INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2009 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less then the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual certification/agreement attachments provide the basis for determining the state's pipeline safety grant allocation.

Field Inspection (PART F):

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART F, the PHMSA representative should include a <u>written summary</u> which thoroughly documents the inspection.

14 Part-A General Comments/Regional Observations Info Only Info Only

Info Only = No Points

SLR Notes:

A.14 In 2009, LDNR participated in every Pipeline Safety Emergency Drill that the pipeline operators invited them to. LDNR was a strong participant in NAPSR, and actively participated on three committees: Control Room Management; Liquid Pipeline Task Group; and Staffing Formula Task Group. Mr. Dana Arabie served to organize or re-organize NAPSR Committees: The Research and Development Committee, and the Gathering Line Task Group. LDNR actively participates in the quarterly Louisiana Regional Common ground alliance meetings. LDNR participates with and supports the efforts of Coastal And Marine Operators (CAMO) Pipeline Industry Initiative whose main purpose is to explore and discuss issues and challenges in preventing spills, releases, and damage to coastal and marine pipelines and environments. LDNR helps organize and co-sponsors the annual Pipeline Safety Seminars for Hazardous Liquid and Natural Gas operators. LDNR has established the Geaux Team who make Damage Prevention information available at County Fairs and other public events. LDNR works closely with the State Police and LaOneCall to promote 811 and implement safe excavation practices.

Risk base Inspections - Targeting High Risk Areas 1.5 1.5 1 Does state have process to identify high risk inspection units? Yes = 1.5 No = 0 Risk Factors (criteria) to consider may include: Miles of HCA's, Geographic area, Population Density Length of time since last inspection History of Individual Operator units (leakage, incident and compliance history, etc.) Threats - (Excavation Damage, Corrosion, Natural Forces, Other Outside Forces, Material or Welds, Equipment, Operations, Other) SLR Notes: G.1. Yes, a prioritization risk model spreadsheet has been developed (originally from IMP) that is being adapted to all Operators. It impacts the areas of emphasis during the annual inspections. Elements include compliance issues, accidents, leaks, product transported, population density, MOP as a % of SMYS, total miles of pipeline, corrosion control, & operator responsiveness. .5 0.5 2 Are inspection units broken down appropriately? (see definitions in Guidelines) Yes = .5 No = 0SLR Notes: G.2. Yes, Units are created by Operator, pipe location, Operator management unit, etc. .5 0.5 3 Does state inspection process target high risk areas? Yes = .5 No = 0SLR Notes: G.3. Yes, the risking program has been in use since IMP. Use of Data to Help Drive Program Priority and Inspections 0 .5 4 Does state use data to analyze effectiveness of damage prevention efforts in the state? (DIRT or other data, etc) Yes = .5 No = 0SLR Notes: G.4. No, o points. have # calls and # damages by region but as yet it is not disaggregated into more specific information. DIRT was not used in 2009. .5 0.5 5 Has state reviewed data on Operator Annual reports for accuracy? Yes = .5 No = 0SLR Notes: G.5. Yes, the reports are reviewed by an Engineer and compared with prior years. Also, pipeline mileage is used for assessing user fees so it is closely monitored. .5 0.5 6 Has state analyzed annual report data for trends and operator issues? Yes = .5 No = 0SLR Notes: G.6. Yes, LNDR reviews the Form for completeness, miles of pipe, & spill/leak data and trends it relative to prior years. .5 0.5 7 Has state reviewed data on Incident/Accident reports for accuracy? Yes = 5 No = 0SLR Notes: G.7. Yes, Reportable accidents are investigated relative to minimizing future events, including those due to excavation damage. .5 0.5 8 Does state do evaluation of effectiveness of program based on data? (i.e. performance measures,trends,etc.) Yes = .5 No = 0

SLR Notes:

G.8. Yes, performance indicators include accidents per 1000 miles of pipe; # of inspections performed; # of probable violations; # of probable violations corrected. Tracking data includes accidents per 1000 miles of jurisdictional pipe; total miles of jurisdictional pipe; # of reportable accidents; costs due to

reportable accidents; injuries due to reportable accidents; & deaths due to reportable accidents; these numbers are disaggregated to determine national numbers and LDNR State numbers.
