

Pipeline and Hazardous Materials Safety Administration

MAY 0 7 2018

OVERNIGHT EXPRESS MAIL

Mr. Joseph L. Fiordaliso President New Jersey Board of Public Utilities 44 South Clinton Avenue Trenton, NJ 08625

Dear President Fiordaliso:

On October 12, 2017, a representative of the U.S. Department of Transportation's Pipeline and Hazardous Materials Safety Administration (PHMSA) conducted an adequacy evaluation of New Jersey's enforcement of its excavation damage prevention law. This letter serves as your official notice of our findings and determination. PHMSA has determined that the enforcement of New Jersey's excavation damage prevention law is **ADEQUATE**. New Jersey received a perfect score on the evaluation. PHMSA congratulates New Jersey on receiving a perfect score on the evaluation. No further action is required at this time. PHMSA will schedule a follow-up evaluation next year to determine if New Jersey is continuing to adequately enforce the excavation damage prevention law.

PHMSA conducted the evaluation pursuant to 49 United States Code (USC) § 60114 and 49 Code of Federal Regulations (CFR) Part 198, Subpart D -- State Damage Prevention Enforcement Programs. PHMSA spoke with Michael Stonack and other New Jersey Board of Public Utilities (NJBPU) staff members, and asked a series of standard questions regarding actions New Jersey executed to enforce the State's excavation damage prevention law.

During the evaluation, it was noted that the NJBPU maintains a satellite office in the State's "One-Call" center. This is deemed a "best practice" which has been shared with and well received by other states. This satellite office allows NJBPU staff the ability to have real-time awareness of locator delays, emergencies, etc. PHMSA commends the NJBPU for implementing innovative solutions to help improve pipeline safety.

In accordance with 49 CFR 198.55, every State must be able to demonstrate annually that it adequately meets the seven Federal criteria used to assess the effectiveness of a State's damage prevention enforcement program. These criteria determine whether the State's pertinent operating/enforcement agency has the authority (i.e., is properly enabled) to enforce the State's excavation damage prevention law, whether the State utilizes its authority to issue civil penalties and other appropriate sanctions for violations of the law, and whether the State is able to provide

documented procedures, processes, and data to demonstrate an effective overall damage prevention enforcement program. The evaluation criteria are enclosed.

Excavation damage continues to be a leading cause of hazardous liquid and natural gas pipeline incidents resulting in fatalities, serious injury, and environmental damage. Damaging a pipeline during excavation poses a serious safety risk to excavators, the public living or working in proximity to the excavation site, and the environment.

PHMSA strongly believes that effective damage prevention programs, including enforcement, are best addressed at the State level. Nationwide statistics show that effective enforcement of State excavation damage prevention laws reduces excavation damage and pipeline incidents resulting in increased safety. PHMSA applauds New Jersey's success in developing and sustaining an effective damage prevention enforcement program.

If you have any questions or need additional information, please contact our Damage Prevention Team by email at excavation.enforcement@dot.gov, or by telephone at (208) 262-8867.

Finally, PHMSA encourages you and your colleagues to support several safety education initiatives throughout the year. These efforts include National Safe Digging Month in April, National Safety Month in June, and National 811 Day in August. More information is available at www.call811.com and www.nsc.org/work-safety/get-involved/national-safety-month.

Sincerely,

Associate Administrator for Pipeline Safety

Enclosure

cc: Michael Stonack, Bureau Chief, Pipeline Safety, New Jersey Board of Public Utilities

United States Department of Transportation (USDOT) Pipeline and Hazardous Materials Safety Administration (PHMSA) Pipeline Safety: Pipeline Damage Prevention Programs 49 CFR 196 – Protection of Underground Pipelines from Excavation Activity 49 CFR 198 – Regulations for Grants to Aid State Pipeline Safety Programs Effective January 1, 2016

BACKGROUND

49 USC § 60114 provides the United States Department of Transportation with back stop authority to conduct administrative civil enforcement proceedings against excavators who damage hazardous liquid and natural gas pipelines in a state that has failed to adequately enforce its excavation damage prevention or one-call laws. Federal civil penalty levels are as high as \$209,002 for each day the violation continues, with a maximum penalty of \$2,090,022 for a related series of violations.

On July 23, 2015, PHMSA published a Final Rule that established:

- 1. Criteria and procedures for determining the adequacy of state pipeline excavation damage prevention law enforcement programs,
- 2. An administrative process for making adequacy determinations,
- 3. Federal requirements PHMSA will enforce in states with inadequate excavation damage prevention law enforcement programs, and
- 4. The adjudication process for administrative enforcement proceedings against excavators where Federal authority is exercised.

CRITERIA TO BE USED TO EVALUATE STATE DAMAGE PREVENTION PROGRAMS

- 1. Does the state have enforcement authority, including civil penalties?
- 2. Is there a designated enforcement body?
- 3. Is the state using its authority and making enforcement records available to the public?
- 4. Does the state have a reliable means of learning about damages?
- 5. Does the state have damage investigation practices that are adequate to determine the at-fault party when damage occurs?
- 6. At a minimum, does state law require that:
 - a. Excavators must call 811 before digging
 - b. Excavators must "respect the marks"
 - c. If damage to a pipeline occurs:
 - i. Excavator must report damage to operator at earliest practical moment.
 - ii. If release occurs, excavator must call 911.
- 7. Are exemptions from the damage prevention law limited? Written justification of exemptions is required.

PHMSA Guidance Brief
Pipeline Safety: Pipeline Damage Prevention Programs

ADMINISTRATIVE PROCESS FOR STATES TO CONTEST NOTICES OF INADEQUACY

- 1. PHMSA will issue a notice of inadequacy to the state in accordance with 49 CFR 190.5.
- 2. States have 30 days to submit written response by mail to:

Alan Mayberry

Associate Administrator for Pipeline Safety

Pipeline and Hazardous Materials Safety Administration

U.S. Department of Transportation

1200 New Jersey Avenue, SE, Suite E22-321

Washington, DC 20590

- 3. PHMSA will issue a final decision to states that contested a notice of inadequacy.
- 4. State may petition PHMSA to reconsider at any time following a finding of inadequacy; PHMSA will respond not later than the date of the next annual review.
- 5. States that fail to establish an adequate enforcement program within five years of effective date of the damage prevention final rule (January 1, 2016) may be subject to a 4 percent reduction in base grant funding.

FEDERAL STANDARDS FOR EXCAVATORS

- 1. Call 811 before excavating.
- 2. Wait for pipeline operators to establish and mark the location of underground pipelines before excavating.
- 3. Excavate with proper regard for the marks and take all practicable steps to prevent excavation damage.
- 4. Make additional use of one-call as necessary.
- 5. Any contact with pipelines must be reported to operator at the earliest practical moment.
- 6. If there is a release, the excavator must call 911.

There are no exemptions in the damage prevention regulation for calling 811 prior to excavation. PHMSA understands many states have one-call law exemptions and will be considerate of those exemptions when undertaking Federal enforcement action.
