INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2011 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual progress report attachments provide the basis for determining the state's pipeline safety grant allocation.

Field Inspection (PART G):

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART G, the PHMSA representative should include a written summary which thoroughly documents the inspection.

Evaluator Notes:

On September 26, 2012, I observed Greg Williams and Zachary Ragain, both Missouri Pipeline Safety Inspectors, conducting a standard inspection of the physical facilities of Missouri Gas Energy (MGE). The area location of the facilities was in the MGE Monett, MO south area. Before starting, the inspectors selected locations of facilities they wanted to inspect and then planned the route for best time use. The types of facilities they inspected were valves, regulators, overpressure prevention devices, cathodic protection facilities, and pipe. They checked for adequate CP protection, atmospheric corrosion protection, protection from physical damage, and required maintenance. Mr. Williams was the lead and Mr. Ragain was inspecting the items he had adequate knowledge, since Mr. Ragain had not completed the required TQ courses. Mr. Williams was knowledgeable and fully qualified and both inspectors conducted the inspection in a courteous and professional manner.
