

- (1) 0.062 inches; or
 (2) In accordance with the formula—

$$OD \\ t = \frac{OD}{21} \text{—where}$$

t = Wall thickness in inches.
 OD = Outside pipe diameter in inches.

Interested persons are invited to participate in this rule-making action by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and notice numbers and be submitted in duplicate to the Director, Office of Pipeline Safety, Department of Transportation, Washington, D.C. 20590. All communications received on or before June 3, 1974.

This notice is issued under the authority of section 3 of the Natural Gas Pipeline Safety Act of 1968 (49 USC 1672), § 1.58(d) of the regulations of the Office of the Secretary of Transportation (49 CFR 1.58(d)), and the redelegation of authority to the Director, Office of Pipeline Safety, set forth in Appendix A to Part 1 of the regulations of the Office of the Secretary of Transportation (49 CFR Part 1).

Issued in Washington, D.C. on April 16, 1974.

JOSEPH C. CALDWELL,
 Director,
 Office of Pipeline Safety.

[49 CFR Parts 192, 195]

[Docket No. OPS-25; Notice No. 74-3]

TRANSPORTATION OF NATURAL AND OTHER GAS AND HAZARDOUS LIQUIDS BY PIPELINE

Welding Requirements

This notice proposes to incorporate by reference sections 2.0, 3.0, and 6.0 of the 1971 (12th) edition of API Standard 1104 "Standard for Welding Pipe Lines and Related Facilities" into the Federal gas pipeline and liquid pipeline safety regulations, respectively Parts 192 and 195 of Title 49 of the Code of Federal Regulations. The notice also proposes certain changes in the regulations which would be necessary if the proposed incorporation by reference of the 12th edition is adopted, as well as editorial modifications for clarity.

The welding specifications in sections 2.0, 3.0, and 6.0 of the 1968 (11th) edition of API Standard 1104 are currently incorporated by reference in Parts 192 and 195. Part 192 incorporates all three sections, and Part 195 incorporates sections 3.0 and 6.0. Section 2.0 pertains to the qualification of welding procedures; section 3.0 pertains to the qualification of welders; and section 6.0 pertains to the standards of acceptability for nondestructive testing.

In a petition for rule making recommending that OPS adopt the 1971 edition, the American Petroleum Institute (API) stated that the 1971 edition contains no major substantive changes to the specifications in the 1968 edition but

does contain a number of editorial changes which clarify content and scope. The Office of Pipeline Safety (OPS) has reviewed the 12th edition and concurs in the API's characterization of changes. In addition, OPS believes that as a result of the changes, the 1971 edition reflects current field welding practices better than the 1968 edition.

The OPS recognizes that outright replacement of the 11th edition by the 12th edition could result in a hardship for welders qualified under § 192.227 and § 195.222 in accordance with the 11th edition. These welders would have to requalify in accordance with the 12th edition. A similar burden would be placed on operators who would have to requalify their existing welding procedures under § 192.225 in accordance with the 12th edition. The OPS does not believe that requalifications are justified on the basis of changes contained in the 12th edition. Consequently, the proposed amendments recognize the soundness of welding procedures and welders qualified under the 11th edition. The proposal would require, however, that after the amendments become effective the 12th edition be used when welding procedures qualified under the 11th edition are changed and requalified, new welders are qualified, or welders qualified under the 11th edition are requalified. Likewise, the acceptability of welds made after the effective date of the proposed amendments would be based on the 12th edition.

In consideration of the foregoing, the OPS proposes to amend Parts 192 and 195 of Title 49 of the Code of Federal Regulations as follows:

1. Section 192.225(a) would be amended to read as follows:

§ 192.225 Qualification of welding procedures.

(a) Each welding procedure must be qualified under section IX of the ASME Boiler and Pressure Vessel Code or section 2 of the 1971 edition of API Standard 1104, whichever is appropriate to the function of the weld, except that a welding procedure qualified under section 2 of the 1968 edition of API Standard 1104 before (effective date) may continue to be used but may not be requalified under that edition.

2. Section 192.227(a) (2) would be amended to read as follows:

§ 192.227 Qualification of welders.

(2) Section 3 of the 1971 edition of API Standard 1104 or, if qualified before (effective date), section 3 of the 1968 edition of API Standard 1104, except that a welder may not requalify under the 1968 edition.

3. Section 192.229(c) would be amended to read as follows:

§ 192.229 Limitations on welders.

(c) A welder qualified under § 192.227 (a) may not weld unless within the pre-

ceding 6 calendar months the welder has had one weld tested and found acceptable under section 3 or 6 of the 1971 edition of API Standard 1104 or, in the case of tests conducted before (effective date), section 3 or 6 of the 1968 edition of API Standard 1104.

4. Section 192.241(c) would be amended to read as follows:

§ 192.241 Inspection and test of welds.

