January 30, 2020

Craig F. Lowther Lowther Johnson Attorneys at Law, LLC 901 St. Louis Street 20th Floor Springfield, MO 65806

Reference No. 19-0107

Dear Mr. Lowther:

This letter is in response to your August 14, 2019 and October 2, 2019, letters and subsequent phone conversation requesting clarification of the Hazardous Materials Regulations (HMR; 49 CFR Parts 171-180) applicable to the reflective design of an MC 331 cargo tank. Specifically, you ask whether the cargo tank, as described in your letters and shown in the enclosed photographs, meets the reflective design requirements of § 178.337-1(d).

In your letter, you describe an MC 331 cargo tank wrapped with 3M IJ180CV3-10 Controltac and 3M Scotchcal Gloss Overlaminate 8518 with UV protection. The enclosed photographs show that the wrap that covers approximately the front half of the MC 331 cargo tank is light gray with a green decal, darkening to a charcoal gray at the tank's midsection. The rear half of the cargo tank is covered with a bright green wrap. You provide temperature test data for the cargo tank and product description data for the wrap.

In accordance with § 178.337-1(d), every uninsulated MC 331 cargo tank permanently attached to a cargo tank motor vehicle shall, unless covered with a jacket made of aluminum, stainless steel, or other bright nontarnishing metal, be painted a white, aluminum or similar reflecting color on the upper two-thirds of area of the cargo tank.

Based on the information provided in your letters, and in conformance with previously issued Letters of Interpretation including Ref. Nos. 11-0067, 14-0180, and 15-0242, the cargo tanks shown in the photographs and data you supplied appear to meet the intent of this section. We recognize the requirements of § 178.337-1(d) have generated confusion for motor carriers and we may consider amending the section in a future rulemaking.

I hope this information is helpful. Please contact us if we can be of further assistance.

Sincerely.

Dirk Der Kinderen

Chief, Standards Development Branch Standards and Rulemaking Division

RE:

State of Missouri v Robert F. Foley Cass County Case #702915174

Matter ID 33791-000

Dear Mr. Foster:

This letter concerns HMR; 49 CFR Parts 171-180 applicable to MC 331 cargo tanks. I have enclosed a letter from Pro DeZigns stating that Ozark Mountain Energy has a propane trailer that is wrapped using 3M[™] IJ180CV3-10 Controltac [™] and 3M [™] Scotchcal [™] Gloss Overlaminate 8518 with UV Protection. I am told that the trailer has been approved by D.O.T. and is in compliance with their requirements. This letter is to request confirmation of that fact because Ozark Mountain Energy was given a ticket for not complying to the above-cited Federal regulations.

I have also enclosed for you a copy of your letter dated May 17, 2011. At that time, you gave your office's opinion as to cargo tanks that were "wrapped" in a 3M ControltacTM Graphic Film which was an ultraviolet reflective material. I have also enclosed for you Product Bulletin 8518 from 3M ScotchcalTM that states that the wrap provides additional ultraviolet and durable physical protection. The temperature range for the use of this product is -65° to +225° F. I am told by the installer that the product meets all of D.O.T.'s standards, but I am requesting a formal reply from you confirming that this is true, so I can give it to the local prosecutor.

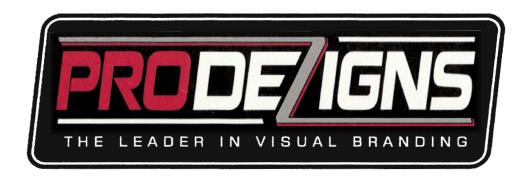

Lastly, I have also enclosed for you three photographs of the trailer in question. I would appreciate it if you would confirm for me that the wrap satisfies the standards under §178.337 of the HMR. I look forward to hearing from you at your earliest convenience.

Very truly yours, LOWTHER JOHNSON Attorneys at Law, LLC

Craig F. Lowther

Enclosures

The Ozark Mountain Energy propane trailer in question is wrapped using 3M™ IJ180CV3-10 Controltac™ and 3M™ Scotchcal™ Gloss Overlaminate 8518 with UV Protection, approved by D.O.T. in compliance with their requirements.

Kind Regards,

Jim Wheat

Pipeline and Hazardous Materials Safety Administration

MAY 1 7 2011

Mr. John Anderson Airgas SAFECOR P.O. Box 20067 Cheyenne, WY 82003

Ref. No.: 11-0067

Dear Mr. Anderson:

This responds to your March 22, 2011 letter requesting clarification of the Hazardous Materials Regulations (HMR; 49 CFR Parts 171-180) applicable to the general requirements for specification MC 331 cargo tanks.

