

Preterford
§ 172.304
Marking
02-0166

June 13, 2002

Mr. Edward Mazzullo
Director of Office of Hazardous Material Standards
US DOT > RSPA DHM-10
400 7TH Street SW
Washington, D.C. 20590-0001

Dear Mr. Mazzullo:

As President and owner of AFGO Laboratories, Inc. in Denver, Colorado, I am requesting clarification on CFR 49 Parts 100-185, Section 172.304 Marking Requirements. I have been told that separate labels must be attached to our non bulk containers because our present labels do not clearly show proper shipping names, identification numbers, or the identified hazardous material, and do not comply with 172.304 (4) of Marking Requirements.

I am sending a copy of the label that was used as a sample to determine that our labels were not acceptable. I am requesting advisement on how to proceed. Please fax your response to 303-371-8133. I will most anxiously await your determination

Sincerely,

A handwritten signature in black ink, appearing to read "Dale D. Benincasa", is written over a horizontal line.

Ms. Dale D. Benincasa
President
AFGO Laboratories, Inc.

DIRECTIONS:

USE: For first stage in commercial laundry applications. Dispense only in conjunction with Destainer, a neutralizer and/or a surfactant product.

Use CARE in machines having a porcelain lined tub. Avoid extremely HOT (180 deg F) water.

Consult your supplier's representative for instructions, depending on your application.

Do not mix with anything other than water. Concentrated can cause burns.

FOR INDUSTRIAL USE ONLY