(c) The acceptability of a weld that is nondestructively tested or visually inspected is determined according to the standards in section 6 of the 1971 edition of API Standard 1104.

5. Item II.A.8 of Appendix A of Part 192 would be amended to read as follows:

APPENDIX A—INCORPORATED BY REFERENCE

II. Documents incorporated by reference.
 A. American Petroleum Institute:

8. API Standard 1104 "Standard for Welding Pipe Lines and Related Facilities" (1968 and 1971 editions).

6. Section 195.222 would be amended to read as follows:

§ 195.222 Welders: Testing.

Each welder must be qualified in accordance with section 3 of the 1971 edition of API Standard 1104 or, if qualified before (effective date), in accordance with section 3 of the 1968 edition of API Standard 1104, except that a welder may not requalify under the 1968 edition.

7. Section 195.228 would be amended to read as follows:

§ 195.228 Welds and welding inspection: Standards of acceptability.

Each weld and welding must be inspected to ensure compliance with the requirements of this subpart. Visual inspection must be supplemented by nondestructive testing. The acceptability of a weld is determined according to the standards in section 6 of the 1971 edition of API Standard 1104.

8. In the table of section, § 195.228 would be amended to read as follows:

Sec.
 195.228 Welds and welding inspection: Standards of acceptability.

Interested persons are invited to participate in this rule-making action by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and notice numbers and be submitted in duplicate to the Director, Office of Pipeline Safety, Department of Transportation, Washington, D.C. 20590. All communications received by June 3, 1974, will be considered by the Director before taking final action on the notice. All comments will be available for examination by interested persons at the Office of Pipeline Safety before and after the closing date for comments. The proposal contained in this notice may be changed in the light of comments received.

This notice is issued under the authority of section 3 of the Natural Gas Pipe-

line Safety Act of 1968 (49 U.S.C. § 1672), sections 831-835 of Title 18, United States Code, section 6(e) (4) of the Department of Transportation Act (49 U.S.C. 1655(e) (4)), § 1.58(d) of the regulations of the Office of the Secretary of Transportation (49 CFR 1.58(d)), and the redelegation of authority to the Director, Office of Pipeline Safety, set forth in Appendix A to Part 1 of the regulations of the Office of the Secretary of Transportation (49 CFR Part 1).

Issued in Washington, D.C., on April 16, 1974.

JOSEPH C. CALDWELL,
Director,
Office of Pipeline Safety.

EXEMPTION OF AIR CARRIERS FOR MILITARY TRANSPORTATION

Notice of Proposed Rule Making

Correction

In FR Doc. 74-8719 appearing at page 13672 in the issue for Tuesday, April 16, 1974, the headings should read as set forth above.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

ILLINOIS, MICHIGAN, MINNESOTA AND WISCONSIN

Proposed Revisions to Implementation Plans

On May 31, 1972 (37 FR 10482), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved portions of the Illinois, Michigan, Minnesota and Wisconsin plans for the implementation of the national ambient air quality standards. At that time, the Administrator also approved dates by which national ambient air quality standards were to be attained.

On February 19, 1974, the Administrator proposed State submitted revisions consisting of compliance schedules for individual sources in Illinois, Indiana, Michigan, Minnesota, and Wisconsin for public comment. Final action on these schedules will be taken shortly. Additional compliance schedule revisions have subsequently been received from the State of Illinois, Michigan, Minnesota and Wisconsin. These schedules have been subjected to State public hearings after due notice thereof and have been adopted by these States as plan revisions.

These submitted schedules are identified in this notice by source, location, applicable regulation, date schedule adopted and final compliance date and, are set forth as proposed rulemaking. Public comment is being solicited as to whether the schedules should be approved pursuant to section 110 of the

Clean Air Act. Copies of the compliance schedules with transcripts of the State-held public hearings are available for public inspection between 8:15 a.m. and 4:45 p.m., Monday through Friday at the Region V Office.

Interested persons may participate in this rulemaking by submitting written comments, preferably in triplicate, to the Regional Administrator, Environmental Protection Agency, Region V, One North Wacker Drive, Chicago, Illinois 60606. All relevant comments received within 30 days of this notice will be considered. Comments received will be available during the business hours specified above at the Region V Office.

(Sec. 110 (a) of the Clean Air Act, as amended 42 USC 1857c-5(a))

Dated: April 11, 1974.

JOHN QUARLES,
Acting Administrator.

It is proposed to amend 40 CFR Part 52 as follows:

Subpart O—Illinois

1. In § 52.720, paragraph (d) is amended as follows:

§ 52.720 Identification of plan.

(d) Revisions to the plan were submitted on:

(2) September 14, 1973, October 11, 1973 and November 26, 1973. The following compliance schedules for the sources identified below have been submitted as revisions to the plan pursuant to section 110(a) (3) of the Clean Air Act. All regulations cited are air pollution control regulations for the State, unless otherwise specified.
