a cargo tank motor vehicle, portable tank, tank car, or other bulk container
Overview of the Security Requirements

- Security plan requirements
- Security awareness training
- In-depth security training
- Initial and recurrent training and record keeping
- Security plan administration
Security Threat Assessment

Security threat assessment for hazardous material transportation created and prepared for:

- Hazardous materials in transportation
- Storage incidental to transportation
Elements of a Security Plan

Security plans must include the following elements:

- Personnel security
- Unauthorized access
- En route security
Security Plan Components

Required components are:

- Security plan must be in writing
- Plan must address security threat assessment
- Must detail security duties for each position or department responsible for implementing the plan
- Plan must be revised and/or updated as necessary to reflect changing circumstances
- Retained for as long as it remains in effect.
- Plan must be reviewed at least annually

§172.802
Security Plan Components (continued)

- Most recent version of the plan must be available to employees
- All employees must be notified of any revised or updated changes
- A plan for training hazmat employees in accordance with § 172.704(a)(4) and (a)(5)
- Must make the plan available upon request to authorized official of the US DOT and Homeland Security
§172.804 permits security plans that conform to regulations or standards issued by other Federal agencies, international organizations, or industry groups.

Examples may include security requirements imposed by USCG, DOD, NRC, UN, IMO, or TSA.
Security Assessment

To develop a security plan, you should begin with a security assessment.

- Identify hazardous materials handled and identify them with the potential use as a weapon or target of opportunity.

- Review current activities and operations from a transportation security perspective.

- Ask yourself, “What are we doing now? What could go wrong? What can we do differently?”
Additional Information

Up-to-date information is a key element of any security plan. You should consider methods to:

- Gather as much data as you can about your own operations.
- Develop a communications network to share best practices and lessons learned.
- Share information on security incidents to determine if there is a pattern of activities.
- Revise your security plans as necessary to take into account changing circumstances and new information.

§172.804
In-Depth Security Training

- Each hazmat employee required to have a security plan who handles hazardous materials, performs a regulated function or is responsible for implementing the plan must be trained concerning the plan and its implementation.

- Security training must include:
  - Company security objectives
  - Organizational security structure
  - Specific procedures
  - Specific security duties and responsibilities for each employee
  - Actions to be taken by each employee in the event of a security breach

§172.704 (a)(5)
Training Source

- Training may be provided by the employer or other public or private sources.
- USDOT does not approve, endorse, or certify anyone’s training program or product.
- The hazmat employer certifies that a hazmat employee has been trained.
- Hazmat training received from a previous employer or other source can be used to meet the HMR requirements provided that a current record of training is obtained from the previous employer.

§172.702(c) & (3)
Testing

- Each hazmat employer must ensure that every hazmat employee is tested on the required training subjects.

- The HMR does not set testing methods or standards. The responsibility is on the hazmat employer.

- The regulation does not specify the type of test or grading. This could be a written test, verbal test or performance test. Remember that this must be properly documented.
## Employee Training Record

### General Awareness / Familiarization

OSHA or EPA Training

Training completed to meet OSHA or EPA requirements that addresses training specified in §172.704(a) may be used to satisfy the HMR training requirements, provided it satisfies those requirements.

§172.704(b)
Record Retention

A record shall be:

- Created and retained by hazmat employer
- A current training record must be retained as long as hazmat employee is employed by that employer, and
- Retained for 90 days after employee is no longer employed by that employer

§172.704(d)
Recordkeeping

The training record must include:

- Hazmat employee’s name
- Most recent training completion date
- Description, copy, or location of the training materials
- Name and address of person providing the training
- “Certification” that the hazmat employee has been trained and tested
