**INSTRUCTIONS:**

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2009 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual certification/agreement attachments provide the basis for determining the state's pipeline safety grant allocation.

**Field Inspection (PART F):**

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART F, the PHMSA representative should include a written summary which thoroughly documents the inspection.

SLR Notes:

On April 28, 2010, I observed Mike Enlow conducting a standard inspection of Indiana Gas Company doing business as Vectren. He was assisted by Indiana pipeline inspector Howard Friend, and observed by Mike Orr, assistant program manager. Mr. Enlow had planned and coordinated the inspection. The two inspectors arrived at the planned time and immediately started the inspection of the records. The operator had been notified what will be inspected and had all records available. Mr. Enlow conducted the records in a logical order and assisted Mr Howard in how to inspect the records given to him. The plan of this inspection was completed at the end of the business day. Mr. Enlow gave an exit briefing and noted there were no probable violations identified. Mr. Enlow and Mr. Howard were knowledgeable and conducted the inspection in a courteous and professional manner. The inspection was adequately recorded on an inspection report form.
