2012 Hazardous Liquid State Program Evaluation -- CY 2012
Hazardous Liquid

State Agency: Indiana

Agency Status:

Date of Visit: 06/17/2013 - 06/28/2013

Agency Representative: Stephen E. Allen

PHMSA Representative: Leonard Steiner

Rating:

Commission Chairman to whom follow up letter is to be sent:

Name/Title: James D. Atterholt, Chairman

Agency: Indiana Utility Regulatory Commission

Address: 101 West Washington Street, Suite 1500E

City/State/Zip: Indianapolis, Indiana 46204-3407

INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2012 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual progress report attachments provide the basis for determining the state's pipeline safety grant allocation.

Field Inspection (PART G):

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART G, the PHMSA representative should include a written summary which thoroughly documents the inspection.

Yes = 2 No = 0 Needs Improvement = 1

Evaluator Notes:

Indiana does not have procedures to conduct all parts of the Standard Inspection. There is only one jurisdictional operator of a liquid pipeline. There are no procedures to determine if the Standard Inspection can be conducted over more than one year, by conducting different elements in different years. The forms used for each element of a standard should be stated in the procedures.
