2014 Gas State Program Evaluation -- CY 2014 Gas

State Agency: North Dakota Rating:

Agency Status: 60105(a): Yes 60106(a): No Interstate Agent: No

Date of Visit: 07/06/2015 - 07/10/2015 **Agency Representative:** Aaron Morman **PHMSA Representative:** Leonard Steiner

Commission Chairman to whom follow up letter is to be sent:

Name/Title: Julie Fedorchak, Chairman

Agency: North Dakota Public Service Commission
Address: 600 East Boulevard, Department 408
City/State/Zip: Bismarck, North Dakota 58505-0408

INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2014 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less then the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual progress report attachments provide the basis for determining the state's pipeline safety grant allocation.

Field Inspection (PART G):

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART G, the PHMSA representative should include a written summary which thoroughly documents the inspection.

On July 7, 2015, I observed Aaron Morman, lead inspector and Craig Reamann inspector conducting a Field Inspection of the Aux Sable Midstream transmission pipeline in North Dakota. Mr. Morman had adequately notified the operator of the inspection and had coordinated the place and time to meet. We arrived at the location as scheduled. The locations along the Row-of-Way had previously determined my the lead inspector. During the inspection any unusual areas were inspected. The allotted time for the inspection was correctly calculated. Mr. Morman conducted a thorough exit interview. No probable violations were discovered, however, suggestions were made for several items that could be more efficient for the operator. Both inspectors were knowledgeable and competent and conducted the inspections in a courteous and professional manner.
