INSTRUCTIONS:

Complete this evaluation in accordance with the Procedures for Evaluating State Pipeline Safety Program. The evaluation should generally reflect state program performance during CY 2009 (not the status of performance at the time of the evaluation). All items for which criteria have not been established should be answered based on the PHMSA representative's judgment. A deficiency in any one part of a multiple part question should be scored as needs improvement. Determine the answer to the question then select the appropriate point value. If a state receives less than the maximum points, include a brief explanation in the space provided for general comments/regional observations. If a question is not applicable to a state, select NA. Please ensure all responses are COMPLETE and ACCURATE, and OBJECTIVELY reflect state program performance. Increasing emphasis is being placed on performance. This evaluation together with selected factors reported in the state's annual certification/agreement attachments provide the basis for determining the state's pipeline safety grant allocation.

Field Inspection (PART F):

The field inspection form used will allow different areas of emphasis to be considered for each question. Question 13 is provided for scoring field observation areas. In completing PART F, the PHMSA representative should include a written summary which thoroughly documents the inspection.

SLR Notes:

On May 6, 2010, I observed a standard inspection of Michigan Consolidated Gas company (MichCon). This inspection was exclusively for the storage fields in Michigan. The operator's key personnel and the records for the storage field came to the Commission's office in Lansing, MI. The lead inspector for the inspection was David Chislea. The records were reviewed for all storage fields and selected sections of the O&M were inspected. The results were documented on an inspection form similar to PHMSA Form 12. The inspectors conducted the inspection in a professional and courteous manner. All were knowledgeable of the requirements. Mr. Chislea lead the inspection in an exceptional manner.