1200 New Jersey Ave, SE Washington, D.C. 20590

In your letter, you state that your company, Airgas SAFECOR (Airgas), carries permitted hazardous materials within specification MC 331 cargo tank motor vehicles. You state that some of your MC 331 cargo tanks are painted white with a light teal stripe across the horizontal axis of the tank. Additionally, you state that your other MC 331 cargo tanks are "wrapped" in a 3M Controltac TM Graphic Film with Comply N 3 Adhesive. The wrap is an ultraviolet (UV) reflective material that is designed to breathe and resist fading. You provide data of the temperature tests on the striped cargo tanks and product description data for the wrap. Specifically, you ask whether the light teal stripe and the wrap are permitted under § 178.337 of the HMR.

As specified in § 178.337-1(d), every uninsulated cargo tank permanently attached to a cargo tank motor vehicle shall, unless covered with a jacket made of aluminum, stainless steel, or other bright non-tarnishing metal, be painted a white, aluminum or similar reflecting color on the upper two-thirds of area of the cargo tank.

It is the opinion of this Office that both the light teal "striped" and the "wrapped" Airgas cargo tanks as shown in the photographs and data you supplied do not conflict with § 178.337-1(d); therefore, you appear to be in compliance with this section.

I trust this satisfies your inquiry. Please contact us if we can be of further assistance.

Sincerely,

T. Glenn Foster

Scotchcal [™] Gloss Overlaminate 8518

Description

3M[™] Scotchcal[™] Gloss Overlaminate is a 2-mil film that can enhance gloss and provide additional ultraviolet and durable physical protection for selected digitally-imaged graphic constructions. It is designed for cold roll lamination only. Refer to the base film's Product Bulletin to determine compatibility and durability.

Characteristics

Characteristic	Description			
Color	Clear			
Gloss	Gloss			
Adhesive	Pressure sensitive, clear			
Liner	Polyester			
Thickness	2 mil (0.05 mm) without adhesive 3–4 mil (0.08 to 0.10 mm) with adhesive			
Tensile strength (minimum)	5 pounds/inch at 73°F (0.9 kg/cm at 23°C)			
Dimensional stability	0.015 inch (0.4 mm)			
In use temperature range	-65° to +225° F (-54° to +107° C)			
Chemical resistance	Resists mild alkalis, mild acids and salt			
	Excellent resistance to water			
	Resists petroleum vapors			

Shelf Life, Storage, and Shipping

Activity	Recommendation		
Shelf life	Total shelf life: 2 years Up to 2 years unprocessed, OR process within 1 year and apply within 1 year of processing		
Storage conditions	 86°F (30°C) maximum (Bring to room temperature before using) Out of sunlight Clean dry area Original container 		
Shipping finished graphics	Refer to the base film's Product Bulletin		

Health and Safety

When handling any chemical products, read the manufacturers' container labels and the Material Safety Data Sheets (MSDS) for important health, safety and environmental information.

To obtain MSDS sheets for 3M products:

- By fax, call 1-800-364-0768 in the US and Canada or 1-650-556-8417 for all other locations.
- Electronically, visit us at http://www.3M.com/ MSDS.
- By mail, or in case of an emergency, call 1-800-364-3577 or 1-651-737-6501.

When using any equipment, always follow the manufacturers' instructions for safe operation.

Warranty and Limited Remedy

The following is made in lieu of all other express or implied warranties, including any implied warranty of merchantability or fitness for a particular purpose or implied warranty arising out of a course of dealing, custom or usage of trade: all 3M products are warranted to be free of defects in materials and manufacture at the time of shipment and to meet the specifications stated in this Product Bulletin. 3M will replace or refund the price of any unused 3M materials that do not meet this warranty. These remedies are exclusive. In no case shall 3M be liable for any direct, indirect, or consequential damages, including any labor or non-3M materials charges.

See the Graphics Market Center Warranty Brochure, which gives the terms, additional limitations of the warranty, if any, and limitations of liability.

3M Related Literature

Before starting any job, be sure you have the most current Product and Instruction Bulletins.

The information in 3M Product and Instruction Bulletins is subject to change. Current Bulletins, as well as a list of all Bulletins updated within the last three months, are available at www.scotchprint.com or through our Fax-on-Demand system. Any warranty, if offered, is based on information in the appropriate Bulletin(s) that was current at the time you purchased the 3M products. The following Product and/or Instruction Bulletins provide the information and processes you need to properly make the graphics described in this Bulletin.

RE: State of Missouri v Robert F. Foley; Cass County Case #702915174

Tracking No. 19-0107 Matter ID 33791-000

Dear Patrick:

You requested that I have testing done on the Ozark Mountain Energy propane trailer to make sure that the wrap does in fact reflect the UV rays and keep the internal temperature of the tank cool.

I have enclosed for you the testing report performed by Trux Trailer and Tractor Repair Inc. located here in Springfield. It looks like the wrap does in fact reflect UV rays, which is the purpose of the regulation, and the report is consistent with the previous opinion letter I received from D.O.T.

I would appreciate it if you would review this report and see if you have enough information to respond to my letter of August 14, 2019. I need this in order to get the Missouri State Highway Patrol to understand that the wrap was placed on the trailer for the purpose of reflecting the UV rays and it does work as advertised, and is not a violation of the D.O.T. regulations.
