

Variation in Marking

Companies requesting a change in the configuration of requalification markings required by 49 CFR Section 180.213(d) for their pressure sensitive labels that are placed on requalified cylinders can apply for an approval under the Competent Authority Program.

Applicants requesting to change the marking requirements will receive a separate Competent Authority Approval that authorizes a variation from the marking requirements in Section 180.213.

How to Apply

Note: Must have a current Requalification Identification Number (RIN# - Approval)

- Submit a written request stating the purpose of your application. In addition, the following items must be included in the application:
 - Identify the section in the 49 CFR that relates to your request.
 - Point of contact
 - Company Name
 - Contact Information including address, phone/fax numbers and email
 - Provide a sample copy of the label

- Application can be submitted via email: approvals@dot.gov, in addition to mailing and faxing.
