INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2014 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual progress report attachments provide the basis for determining the state's pipeline safety grant allocation.

Field Inspection (PART G):

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART G, the PHMSA representative should include a written summary which thoroughly documents the inspection.

Evaluator Notes:

On September 10, 2015, I observed Edwin Clarkson conducting a standard inspection. I was accompanied by Mary Friend, the West Virginia program manager of pipeline safety. The inspection was the initial inspection of this operator since being acquired by Williams Pipeline. Mr. Clarkson explained the inspection process and focused on the basic requirements of the pipeline safety regulations. The inspection ensured what version of the Operations and Maintenance Manual, verified where the required records were available for inspection, verified the operator's employees, their position and duties within the company and who would be the contacts between the operator and the West Virginia Public Service Commission. An abbreviated inspection of the O&M Manual, and O&M records was conducted to ensure all types of records were being maintained. Mr. Clarkson was knowledge of the safety regulations and the processes for conducting inspections. He conducted this inspection in a courteous and professional manner.
