INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2018 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual progress report attachments provide the basis for determining the state's pipeline safety grant allocation.

PART C - Program Performance

Points(MAX) Score

- 1 Was ratio of Total Inspection person-days to total person days acceptable? (Director of State Programs may modify with just cause) Chapter 4.3 5 5
Yes = 5 No = 0

A. Total Inspection Person Days (Attachment 2):
215.00

B. Total Inspection Person Days Charged to the Program (220 X Inspection Person Years) (Attachment 7):
220 X 2.25 = 495.00

Ratio: A / B
215.00 / 495.00 = 0.43

If Ratio \geq 0.38 Then Points = 5, If Ratio $<$ 0.38 Then Points = 0
Points = 5

Evaluator Notes:

Total days were 215 and ratio is .43 which is adequate. No issues.

Evaluator Notes:

All training appears adequate. General recommendation to make sure the lead inspector has to make sure he has all the qualifications for example on TIMP,DIMP and OQ. New inspector has not had this training yet. Jimmy was missing an internal corrosion CBT PL-31C, otherwise determined his qualification sufficient as is. This requirement added later.

Evaluator Notes:

Overall there was good documentation and actions taken. there were at least two operators found which had violations issues on maintenance time-frames where no inspection records were found. The violations were closed based on the operator indicating they were changing process to make sure those inspections were completed, however no confirmation was noted that the overdue inspections had been complete. Deduction of one point for this issue. Also recommend probably violation letters be sent by program manager.
